What is  
big data?

# Part 1.

# Video Script

We are going to start exploring the world of data technology. Data technology, also called datatech or DT, is the technology connected to areas such as market or advertising technologies. The data technology sector includes solutions for data management, and products or services that are based on data generated by both humans and machines. Data technology is an emerging industry that uses artificial intelligence, big data analysis, and machine-learning algorithms to improve business activities in many sectors, such as digital marketing, or business analysis.

In this chapter, you will learn how to introduce and describe people, things, and projects. You will also see some important vocabulary and grammar topics in order to make that happen.

Now look at the script of **What is big data?**

## WHAT IS BIG DATA?

[At a coworking space]

[Casey]

Entering the job market and getting ahead demands lots of preparation, a keen eye for opportunities, and, most of all, the necessary courage to take them.

A lot has changed throughout the years. Some professions that used to exist are no longer a thing, and you can't deny technology has played a huge part in these changes—especially the use of big data to define market trends and consumer behavior.

In this series, we'll go over the concept of big data as well as its impacts on innovation technology and the way that people do business and make money nowadays. We'll also talk about how big data relates to artificial intelligence and the consequences that may emerge from this kind of technology.

To do so, we're going to count on some meaningful insights from our guests. Two of them will take part in this series since the first episode. Let me introduce them to you:

This is Keshav Malani, co-founder of Powr of You, an analytics platform that allows people to understand their online footprints and make money from their data.

Meet Richard Weyhrauch, founder of IBUKI, a company designed to be the leading source of linguistic data and software products that index, process, organize, and search unstructured data.

So, let's get started, shall we?

When I say "big data," what comes to your mind?

**[Keshav Malani]**

From my perspective, big data is extremely large amounts of data that can be used to uncover patterns about behavior, about business trends, trends in general about population. That's where big data has been, and that's where it is right now.

Right now, we are actually generating a ton more data through things that we never did before. So, before, it was a lot of business transactions – when you are filing your taxes, etc. – that was creating a lot of data set.

Now, as people, we are creating data on an ongoing basis. Throughout our phones, our social media... Every single second that you are doing something, that you're moving, that you're getting in your car, it's generating data.

**[Casey]**

Allow me to exemplify what Malani is saying—when you fill out your income tax return, for instance, you need to provide some information about you: your full name, address, occupation, age, social security number, and the amount of money you make... All of that is data on you that you're giving away just by doing something as trivial as paying your taxes.

And that's just one example. The widespread use of the internet and social media has also taken a considerable part in this process.

So, when we say "big data," are we really talking about something completely new?

**[Richard Weyhrauch]**

So, in some ways, big data is a kind of an illusion, because there was always big data. Namely, everything you had... Just now you can have more.

**[Casey]**

You see? Big data has actually always been around, but we just haven't taken a moment to acknowledge its existence. There wasn't enough technology to deal with the amount of data that we generate on a daily basis.

But there is now. And that means companies can use this data to better understand our behavior as consumers.

So, what they do is, first, collect the data. Then, they store it and clean it up—by that, I mean they remove all the information that has nothing to do with their line of business or their objectives.

The next step is to verify the data that is left and analyze it to see if it's valuable to their business. And let me tell you, it almost certainly is.

In short, big data is all the information that we give away since we are born! We could also say that big data itself is not something new, but the way it has been used is. Companies have been exploring the potential of big data to help them better understand their line of business...and attract consumers.

**O QUE SÃO MEGADADOS?****[Em um espaço de coworking]****[Casey]**

Ingressar e avançar no mercado de trabalho requer muito preparo, um olhar aguçado para oportunidades, e, mais do que tudo, a coragem necessária para aproveitá-las.

Muito mudou ao longo dos anos. Algumas profissões que antes existiam já não existem mais, e não se pode negar que a tecnologia teve um papel enorme nessas mudanças – especialmente o uso de megadados para definir tendências de mercado e comportamento do consumidor.

Nesta série, vamos ver o conceito de megadados, assim como seu impacto na tecnologia da inovação e na maneira como as pessoas fazem negócios e dinheiro hoje em dia. Nós também vamos falar sobre como os megadados estão ligados à inteligência artificial e sobre as consequências que podem decorrer desse tipo de tecnologia.

Para isso, vamos contar com alguns *insights* significativos de nossos convidados. Dois deles vão participar dessa série desde o primeiro episódio; permita-me apresentá-los:

Este é Keshav Malani, cofundador da Powr of You, uma plataforma analítica que ajuda as pessoas a entenderem sua pegada virtual e lucrar com os dados gerados.

Conheça Richard Weyhrauch, fundador da IBUKI, uma empresa feita para ser a maior fonte de dados linguísticos e produtos de software que indexam, processam, organizam e buscam dados desestruturados.

Vamos começar?

Quando eu digo “megadados”, no que você pensa?

**[Keshav Malani]**

Da minha perspectiva, megadados são quantidades extremamente grandes de dados que podem ser usados para descobrir padrões de comportamento, tendências de negócios, e tendências gerais da população. É aí que os megadados estiveram, e é aí que eles estão agora.

Atualmente, estamos gerando muito mais dados por meio de coisas que nunca fizemos antes. Antes eram as transações negócios – quando você está preenchendo os formulários dos seus impostos, etc. – isso estava criando muitos conjuntos de dados.

Agora, como pessoas, estamos gerando dados de forma constante, por meio dos nossos telefones, das redes sociais... Cada segundo que você faz alguma coisa, que você se move, que você entra no seu carro, isso gera dados.

**[Casey]**

Me permita dar um exemplo de o que o Malani está falando – quando você faz sua declaração de imposto de renda, você precisa fornecer alguns dados a seu respeito: seu nome completo, endereço, ocupação, idade, CPF, renda... Tudo isso são dados que você está fornecendo fazendo algo tão banal quanto pagar seus impostos.

Esse é apenas um exemplo. O uso generalizado da internet e das redes sociais também tem um papel considerável nesse processo.

Então, quando falamos de “megadados”, estamos realmente falando de algo completamente novo?

**[Richard Weyhrauch]**

Em alguns aspectos, megadados são um tipo de ilusão, porque eles sempre existiram. Ou seja, tudo o que você tinha... Só que agora você pode ter ainda mais.

**[Casey]**

Entendeu? Os megadados sempre existiram, mas nós não tínhamos parado para reconhecer a sua existência. Não existia tecnologia suficiente para lidar com a quantidade de dados que geramos cotidianamente.

Mas hoje existe. Isso significa que empresas podem usar esses dados para entender melhor nosso comportamento como consumidores.

Então, o que elas fazem é: primeiro, elas coletam os dados. Depois, armazenam e “limpam” – o que quero dizer com isso é que toda a informação que não tem a ver com os objetivos ou linha de negócios delas é removida.

O próximo passo é verificar todos os dados que restaram e analisá-los para ver se eles são relevantes para os negócios dessas empresas. E deixa eu te falar, quase sempre são.

Para resumir, megadados são todas as informações que fornecemos desde que nascemos! Poderíamos também dizer que os megadados não são algo novo em si, mas a maneira como eles são usados é. As empresas têm explorado o potencial dos megadados para ajudá-las a entender sua linha de negócios... e atrair clientes.

## Part 2.

# Vocabulary

After reading the script about **data technology**, you got an idea of the amount of information generated daily. So, it is quite clear how the evolution of technology has made this kind of information valuable to the business world.

In order to better understand this world, first we need to know some frequently used **words and expressions** that are common to this kind of environment.

Let's start with the ones that collocate with the verb **to make**:

### TO MAKE

to **make** a profit  
ter / obter lucro, lucrar

to **make** money  
fazer / ganhar dinheiro

to **make** a deal  
fazer um acordo

There are other frequently used expressions related to the business world, but this time with the verb **to do**. Have a look:

### TO DO

to **do** business  
fazer um negócio / negociar

to **do** a job  
fazer um trabalho

Depending on the context, **to make** and **to do** can both mean **to perform an action**. However, in these expressions, **to make and to do are not interchangeable**, and they will be **followed by specific complements**. There is no rule to justify that; it is just as it is.

There are more expressions that require **specific verbs** to make sense. Some others can even have different meanings depending on the verb that is being used.

That's the case of the following examples with the verbs **to have** and **to take**. They are also pretty common in the corporate world:

### TO HAVE

to have a business

ter um negócio / uma empresa

to have an opportunity

ter uma oportunidade

to have a meeting

ter uma reunião

### TO TAKE

to take an opportunity

aceitar / aproveitar uma oportunidade

to take part in a meeting

participar de uma reunião

Speaking of differences, take a look at these words:

### REUNION ≠ MEETING

reunion

reencontro

meeting

reunião

Note that a **meeting** is an occasion when **people gather to discuss things and make decisions**, which is something recurrent in the business world. Whereas the noun **reunion** relates to the verb **reunite**, which means **bringing people back together after a long time**, usually friends and family. Be careful not to mix them up.

Another quite common verb in the English language, not only in the business world, is the verb **to be**.

It can be used to **talk about yourself** and **your profession**. For example:

**My name is John Doe.**

Meu nome é John Doe.

**I am a lawyer.**

Eu sou (um) advogado.

You can also use the verb **to be** to introduce other people and talk about their **profession**. Take a look:

**This is Keshav Malani.**

Este é Keshav Malani.

**Mr. Malani is the co-founder of Powr of You.**

O senhor Malani é cofundador da empresa Powr of You.

This is a **neutral** way of introducing people, and it can be used **both in a corporate context and in a familiar one**. Notice that we use **Mr.** followed by the **last name of a man** as a sign of respect.

If you are **speaking before an audience** or if it is a **more formal occasion**, you may introduce other people by saying:

**Meet Richard Weyhrauch.**

Conheça Richard Weyhrauch.

There is a difference in structure when you introduce **one person** and when you introduce **more people** at a time. Contrast:

**This is Angela Green. Ms. Green is the sales manager.**

Esta é Angela Green. A senhora Green é a gerente de vendas.

**These are George Bennet and Samuel Brown. They are lawyers.**

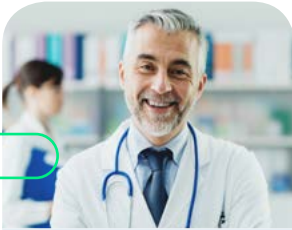

Estes são George Bennet e Samuel Brown. Eles são advogados.

Note that you will use **this is** when introducing one person, because it is a **singular** construction. And you will use **these are** when you introduce more than one person, because it is a **plural** construction. Also, notice that we use **Ms.** followed by the **last name of a woman** to show respect.

When introducing people in the work environment, it is common to mention their **profession**. Here is a list of some traditional ones:

### PROFESSIONS / OCCUPATIONS

**doctor**  
médico

**engineer**  
engenheiro

**teacher**  
professor

**dentist**  
dentista

But there are also the ones that emerged thanks to the **development** of all kinds of **technology**, such as:

### TECHNOLOGY-RELATED PROFESSIONS

**data detective**  
profissionais especializados em fazer  
triagem de megadados

**user-experience designer**  
profissionais especializados em entender  
e melhorar a experiência do usuário com  
tecnologias ou serviços

**app developer**  
desenvolvedor de aplicativos

**Name, occupation, age, and origin** are personal information we can share. Look:

**Age**

**Anna is 25 years old. / Anna is 25.**

Anna tem 25 anos de idade.

**Origin**

**Anna is from São Paulo.**

Anna é de São Paulo.

Our **address** is yet another piece of personal information that we can share. Take a look:

**ADDRESS**

**Anna lives on Maple Street, in Los Angeles.**

Anna mora na Maple Street, em Los Angeles.

Notice that in the example we used the verb **to live**, not the verb **to be**. But we could also say:

**ADDRESS**

**Anna's house is on Maple Street, in Los Angeles.**

A casa de Anna é/fica na Maple Street, em Los Angeles.

When introducing someone, or talking about them, it is pretty common to mention their **characteristics**. And to do so, you will need **adjectives**, such as:

**ADJECTIVES**

**competent**  
competente

**responsible**  
responsável

**determined**  
determinado

**talented**  
talentoso

**great**  
ótimo

Here are some examples of how to use these adjectives in complete sentences:

**George is a competent professional.**

George é um profissional competente.

**He is extremely important to our company.**

Ele é extremamente importante para a nossa empresa.

**Samuel is very talented.**

Samuel é muito talentoso.

**He takes a considerable part in the decision-making process.**

Ele tem papel considerável no processo de tomada de decisão.

**Angela is a great manager.**

Angela é uma gerente ótima.

**She leads a big team in a responsible way.**

Ela comanda uma equipe grande com muita responsabilidade.

Sometimes, **adjectives** can have **different meanings according to the context**.

It is the case of the adjective **great**. For example:

**Angela is a great manager.**

**Angela is an excellent manager.**

Angela é uma gerente ótima.

Here, great means the same as **excellent**. Now, contrast:

The product is a great success.  
The product is a huge / a big success.  
O produto é um grande sucesso.

In this case, **great** is the same as **huge** or **big**. Bear in mind that **context** makes all the difference when you are trying to make sense of a word.

In this chapter, you saw frequently used verbs in the business environment, and learned how to talk about yourself, to introduce people, and to make basic descriptions.

# Part 3.

# Vocabulary Activities

## A. Number the columns according to the translation of the words.

- |                                   |                                              |                               |                            |
|-----------------------------------|----------------------------------------------|-------------------------------|----------------------------|
| ( 1 ) fazer um negócio / negociar | ( 8 ) ter um negócio / uma empresa           | ( ) to make a profit          | ( ) to have an opportunity |
| ( 2 ) fazer um trabalho           | ( 9 ) participar de uma reunião              | ( ) to have a meeting         | ( ) to make money          |
| ( 3 ) ter uma oportunidade        | ( 10 ) reunião                               | ( ) to make a deal            | ( ) to have a business     |
| ( 4 ) fazer um acordo             | ( 11 ) aceitar / aproveitar uma oportunidade | ( ) to do business            | ( ) reunion                |
| ( 5 ) fazer / ganhar dinheiro     | ( 12 ) ter uma reunião                       | ( ) to take an opportunity    | ( ) meeting                |
| ( 6 ) reencontro                  |                                              | ( ) to do a job               |                            |
| ( 7 ) ter / obter lucro, lucrar   |                                              | ( ) to take part in a meeting |                            |

## B. Fill in the blanks with the appropriate words according to the translation.

- a) The product is a \_\_\_\_\_ success.  
O produto é um **grande** sucesso.
- b) Angela is a \_\_\_\_\_ manager.  
Angela é uma gerente **ótima**.
- c) Samuel is very \_\_\_\_\_.  
Samuel é muito **talentoso**.
- d) She leads a \_\_\_\_\_ in a responsible way.  
Ela comanda uma **equipe grande** com muita responsabilidade.
- e) George is a \_\_\_\_\_.  
George é um **profissional competente**.
- f) He takes a \_\_\_\_\_ in the decision-making process.  
Ele tem **papel considerável** no processo de tomada de decisão.

### Activity B – Answers

- great / big / huge
- great
- talented
- big team / huge team
- competent professional
- considerable part / considerable role

### Activity A – Answers

- to do business / 2. to do a job / 3. to have an opportunity / 4. to make a deal / 5. to make money / 6. reunion / 7. to make a profit / 8. to have a business / 9. to take part in a meeting / 10. meeting / 11. to take an opportunity / 12. to have a meeting

# Part 4.

# Grammar

In this chapter, you will learn some important grammar topics to help you understand and communicate better in English. We will start with one of the **most essential topics** in the English language: the verb **to be**.

The verb **to be** can be used in **different contexts**. A sentence in the simple present will follow this structure:

## VERB TO BE Sentence Structure

**Subject + Verb To Be + Complement**  
Sujeito + Verbo To Be + Complemento

The verb **to be** is the **most irregular verb** in the English language, and it is important to learn its **conjugations**. They will change **according to the subject** of the sentence.

There are three possible conjugations for the verb **to be** in the **simple present**: **am**, **are**, and **is**. Take a look:

## SIMPLE PRESENT – VERB TO BE

**I am a teacher.**

Eu sou professor(a).

**You are a student.**

Você é um(a) aluno(a).

**He is a doctor.**

Ele é médico.

**She is an engineer.**

Ela é engenheira.

**It is a huge company.**

É uma empresa enorme.

**We are at a nice house.**

Nós estamos em uma casa legal.

**You are students.**

Você são alunos(as).

**They are from California.**

Eles(as) são da Califórnia.

The verb **to be** is one of the **most used verbs** in the English language, and it is going to be used in a variety of situations. Take a look:

### USES OF THE VERB TO BE

#### Occupation

**Anna is an app developer.**

Anna é desenvolvedora de aplicativos.

#### Origin

**Anna is from São Paulo.**

Anna é de São Paulo.

#### Age

**Anna is 25 years old.**

Anna tem 25 anos de idade.

The verb to be can be used with **demonstrative pronouns** to **make introductions**. For example:

### DEMONSTRATIVE PRONOUNS & VERB TO BE

**This is** Angela Green.

Esta é Angela Green.

**These are** George Bennet and Samuel Brown.

Estes são George Bennet e Samuel Brown.

Note that the **demonstrative pronoun this** refers to a **singular noun**. The corresponding conjugation of the verb to be will be **is**. On the other hand, the **demonstrative pronoun these** is used with **plural nouns**, and its corresponding conjugation of the verb to be is **are**.

**Nouns** are words that give **names** to **things, people, places, and animals**. They can have a **singular form** and a **plural form**. Observe the nouns underlined in the following sentences:

### NOUNS

George and Samuel are lawyers.

George e Samuel são advogados.

George is a competent professional.

George é um profissional competente.

An **adjective** is a word that **modifies or describes a noun**. They qualify **things, people, places, and animals**. Let's see how we place **nouns** and **adjectives** in a sentence:

### ADJECTIVES

George is a competent professional.

George é um profissional competente.

Angela is a great manager.

Angela é uma gerente ótima.

Note that, in English, the **adjective** comes **before the noun** it is describing.

**Adjectives** do not vary according to the word they are describing. That is: they **do not have plural forms** and they do not change according to gender; in other words, they stay **the same whether they're describing a feminine or a masculine noun**. Check it out:

### ADJECTIVES & NOUNS

Samuel is very talented.

noun

adjective

Samuel é muito talentoso.

Angela is very talented.

noun

adjective

Angela é muito talentosa.

They are very talented.

noun

adjective

Eles são muito talentosos.

You have seen a number of contexts in which we can use the verb to be.

But this is not the only verb there is. To form sentences with other verbs, you will use the same general structure you will use with the verb to be, and that is **subject + verb + complement**.

Conjugating other verbs in the simple present is simpler than doing it with the verb to be. In the affirmative form, the verb remains in the **base form** – which is the **infinitive form without the particle to**. The only **difference** happens in the **third person singular**, in which you will **add -S** to the end of the verb.

Observe the next examples to understand it better:

### SIMPLE PRESENT - OTHER VERBS

I have an important meeting in an hour.

Eu tenho uma reunião importante em uma hora.

We do a good job together.

Nós fazemos um bom trabalho juntos.

They make big money selling microchips.

Eles ganham muito dinheiro vendendo microchips.

He takes a considerable part in the decision-making process.

Ele tem papel considerável no processo de tomada de decisão.

She leads a big team in a responsible way.

Ela comanda uma equipe grande com muita responsabilidade.

In this chapter, you learned how to use the verb **to be** and the **other verbs** in the affirmative form of the **simple present**. You also learned about **adjectives** and **nouns**. If you want to learn more about these topics, you can refer to the **Grammar Guide** section at the end of your book.

### GRAMMAR GUIDE

|                              |          |
|------------------------------|----------|
| Adjectives                   | Page 138 |
| Nouns                        | Page 160 |
| Simple Present – Other Verbs | Page 205 |
| Simple Present – Verb To Be  | Page 211 |

# Part 5.

# Grammar Activities

## A. Complete the table with the correct form of the verb to be.

- |                           |                                |
|---------------------------|--------------------------------|
| a) I _____ a teacher.     | e) It _____ a huge company.    |
| b) You _____ a student.   | f) We _____ at a nice house.   |
| c) He _____ a doctor.     | g) You _____ students.         |
| d) She _____ an engineer. | h) They _____ from California. |

## B. Fill in the blanks with the missing adjectives and nouns according to the translation.

- a) I have an \_\_\_\_\_ in an hour.  
Eu tenho uma **reunião importante** em uma hora.
- b) She leads a \_\_\_\_\_ in a responsible way.  
Ela comanda uma **equipe grande** com muita responsabilidade.
- c) They make \_\_\_\_\_ selling microchips.  
Eles ganham **muito dinheiro** vendendo microchips.
- d) He takes a \_\_\_\_\_ part in the decision-making process.  
Ele tem papel **considerável** no processo de tomada de decisão.
- e) We do a \_\_\_\_\_ together.  
Nós fazemos um **bom trabalho** juntos.

A woman is shown from the chest up, wearing VR goggles and holding a controller. She is looking upwards and to the right. The image is overlaid with a blue semi-transparent layer. A network diagram with nodes and lines is visible in the background. A large green number '2' is positioned in the upper right corner.

# 2

# Innovations

*Innovations*

# Part 1.

# Video Script

In this chapter, you are going to see the difference between verbs, nouns, and adjectives. You will learn how to describe people and see more about the simple present of all verbs.

Now look at the script of **Innovations**.

## INNOVATIONS

**[Casey]**

**[On the phone, at a coworking space]**

Yeah, it sounds great. Yeah, that's perfect! I was just thinking that same thing. Yeah...oh, hey, I gotta go. Okay, bye.

**[Casey hangs up the phone and changes place]**

In the previous episode, we saw a general concept of big data and its potential value to businesses. Now, it's time to take a step further and go through some of its practical applications.

Our guest Mark Zawacki will help us get started.

One important big data application is to make some innovations possible, such as Uber, Airbnb, and even Google.

**[Mark Zawacki]**

All of those have huge, huge big data engines in them in terms of how they're used.

You know, if you think about the complexity of routing multiple riders together in an efficient way, in getting them all to their destinations... that's a pretty complex, a reasonably complex mathematical problem that is solved with big data.

**[Casey]**

As passengers keep using the app, it's possible, for example, to pick up the most common destinations and cross them with the times at which people generally use the service. That information will define prices and how many cars they need to make available at certain places to cover the users' needs.

That takes us to another benefit companies can get from big data. They can use it to improve user experience—which is important because the more satisfied users feel with a specific device or technology, the more they will tend to use it, and eventually even depend on it.

But there's another big data application that is much more aggressive when it comes to making profits.

**[Keshav Malani]**

You're trying to understand, from people's behavior, do they have a propensity to buy a certain product? Okay, so, before, what you would do is: you would look at a table, "Okay, are my sales going up or down?" On big data, you're not just doing this on a couple of stores, you can expand this out to the entire nation, and then you can expand this out globally.

I need to predict what's going to happen in order to make sure that my prices, when I go to market, are pretty stable. Because consumers are not going to handle five dollars, then ten dollars, then two dollars. That's not going to happen. So, you need a lot of the predictability that comes along with big data and analytical abilities behind that to be able to really kind of drive your business decisions.

**[Casey]**

That is, companies can use all that information to analyze which cities or even countries are more inclined to buy their products. They can even compare costs and probability of profit to decide if it's worth expanding their market into this or that place. Advertising strategies can be defined based on big data analysis. Richard Weyhrauch gives us an example to illustrate that.

**[Richard Weyhrauch]**

There are people who price things higher because of the fact that they know that certain persons are likely to buy that thing, so they price that higher, not lower.

In other words, by knowing that this person buys this kind of shampoo, then your website, when you look at it to buy it, well, that has a higher price than someone who doesn't buy it, and you are trying to attract them to buy it. So, there are companies that do that very aggressively.

**[Casey]**

As you can see, big data analysis has a significant impact on companies' decision-making processes. The fact that now it's possible to handle this information in an intelligible way changes business transactions for good.

## INOVAÇÕES

**[Casey]**

**[No telefone, em um espaço de coworking]**

Ah, isso soa ótimo! Sim, está perfeito! Eu estava pensando na mesma coisa. É... oh, escuta. Eu tenho que ir. Ok, tchau!

**[Casey desliga o telefone e muda de lugar]**

No episódio anterior, vimos o conceito de megadados e seu potencial valor para os negócios. Agora é o momento de dar um passo além e ver suas aplicações práticas.

Nosso convidado, Mark Zawacki, vai nos ajudar a começar.

Uma importante aplicação dos megadados é tornar algumas inovações – como o Uber, o Airbnb e até o Google – possíveis.

**[Mark Zawacki]**

Todos eles têm imensos, imensos mecanismos de megadados, em termos de como eles são utilizados.

Se você pensar sobre a complexidade de agrupar múltiplos passageiros de maneira eficiente, fazendo com que todos cheguem aos seus destinos... É bastante complexo, é um problema matemático razoavelmente complexo, que é resolvido com megadados.

**[Casey]**

Portanto, na medida em que os passageiros continuam usando o aplicativo, é possível, por exemplo, coletar os destinos mais comuns e ligá-los aos horários em que as pessoas mais usam o serviço. Essa informação vai definir os preços e quantos carros precisam ser disponibilizados em certas regiões para atender às necessidades dos usuários.

Isso nos leva a outro benefício que as empresas podem obter dos megadados: melhorar a experiência do usuário – o que é importante, porque quanto mais satisfeitos os usuários se sentem com um certo dispositivo ou uma tecnologia específica, mais eles tendem a usá-la e, possivelmente, até a depender dela.

Mas existe outra aplicação dos megadados que é muito mais agressiva quando se trata de obter lucro.

**[Keshav Malani]**

Você está tentando entender, de acordo com o comportamento das pessoas: elas têm propensão a comprar um certo produto? OK, isso é o que você faria antes: você olharia para uma tabela: “OK, minhas vendas estão aumentando ou diminuindo”. Com os megadados, você não faz isso apenas em algumas lojas, você pode expandir isso para o país inteiro, e, depois, pode expandir isso globalmente.

Eu preciso prever o que vai acontecer para garantir que, quando eu entrar no mercado, meus preços sejam bastante estáveis. Porque os consumidores não vão lidar com cinco dólares, depois dez dólares, depois dois dólares. Isso não vai acontecer. Por isso, você precisa da considerável previsibilidade decorrente dos megadados e das habilidades analíticas por trás disso, para realmente orientar suas decisões de negócios.

**[Casey]**

Ou seja: as empresas podem usar toda essa informação para analisar quais cidades ou até quais países estão mais propensos a comprar os seus produtos. Elas podem até comparar custos e probabilidade de lucro para decidir se vale a pena expandir o mercado delas para esse ou aquele lugar. Estratégias de publicidade podem ser definidas com base na análise de megadados. O Richard Weyhrauch nos dá um exemplo para ilustrar isso.

**[Richard Weyhrauch]**

Há pessoas que cobram mais caro por algo por saberem que algumas pessoas tendem a comprar essa coisa; portanto, elas cobram preços mais altos, não mais baixos.

Em outras palavras, sabendo que essa pessoa compra esse tipo de xampu, então, no seu site, quando você entra lá para comprar o xampu, bem, ele está com o preço mais alto do que o site de uma pessoa que não compra o xampu, e você está tentando atraí-la para comprá-lo. Existem empresas que fazem isso agressivamente.

**[Casey]**

Como você pode ver, a análise de megadados tem um impacto significativo nos processos de tomada de decisão das empresas. O fato de que agora é possível lidar com essa informação de uma forma inteligível muda as transações de negócios para sempre.

## Part 2.

# Vocabulary

You have already learned a little bit about big data's importance and its applicability in the current market. You have also seen how big data influences **costs**, **price**, and **value**. Let's have a look at these concepts:

### Cost

The amount of money a company spends to produce a certain product or offer a service.

### Price

The amount of money consumers pay for a product or service. From the company's perspective, the price includes the costs and the profit markup.

### Value

The level of satisfaction a customer has toward a product or service. This concept can't be quantified in a general way because it tends to vary from one customer to the other.

So, this is how it works:

#### Data analysis helps to define prices.

A análise de dados ajuda a definir preços.

#### Companies can compare costs and the probability of profit.

As empresas podem comparar custos e a probabilidade de lucro.

#### Big data has a potential value to business.

Megadados têm um valor potencial para os negócios.

These concepts of **price**, **costs**, and **value** make a reference to the business world. In other contexts, these words can be either interchangeable or even carry completely different meanings.

So, it is important not only to understand the difference between these concepts in a corporate environment, but also their use in some expressions in English.

The expression **at a cost** conveys the idea that something **comes at an expense**, not in a financial sense, but as a relatively bad consequence of a choice. For example:

**Mary has a great job, but at a cost. She doesn't have vacation breaks.**

Mary tem um ótimo emprego, mas com um custo. Ela não tem períodos de férias.

But, if you change the word **cost** for **price**, it completely changes the idea. Observe:

**It's possible to buy imported goods at the supermarket, but at a price!**

É possível comprar produtos importados no supermercado, mas isso tem um preço!

In the previous example, **at a price** suggests that imported goods are actually expensive, that is, they cost a lot of money. So, the context is necessarily financial. Notice that the word **goods**, with an **S** in the end, is the same as **products**. It does not refer to the adjective **good**.

There is also the expression **to pay the price**, which means dealing with a negative consequence of a situation. In this case, it has nothing to do with paying something with money. Observe the example:

**Mary pays the price of not having vacation breaks.**

Mary paga o preço por não ter períodos de férias.

However, if we use the verb **pay** with the noun **cost** as a complement, the idea changes completely. Observe:

**The company pays the costs of shipping.**

A empresa arca com os custos do frete.

In this case, we are referring to the actual payment of financial costs involving the shipping of a product.

Depending on the context, the word **cost** can be used as a verb. And you will use it to ask about price. You will say:

**How much does it cost?**

Quando custa isso?

**How much is it?**

Quanto é?

Some other expressions carry the word **value**, and they can also be used in contexts other than the financial one.

For instance, we can talk about **sentimental value**, which refers to personal or emotional feelings one might give for something, even though **it may have little monetary value**. Someone could say, for example:

**Value (noun)**

**That house has sentimental value for me.**

Aquela casa tem valor sentimental para mim.

Note that in the previous example, **value** is being used as a **noun**. But it can also be used as a **verb**. Take a look:

**Value (verb)**

**The CEO values Jane for her hard work.**

O CEO valoriza a Jane pelo seu trabalho árduo.

You can also notice that, in this sentence, the verb **value** is conjugated in the **third person singular** in the **simple present**. That's why it becomes **values**, with an **S** in the end.

There is yet another expression that we can say to refer to the value of things. Take a look:

**Some consumers change brands when there is a sale. Sometimes it's worth it!**

Alguns consumidores mudam de marca quando tem promoção. Às vezes vale a pena!

The expression **be worth it** is used to say that you gain something from an action. In the previous example, people gain from changing brands during a sale. Notice that the word **worth** is an adjective; that's why it is followed by the complement **it**.

As you could see with the word **value**, sometimes the same word can be used as a noun or a verb. This is quite common in the English language.

Let's see another case:

**Experience (noun)**

**Companies use big data to improve user experience.**

As empresas usam megadados para melhorar a experiência do usuário.

**Experience (verb)**

Companies experience an increase in productivity when the employees are satisfied.  
Empresas experienciam um aumento de produtividade quando os funcionários estão satisfeitos.

In the first example, **experience** is a **noun**, whereas in the second one it is a **verb**.

Check out another example:

**Impact (noun)**

Big data analysis has an impact on decision-making processes.  
A análise de megadados tem um impacto sobre os processos de tomada de decisão.

**Impact (verb)**

High prices impact sales.  
Preços altos impactam vendas.

In the first example you have just seen in the previous box, the **noun impact** is used with the verb **to have**. We say: **to have an impact on**. The **preposition** for this expression is **on**. However, when using **impact** as a **verb**, it will **not require a preposition** in its complement.

There is another case in which the verb **have** will be necessary when using the **noun** instead of the **verb**. Check this out:

**Tend (verb)**

People tend to buy products on sale.  
As pessoas tendem a comprar produtos em promoção.

**Tendency (noun)**

People have a tendency to buy products on sale.  
As pessoas têm uma tendência a comprar produtos em promoção.

Notice that, in this case, besides adding the verb **have** to say **have a tendency**, you also need to make a change in the verb **tend** to turn it into a noun – it becomes **tendency**.

There are many cases in which we have to make alterations in the verb to form the noun. Here is another example:

**Improve (verb)**

Companies use big data to improve user experience.

As empresas usam megadados para melhorar a experiência do usuário.

**Improvement (noun)**

Thanks to big data, it's possible to achieve an improvement in user experience.

Graças aos megadados, é possível atingir uma melhoria na experiência do usuário.

Note that we add the **suffix -MENT** to transform the **verb improve** into the **noun improvement**.

**Verbs** express actions, and **nouns** are names given to things, people, animals, and places.

And what about adjectives? As we saw in chapter 1, **adjectives describe or qualify things**. It is also possible to form adjectives from nouns.

Let's take the **verb improve**, for instance. The **noun** is **improvement**, and a possible derived **adjective** is **improved**. Watch how we use it in a sentence:

**Improved (adjective)**

The product shows an improved performance in user experience.

O produto mostra um desempenho melhorado em experiência do usuário.

In the previous example, the adjective **improved** is used to **describe** the performance outcome of the product.

Let's check out another example:

**Develop (verb)**

Data analysis helps companies develop market strategies.

A análise de megadados ajuda as empresas a desenvolver estratégias de mercado.

**Development (noun)**

The development of market strategies is one of the company's goals.

O desenvolvimento de estratégias de mercado é um dos objetivos da empresa.

**Developed (adjective)**

The company has a developed market strategy.

A empresa tem uma estratégia de mercado desenvolvida.

Note that to form the **noun development**, you have to add the **suffix -MENT** to the **verb develop**. The derived **adjective** will be **developed**.

As you can see, there are many cases of **nouns and adjectives derived from verbs**. Here is a list of some common ones that may emerge in a corporate environment:

| VERB                             | NOUN                                     | ADJECTIVE                           |
|----------------------------------|------------------------------------------|-------------------------------------|
| <b>to inform</b><br>informar     | <b>information</b><br>informação         | <b>informed</b><br>informado        |
| <b>to consider</b><br>considerar | <b>consideration</b><br>consideração     | <b>considerable</b><br>considerável |
| <b>to decide</b><br>decidir      | <b>decision</b><br>decisão               | <b>decided</b><br>decidido          |
| <b>to understand</b><br>entender | <b>understanding</b><br>entendimento     | <b>understood</b><br>entendido      |
| <b>to predict</b><br>prever      | <b>predictability</b><br>previsibilidade | <b>predictable</b><br>previsível    |

Now you know some common expressions with the words **cost**, **value**, and **price**, as well as some differences between **verbs**, **nouns**, and **adjectives**.

# Part 3.

# Vocabulary Activities

## A. Number the columns according to the translation of the words.

|                    |                        |                   |                   |
|--------------------|------------------------|-------------------|-------------------|
| ( 1 ) entendido    | ( 7 ) informado        | ( ) to improve    | ( ) information   |
| ( 2 ) melhorado    | ( 8 ) desenvolver      | ( ) to develop    | ( ) understanding |
| ( 3 ) informação   | ( 9 ) entendimento     | ( ) to inform     | ( ) improved      |
| ( 4 ) melhorar     | ( 10 ) informar        | ( ) to understand | ( ) developed     |
| ( 5 ) desenvolvido | ( 11 ) melhoria        | ( ) improvement   | ( ) informed      |
| ( 6 ) entender     | ( 12 ) desenvolvimento | ( ) development   | ( ) understood    |

## B. Fill in the blanks with the appropriate word or expression according to the translation.

a) Data analysis helps to define \_\_\_\_\_.

A análise de dados ajuda a definir **preços**.

b) Companies can compare \_\_\_\_\_ and the probability of profit.

Empresas podem comparar **custos** e a probabilidade de lucro.

c) Big data has a potential \_\_\_\_\_ to business.

Os megadados têm **valor** potencial para os negócios.

d) Mary has a great job, but \_\_\_\_\_. She doesn't have vacation breaks.

Mary tem um ótimo emprego, mas **com um custo**. Ela não tem períodos de férias.

e) It's possible to buy imported goods at the supermarket, but \_\_\_\_\_!

É possível comprar produtos importados no supermercado, mas isso **tem um preço**!

f) Mary \_\_\_\_\_ of not having vacation breaks.

Mary **paga o preço** por não ter períodos de férias.

### Activity B – Answers

- a. prices  
b. costs  
c. value  
d. at a cost  
e. at a price  
f. pays the price

### Activity A – Answers

1. understood / 2. improved / 3. information / 4. to improve /  
5. developed / 6. to understand / 7. informed / 8. to develop /  
9. understanding / 10. to inform / 11. improvement / 12. development

## Part 4.

# Grammar

In this part of the chapter, you will learn how to use the simple present of the verb to be and of other verbs. You will also learn the subject pronouns.

You already know that to form **affirmative** sentences with the verb **to be** in the **simple present**, we follow the structure **subject + verb to be + complement**. For example:

### SIMPLE PRESENT – VERB TO BE Affirmative Form

**Mary is a manager.**  
Mary é uma gerente.

Here, you have the **subject Mary** followed by the verb **to be** and the **complement**. Notice that **the subject is a proper noun**, and it refers to the third person singular, that's why the verb to be is conjugated as **is**.

You could replace the noun with a **subject pronoun**. Since Mary is a woman, and just one woman, you will use the **subject pronoun she**. So, you will have the sentence:

### SUBJECT PRONOUNS

**She is a manager.**  
Ela é uma gerente.

As you can see, we simply replace the noun with the subject pronoun. The rest of the sentence does not suffer any modifications.

Check out this other example:

### SUBJECT PRONOUNS

**Peter and Jack are co-workers.**  
Peter e Jack são colegas de trabalho.

**They are co-workers.**  
Eles são colegas de trabalho.

Here, we have the **proper nouns Peter and Jack**. To replace them with a **subject pronoun**, since Peter and Jack are two people, you will use **they**. Observe, once more, that nothing else changes in the sentence when we use the pronoun.

The **subject pronoun** replaces a noun when it is the **subject of the sentence** so as to **avoid repetitions** in the discourse. Therefore, it refers to a noun that is clear in the context. Observe the following example:

### SUBJECT PRONOUNS

Mary is a manager. She is from New York.  
Mary é uma gerente. Ela é de Nova York.

The **subject pronoun she** refers back to the noun **Mary** mentioned in the first sentence. Let's see another one:

### SUBJECT PRONOUNS

I have a new computer. It's great.  
Eu tenho um computador novo. Ele é ótimo.

It is clear that the **subject pronoun it** in the second sentence refers back to the **noun computer** in the first sentence.

However, there is one case in which the **subject pronoun it** will **not** refer back to a noun. It happens when the **subject pronoun it** is used to refer to a whole situation, for example. In this case, it is called **impersonal pronoun**. Have a look at these sentences:

### SUBJECT PRONOUN IT

It's a pleasure to work with you.  
É um prazer trabalhar com você.

It's possible to buy imported goods at the supermarket.  
É possível comprar produtos importados no supermercado.

In both previous sentences, the **subject pronoun it** is simply there to represent a **situation**: in the first sentence, it represents the situation of working with someone. In the second sentence, it refers to the situation of being possible to buy imported goods. Also, observe that the **verb to be** is contracted with **it** in both sentences.

The contraction between the subject pronouns and the verb to be quite is common, not only with the pronoun **it**. So, we can say: **I'm, you're, he's, she's, it's, we're, and they're**. For example:

### VERB TO BE & SUBJECT PRONOUNS

She is from New York.

She's from New York.

Ela é de Nova York.

However, **you cannot contract the verb with a proper noun**. So, you **cannot** say:

~~Mary's from New York.~~

Mary é de Nova York.

Now, let's check out the **negative form**. All we have to do to form the negative is add **not** after the verb **to be**:

### SIMPLE PRESENT – VERB TO BE Negative Form

She **is not** from New York.

Ela não é de Nova York.

In the **negative form**, it is possible to **contract** the verb either with the subject, or with the particle **not**. Observe:

### SIMPLE PRESENT – VERB TO BE Negative Form

She **isn't** from New York.

She's **not** from New York.

Ela não é de Nova York.

You can use these two kinds of contractions – the **pronoun** with the verb **to be** or the particle **not** with the verb **to be** – with all subject pronouns, except for one. When the subject is **I**, we can either say **I am not**, with no contractions, or say **I'm not**, contracting the subject pronoun with the verb to be.

The option of contracting the conjugation **am** with the particle **not** actually exists – it is **ain't**. However, **this is not standard English**, so it is not considered correct by many people. Even though you may see or hear it in colloquial conversations, lyrics, and songs, it is extremely informal, and **you should definitely avoid it in formal situations**.

Still on rules of contractions, do not contract the verb with a noun in the negative form either. So, **do not** say:

**Mary's not from New York.**

Mary não é de Nova York.

Let's have a look at another example:

#### SIMPLE PRESENT – VERB TO BE Negative Form

**Peter and Jack are not co-workers.**

**Peter and Jack aren't co-workers.**

Peter e Jack não são colegas de trabalho.

**They aren't co-workers.**

**They're not co-workers.**

Eles não são colegas de trabalho.

It is worth mentioning that the negative **non-contracted form** sounds **more emphatic** than the contracted ones.

For the **interrogative form of the verb to be**, all you have to do is **invert the order** of the **subject** and the **verb to be** in the sentence. That means you are going to start the sentence with the verb. Check it out:

### SIMPLE PRESENT – VERB TO BE Interrogative Form

Is she from New York?

Ela é de Nova York?

Are they co-workers?

Eles são colegas de trabalho?

So, as you can see, there is little variation in the structure of sentences with the **verb to be in the simple present**. In short, we have the following **sentence structures**:

### SIMPLE PRESENT – VERB TO BE Sentence Structures

#### Affirmative Form:

**SUBJECT + VERB TO BE + COMPLEMENT**

sujeito + verbo to be + complemento

#### Negative Form:

**SUBJECT + VERB TO BE + NOT + COMPLEMENT**

sujeito + verbo to be + not + complemento

#### Interrogative Form:

**VERB TO BE + SUBJECT + COMPLEMENT**

verbo to be + sujeito + complemento

In chapter 1, we saw that, even though the **sentence structure of the affirmative** is the same, the **conjugation** of the **other verbs** in the **simple present** is **different** from the conjugation of the verb TO BE. Let's start by reviewing that.

Take a look at the following example:

### SIMPLE PRESENT – OTHER VERBS

Consumers buy products on sale.

Os consumidores compram produtos em promoção.

The subject is **consumers**, followed by the verb in the **base form**, that is, the infinitive without the particle **to**. Notice that the word **consumers** corresponds to the third person plural.

Now, if we have a subject that corresponds to the **third person singular** – **he**, **she**, or **it** –, you will need to make a small alteration to the verb. Look:

### SIMPLE PRESENT – OTHER VERBS

**Data analysis helps define prices.**  
A análise de dados ajuda a definir preços.

The subject of the sentence is **data analysis**. It corresponds to the **pronoun IT**, the **third person singular**. That's why you will need to **add -S to the verb**. The rest of the sentence is the complement.

Depending on the ending of the verb in its base form, the alteration may be a bit bigger than just adding the **-S**. For example, the verb **watch** ends in **-CH**, so we need to **add -ES**, and it will become **watches**. The verb **try**, on the other hand, **loses the Y** and **gets an -IES**, becoming **tries**.

Now, there is a particular verb that does not follow these rules, even though it changes quite a lot. Pay attention to this:

### SIMPLE PRESENT – OTHER VERBS

**Big data has a potential value to business.**  
~~**Big data haves a potential value to business.**~~  
Megadados têm valor potencial para os negócios.

As you can see, the verb **have** becomes **has** in the third person singular in the simple present. The conjugation **haves** does not exist.

In order to form the **negative and the interrogative forms** of the other verbs in the simple present, we are going to need an auxiliary verb. And the **auxiliary verb for the simple present** is **do**.

With that in mind, take a look at the following structures:

### SIMPLE PRESENT – OTHER VERBS

#### Sentence Structures

**Affirmative Form:**  
**SUBJECT + MAIN VERB + COMPLEMENT**  
sujeito + verbo principal + complemento

**Negative Form:****SUBJECT + AUXILIARY VERB DO + NOT + MAIN VERB + COMPLEMENT**

sujeito + verbo auxiliar do + not + verbo principal + complemento

**Interrogative Form:****AUXILIARY VERB DO + SUBJECT + MAIN VERB + COMPLEMENT**

verbo auxiliar do + sujeito + verbo principal + complemento

These are the general structures to form sentences in the **simple present for all verbs, except for the verb to be.**

For example:

**SIMPLE PRESENT – OTHER VERBS****Affirmative Form:**Consumers buy products on sale.

Os consumidores compram produtos na promoção.

**Negative Form:**Consumers do not buy / don't buy products on sale.

Os consumidores não compram produtos na promoção.

**Interrogative Form:**Do consumers buy products on sale?

Os consumidores compram produtos em promoção?

Observe that, in the negative form, it is possible to contract **do** with **not** – it becomes **don't**.

As you can conclude from the previous examples, the conjugation of the main verb is the same as its **base form**.

The only exception regarding the **main verb** is in the **affirmative** form for subjects **in the third person singular**: as a general rule, we **add -S** to the main verb.

When it comes to the **auxiliary verb do** in both negative and interrogative forms, it will remain the same for **all subjects, except for the third person singular**.

In such cases, it will become **does**.

Observe the following examples with the subjects in **the third person singular**:

### SIMPLE PRESENT – OTHER VERBS

#### Affirmative Form:

**Big data analysis helps define prices.**

A análise de megadados ajuda a definir preços.

#### Negative Form:

**Big data analysis does not help / doesn't help define prices.**

A análise de megadados não ajuda a definir preços.

#### Interrogative Form:

**Does big data analysis help define prices?**

A análise de megadados ajuda a definir preços?

Observe that, in the negative form, the **auxiliary verb** is conjugated as **does**, and it can be contracted with the particle **not** – it becomes **doesn't**. Note, too, that the main verb will remain in its **base form** for both **negative and interrogative sentences**. It will be conjugated just in the **affirmative form**, in which **help** becomes **helps**.

**In this chapter, you reviewed the affirmative form of the simple present and learned how to use the negative and interrogative forms of the verb to be and other verbs. If you want to learn more about these topics, you can refer to the Grammar Guide section at the end of your book.**

# The Role of Social Media

# Part 1.

# Video Script

In this chapter, you will learn how to talk about your preferences, likes and dislikes on your social media profiles. You will also see some important vocabulary and grammar topics to help you communicate better in English.

Now look at the script of **The Role Of Social Media**.

## THE ROLE OF SOCIAL MEDIA

### [Casey]

So far, we've seen a general concept of big data and how it affects businesses in practical terms.

At this point, you might be asking yourself: "Where do companies get that amount of information about people's choices and preferences?" The main answer to that question is social media.

If someone had access to all of your social media accounts, what conclusions would they be able to draw about you?

Maybe they would get to know your family through your pics, or find out where you went during your last vacation. Or maybe they would see you've been willing to buy a bedside table based on the ads that appear on your Facebook page.

But wait... How does Facebook know you want to get that table if you've only Googled about it? Did these platforms exchange any info about your wishes?

Or maybe, to make things even stranger, you've just TALKED ABOUT it to a friend, and the minute you go online, these ads start filling up your smartphone screen? How is that even possible? I'll tell you how: due to all the big data footprints we leave behind just by being online.

**[Keshav Malani]**

Social media... so, every time you make a post, every time you like something, the fact that you're even on there, and you're scrolling through your newsfeed, that's all generating bits of data. And then, behind there, if you're seeing an ad, did you react to that ad? Did you pause on the ad? All of that is data. Are you using your phone? Which apps are you using? That's generating data. When you're walking around, your phone is picking up what location you're going to.

So, all those things are kind of instances of data, but then, beyond that, you have: "Hey, I posted a picture of myself." Those are memories that you're putting out there. You can scan your old photos as well. So, these are all your past memories, as well as your kind of experiences that you're having now. All of that data is getting put into algorithms and big data machines, essentially, of figuring out who you are as a person, what you did, and using that to predict what you will do. And what you want. What are your desires and your needs? And to, then, be able to cater advertising accordingly, and products accordingly to that.

People, you and I, are putting all this data out there, and companies make billions from it. And some of them are giving us something in return. So we use Facebook for free or Gmail for free. So, we're getting that service in return for our data. But behind the scenes, you have analytics companies and data brokers, who are also monetizing this data for billions still.

What are they picking up that is worth that much? It's the signals about us. They know what we're going to do and why we're going to do it better than anybody else.

**[Casey]**

Can you see how big a role social media plays when it comes to generating big data?

In a nutshell, all our interactions are generating data on our habits, our likes, and our dislikes. That helps companies define what kind of products we are likely to buy. Advertising costs money, right? That's why we're highly likely to come across ads that are really going to interest us. That way, companies can boost their chances of soft-selling instead of advertising things at random.

## O PAPEL DAS MÍDIAS SOCIAIS

### [Casey]

Até agora vimos um conceito geral de megadados, e como eles afetam as empresas em termos práticos.

Neste ponto, você pode estar se perguntando: “Onde as empresas conseguem essa quantidade de informação sobre as escolhas e as preferências das pessoas?” A principal resposta para essa pergunta é: nas redes sociais.

Se alguém tivesse acesso a todas as suas contas de redes sociais, a quais conclusões seria possível chegar sobre você?

Talvez daria para conhecer sua família por meio das suas fotos, ou descobrir aonde você foi nas suas últimas férias. Ou daria para ver que você tem sentido vontade de comprar uma mesa de cabeceira, com base nos anúncios da sua página do Facebook.

Mas espere... Como o Facebook sabe que você quer comprar aquela mesa se você só deu uma pesquisada no Google? Essas plataformas trocaram informações sobre seus desejos?

Ou talvez, para deixar as coisas ainda mais estranhas, você acabou de FALAR sobre isso com um amigo e, assim que você fica online, esses anúncios começam a encher a tela do seu telefone? Como isso é possível? Vou te dizer como: devido ao rastro de pegadas de megadados que deixamos simplesmente por estarmos online.

### [Keshav Malani]

Redes sociais... toda vez que você cria um post, toda vez que você dá um *like* em alguma coisa, o simples fato de você estar lá, olhando o seu *feed*, tudo isso está gerando bits de dados. E então, lá atrás, se você está vendo um anúncio, você reagiu a esse anúncio? Você parou no anúncio? Tudo isso são dados. Você está usando o seu telefone? Quais aplicativos você está usando? Isso gera dados. Quando você está andando, seu telefone está registrando para qual lugar você está indo.

Todas essas coisas são exemplos de dados, mas, além disso, você tem algo tipo: “Eu postei uma foto de mim mesmo”. Você está compartilhando memórias. Você também pode digitalizar fotos antigas. São suas lembranças e as experiências que você está tendo agora.

Todos esses dados estão sendo inseridos em motores de algoritmos e megadados, essencialmente descobrindo quem você é como pessoa, o que você fez, e isso é usado para prever o que você vai fazer. E o que você quer. Quais são seus desejos e suas necessidades? E para, então, poder mostrar anúncios e produtos de acordo com isso.

As pessoas – você e eu – estão disponibilizando todos esses dados, e as empresas lucram bilhões com isso. Algumas delas estão nos dando algo em troca. Nós usamos o Facebook de graça, ou o Gmail de graça. Estamos recebendo esse serviço em troca dos nossos dados. Mas, nos bastidores, existem empresas analíticas e data brokers que também estão monetizando esses dados por bilhões.

O que eles estão captando que vale tanto? Os sinais sobre nós. Eles sabem, melhor do que qualquer pessoa, o que vamos fazer e o motivo pelo qual o fazemos.

**[Casey]**

Você percebe o tamanho do papel das redes sociais quando se trata de gerar megadados?

Em suma, todas as nossas interações geram dados sobre nossos hábitos, nossos gostos e desgostos. Isso ajuda as empresas a definir o tipo de produto que estamos propensos a comprar. Propaganda custa dinheiro, certo? Por isso, é muito provável que encontremos anúncios que vão realmente nos interessar. Dessa forma, as empresas podem intensificar suas chances de realizar vendas orgânicas em vez de anunciar seus produtos aleatoriamente.

## Part 2.

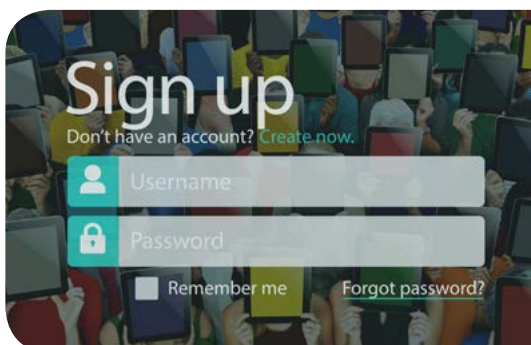

# Vocabulary

You probably know how big a role **social media** plays when it comes to generating big data. Just by having an account and interacting in any of these **platforms**, you are already generating a bunch of data. Everyone is connected, one way or the other. No wonder these social media platforms are also called **networks**.

And let's not forget that it all impacts businesses around the world. That's why it is so important to know how to use the appropriate vocabulary related to this area in order to make the most of it in the corporate world.

First of all, to get in a social media platform, you need to register to get an **account**, so you will probably find these instructions on the main page:

### INSTRUCTIONS TO CREATE A SOCIAL MEDIA ACCOUNT

**Sign up.**  
Inscreva-se.

**Register to create an account.**  
Cadastre-se para criar uma conta.

When you sign up to join a social media platform, you will need to fill out a form with your data. You will usually provide:

#### PERSONAL DATA

**name** nome

**date of birth** data de nascimento

**email address** endereço de e-mail

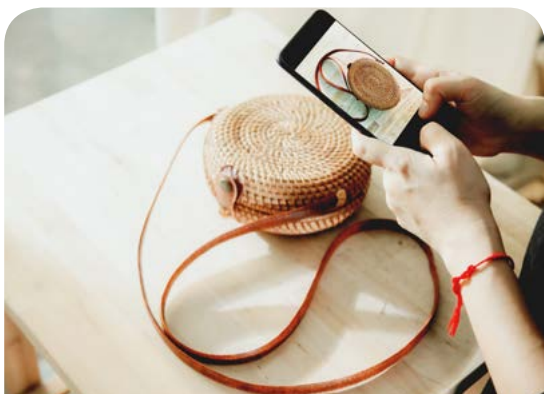

**location** localização

Once you have input your personal information, you will be asked to create a **login** and a **password**. That is all you need to create a **profile**.

In your profile, you have the **newsfeed page**, which is where most of the action happens. On social media, you will feed your profiles with:

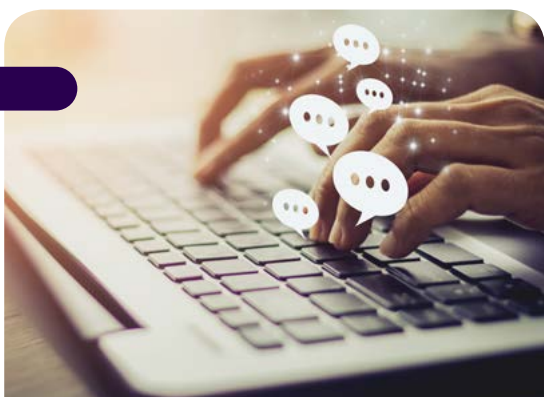

### NEWSFEED CONTENT

**pics / pictures / photos**  
fotos

**selfies**  
autorretratos

**comments**  
comentários

**videos**  
vídeos

You can say that, when you put something new in your profile, you are creating a new **post**. But you could also say, for example, that you like **to post** pictures on social media. So, **post** can be either a **noun** or a **verb**, just like many other words in English.

Here is a list of some of the actions related to social media:

### SOCIAL MEDIA – COMMON VERBS

**to take a photo / a selfie**

tirar uma foto / uma selfie

**to record a video**

gravar um vídeo

**to make a post**

fazer um post

**to scroll through the newsfeed**

rolar a página de feed

**to post a picture / a comment / a video**

postar uma foto / um comentário / um vídeo

Now, to talk about your **reactions** on social media and **interactions** with other users, you can say, for example:

### SOCIAL MEDIA – REACTIONS AND INTERACTIONS

**to make a comment / to comment on a post**

fazer um comentário / comentar em um post

**to like a post**

curtir um post

**to heart a post**

curtir um post com um coração

**to heart a webpage**

curtir uma página com um coração

**to share a post**

compartilhar um post

There is a difference between the verbs **to share**, **to divide** and **to split**. Depending on the context, they may be translated the same, but they **do not** carry the same meaning. Check out the examples:

### SHARE, DIVIDE, AND SPLIT

#### share

People share their opinions at a meeting.

As pessoas compartilham suas opiniões numa reunião.

#### divide

The CEO's decision is dividing opinions.

A decisão do CEO está dividindo opiniões.

#### split

This situation is splitting the team.

Essa situação está separando / desunindo a equipe.

Divided opinions are quite common on social media. Each social media profile will reflect its owner's perspective. After all, that is where people express their **likes**, **dislikes**, and **preferences**.

Here is how you can express your likes:

### LIKES

#### Like + Noun

I like pictures.

Eu gosto de fotos.

#### Love + Noun

I love selfies.

Eu amo *selfies*.

#### Enjoy + Noun

I enjoy tutorials.

Eu curto tutoriais.

You can also use **verbs** instead of nouns as complements. But pay attention: when you have a verb followed by another verb, the second one will be either in the **infinitive form**, that is preceded by the particle **to**, or in the **-ING form**. Check it out:

### LIKES

#### Like + To + Verb

I like to post pictures on social media.

Eu gosto de postar fotos nas redes sociais.

#### Love + To + Verb

I love to take selfies.

Eu amo tirar selfies.

#### Enjoy + Verb -ING

I enjoy watching tutorials.

Eu curto assistir a tutoriais.

On the other hand, to talk about your **dislikes**, that is, things you **don't like**, there is the verb **to hate**. For example:

### DISLIKES

#### Hate + Noun

I hate broccoli.

Eu detesto / odeio brócolis.

#### Hate + To + Verb

I hate to eat broccoli.

Eu detesto / odeio comer brócolis.

The verb **to hate** is a **really strong, aggressive term** to talk about something you dislike, so you really need to **be careful** when using it, especially if you are referring to other people. In the context of social media, the term **hate speech** refers to any kind of communication that promotes hate towards people or groups of people, especially minorities.

To talk about dislikes, it is better to use the verbs **like** and **enjoy in the negative form**. Such as:

### DISLIKES

I **don't like** to come across a lot of ads on my news feed.

Eu não gosto de me deparar com muitas propagandas no meu feed.

I **don't enjoy** pop-ups.

Eu não curto pop-ups.

And, finally, when you want to talk about your **preferences** you will use the verbs **to prefer** or the expression **would rather**. Check it out:

### PREFERENCES

#### Prefer + To + Verb

Some people **prefer to look** for jobs in job-search apps.

Algumas pessoas preferem procurar trabalho em aplicativos de emprego.

#### Prefer + Noun

I **prefer** coffee **to** tea.

Eu prefiro café a chá.

#### Would Rather + Verb

They **would rather use** an app to find jobs.

Eles preferem usar um aplicativo para encontrar trabalho.

#### Would Rather + Verb + Than

I **would rather have** coffee **than** tea.

Eu prefiro tomar café a chá.

Sentences with **to prefer** are considered **more formal**. The expression **would rather** is more commonly used to talk about preferences. Note that when you use **would rather + verb**, the particle **to** cannot be used before the verb.

Now you know some vocabulary related to social media, the difference in use among the verbs **to share**, **to divide**, and **to split**, as well as how to talk about your **likes**, **dislikes**, and **preferences**.

# Part 3.

# Vocabulary Activities

## A. Number the columns according to the translation of the words.

- |                                        |                                   |                                   |                                     |
|----------------------------------------|-----------------------------------|-----------------------------------|-------------------------------------|
| ( 1 ) inscreva-se                      | ( 7 ) autorretratos               | ( ) to share a post               | ( ) to record a video               |
| ( 2 ) rolar a página de feed           | ( 8 ) fotos                       | ( ) pics / pictures / photos      | ( ) to make a post                  |
| ( 3 ) fazer um comentário              | ( 9 ) tirar uma foto / uma selfie | ( ) to take a photo / a selfie    | ( ) to make a comment               |
| ( 4 ) cadastre-se para criar uma conta | ( 10 ) gravar um vídeo            | ( ) sign up                       | ( ) selfies                         |
| ( 5 ) comentar em um post              | ( 11 ) compartilhar um post       | ( ) to like a post                | ( ) to comment on a post            |
| ( 6 ) fazer um post                    | ( 12 ) curtir um post             | ( ) register to create an account | ( ) to scroll through the news feed |

## B. Fill in the blanks with the appropriate words according to the translation.

- a) I \_\_\_\_\_ broccoli.  
Eu **detesto comer** brócolis.
- b) I \_\_\_\_\_ pop-ups.  
Eu **não curto** pop-ups.
- c) I \_\_\_\_\_ selfies.  
Eu **amo tirar** selfies.
- d) I \_\_\_\_\_ to come across a lot of ads on my news feed.  
Eu **não gosto** de me deparar com muitas propagandas no meu feed.
- e) I \_\_\_\_\_ tutorials.  
Eu **curto assistir** a tutoriais.
- f) I \_\_\_\_\_ pictures on social media.  
Eu **gosto de postar** fotos na rede social.

### Activity A – Answers

1. sign up
2. to scroll through the news feed
3. to make a comment
4. register to create an account

### Activity B – Answers

- a. hate to eat / hate eating
- b. don't enjoy / don't like
- c. love to take / love taking
- d. don't like
- e. enjoy watching / like watching / like to watch
- f. like to post / like posting

9. to take a photo / a selfie
10. to record a video
11. to share a post
12. to like a post

5. to comment on a post
6. to make a post
7. selfies
8. pics / pictures / photos

## Part 4.

# Grammar

In the vocabulary part of this chapter, you have learned **some verbs** related to social media. We also saw verbs that can be used to talk about **likes, dislikes, and preferences**. Just to mention a few:

### INFINITIVE FORM

**to post**  
postar

**to like**  
gostar

**to love**  
amar

**to comment**  
comentar

**to share**  
compartilhar

All the previous verbs are in the **infinitive form**. One of the **uses** of the infinitive form is to work as a **complement to another verb**. Look at the following examples:

### VERB + INFINITIVE FORM

**I hate to eat broccoli.**

Eu detesto comer brócolis.

**I want to take a selfie.**

Eu quero tirar uma selfie.

But the infinitive can also be used without the particle **to**. And, in that case, we say the verb is in the **bare infinitive** or in the **base form**. One of its uses is to form the **imperative**. You will use the imperative **to give instructions, orders, and advice**. Check out these examples:

## IMPERATIVE FORM – AFFIRMATIVE

**Post a picture.**  
Poste uma foto.

**Eat broccoli.**  
Coma brócolis.

**Sign up.**  
Inscreva-se.

Sentences in the **imperative** are formed with the verb in the **base form** followed or not by a complement. Observe that these sentences **do not have explicit subjects**. In fact, the **subject of the imperative form** is always **you**. However, most of the times, it will be omitted in the sentence, since it is pretty clear that you are talking directly to the person who will be performing the action.

But you have to **be careful not to mistake** the **imperative** with the **simple present**. Sometimes, verbs in the simple present will be conjugated just like their **base form**, but the subject will not be omitted in the sentence. Let's see that by analyzing some examples:

### IMPERATIVE FORM – AFFIRMATIVE

Watch videos online.  
Assista a vídeos on-line.

### SIMPLE PRESENT – AFFIRMATIVE

People watch videos online.  
As pessoas assistem a vídeos on-line.

Note that in the previous example in the **simple present**, the subject is **people**, and it starts the sentence. **People** is in the plural, so it is equivalent to the **subject pronoun they**. Right after that, we have the verb **watch** conjugated according to the subject. Notice that the conjugation will be just like the **base form** of the verb. After the verb, there is a complement.

To make the **negative form** of the imperative, you just have to use **don't before the verb**. For example:

### IMPERATIVE FORM – NEGATIVE

Don't eat broccoli.

Não coma brócolis.

Don't sign up.

Não se inscreva.

Let's compare the imperative in the negative form with the simple present in the negative form:

### IMPERATIVE FORM – NEGATIVE

Don't watch videos online.

Não assista a vídeos on-line.

### SIMPLE PRESENT – NEGATIVE

People don't watch videos online.

As pessoas não assistem a vídeos on-line.

Even though the verb in the **simple present** looks just like its **base form**, and even though the auxiliary verb **don't** is the same, there is a clear difference when we compare it to the imperative: **there is a subject starting the sentence**.

There is no **interrogative form** for the imperative.

The **IMPERATIVE** is used in **contexts that are completely different from the contexts in which the SIMPLE PRESENT** is used. Take a look at the **uses of the imperative** and the **simple present**:

### USES

#### IMPERATIVE

**to give instructions**

dar instruções

**to give orders**

dar ordens

**to give advice**

dar conselhos

#### SIMPLE PRESENT

**to talk about habits**

falar de hábitos

**to talk about routine**

falar de rotina

**to talk about facts**

falar de fatos

There is yet another verb form that you need to know how to differentiate from the simple present: **the present continuous**. In terms of **structure**, the **differences are huge**. Check out this example:

### PRESENT CONTINUOUS

The situation **is splitting** the team.  
A situação está separando a equipe.

Note that, in the previous example, we have the **subject the situation** followed by the **verb to be** conjugated according to the subject. Since we are talking about a situation, the equivalent **subject pronoun** is **it**; that's why the conjugation is **is**. Then, we have the **verb to split** in the **-ING form**. The rest of the sentence is the **complement**.

It is important to notice that the **present continuous** is formed with **two verbs**: one of them is the **verb to be**, which is going to work as an **auxiliary verb**, and the **main verb**, which is responsible for indicating the main idea of the sentence. An extremely important detail is that the main verb is going to be in the **-ING form**.

In order to make the **affirmative**, **negative**, and **interrogative forms**, you need to **follow the rules of the verb to be**. Here is the general structure of these forms:

### PRESENT CONTINUOUS

#### Affirmative Form

**SUBJECT + VERB TO BE + MAIN VERB IN THE -ING FORM + COMPLEMENT**  
sujeito + verbo to be + verbo principal na forma -ING + complemento

She's using the phone.  
Ela está usando o telefone.

### PRESENT CONTINUOUS

#### Negative Form

**SUBJECT + VERB TO BE + NOT + MAIN VERB IN THE -ING FORM + COMPLEMENT**  
sujeito + verbo to be + not + verbo principal na forma -ING + complemento

She isn't using the phone.  
Ela não está usando o telefone.

**PRESENT CONTINUOUS****Interrogative Form****VERB TO BE + SUBJECT + MAIN VERB IN THE -ING FORM + COMPLEMENT**

verbo to be + sujeito + verbo principal na forma -ING + complemento

**Is she using the phone?**

Ela está usando o telefone?

Note that the **sentence structure** of the simple present is completely different from that of the present continuous.

You will use the **simple present** to talk about **habits, routine, and facts**. And we use the **present continuous** to talk about **actions in progress in the present**. That is, the action is happening at the moment of speaking. Let's compare some examples:

**SIMPLE PRESENT****John takes good pictures.**

John tira boas fotos.

**Tina shares her opinions at every meeting.**

Tina compartilha suas opiniões em todas as reuniões.

**PRESENT CONTINUOUS****John is taking pictures.**

John está tirando fotos.

**Tina is sharing a post right now.**

Tina está compartilhando um post agora.

Remember that the infinitive and the **-ING form** can be used as **complements** for other verbs. In such cases, the use of the **-ING form** does not mean the sentence is in the present continuous. Take a look:

**VERB + -ING FORM****I enjoy watching tutorials.**

Eu curto assistir a tutoriais.

In the example, the verb **to enjoy** is followed by another verb – **to watch**. Notice that the sentence is in the **simple present**: the subject is **I**, and the verb conjugation is just like its **base form**. The complement is the verb **to watch in the -ING form**, but not because it is an action in progress, but because **the verb enjoy** can only be followed by **nouns** or **verbs in the -ING form**.

The same rule applies for this next example.

### VERB + -ING FORM

**I avoid posting fake news.**

Eu evito postar fake news.

In this case, the sentence is in the simple present. The verb **to avoid** is followed either by **nouns** or **verbs in the -ING form**. Once again, that does not mean it refers to an action in progress. It is just being used as a complement to the main verb.

In this chapter, you have learned about the **infinitive** and the **-ING forms of the verbs**, the **imperative** and the **present continuous**. You have also learned how to tell these verb forms apart. If you want to learn more about these topics, you can refer to the Grammar Guide section at the end of your book.

### GRAMMAR GUIDE

|                              |          |
|------------------------------|----------|
| Imperative                   | Page 149 |
| Infinitive Form              | Page 152 |
| Present Continuous           | Page 179 |

| Verbs + Infinitive or -ING   | Page 225 |

# Part 5.

# Grammar Activities

**A. Write PC for present continuous, I for the imperative, and SP for simple present. We use this verb form:**

- |                                            |                                               |
|--------------------------------------------|-----------------------------------------------|
| a) ( ) to give orders                      | e) ( ) to talk about habits                   |
| b) ( ) to talk about actions happening now | f) ( ) to give instructions                   |
| c) ( ) to talk about facts                 | g) ( ) to talk about routines                 |
| d) ( ) to give advice                      | h) ( ) for actions in progress in the present |

**B. Fill in the blanks with the correct form of the missing verbs.**

- a) John \_\_\_\_\_ good pictures.

John **tira** boas fotos.

- b) \_\_\_\_\_ a picture.

**Poste** uma foto.

- c) Tina \_\_\_\_\_ a post right now.

Tina **está compartilhando** um post agora.

- d) John \_\_\_\_\_ pictures.

John **está tirando** fotos.

- e) Tina \_\_\_\_\_ her opinions at every meeting.

Tina **compartilha** suas opiniões em todas as reuniões.

- f) I \_\_\_\_\_ a selfie.

Eu **quero tirar** uma selfie.

## Activity B – Answers

- a. takes  
b. Post  
c. is sharing  
d. is taking  
e. shares  
f. want to take

## Activity A – Answers

- a. I – Imperative  
b. PC – Present Continuous  
c. SP – Simple Present  
d. I – Imperative  
e. SP – Simple Present  
f. I – Imperative  
g. SP – Simple Present  
h. PC – Present Continuous

4

# Social Media Impacts

# Part 1.

# Video Script

Social media has a great impact on our lives since it influences our behavior as consumers. When we interact on social network platforms, we should be aware of what we gain, but also of what we may end up losing. Therefore, in this chapter, you will learn how to talk about gains and losses.

Now look at the script of **Social Media Impacts**.

## SOCIAL MEDIA IMPACTS

### [Casey]

In the previous episode, we learned that thanks to big data, companies get to know us better than ourselves. They use every step we take to predict our potential as consumers.

When we realize that, it's impossible not to think of the practical impacts of giving away so much information.

What do we gain from it? And what do we lose?

### [Keshav]

Given the amount that we are putting out there about us now, compared to ever before, we are giving up a lot of control in the process. But we give up that control to get something in return. So, we get that feeling of people seeing us, connecting with more people out there.

You go work out, you put a selfie up there, you go to a certain cafe, you're like, "Oh, I love this cafe, that's great," and putting out there. You take a picture of food that you're having—that is all kicking up, and companies are kind of tapping into this as well.

You gamify the experience so to get people to do more of it. So, social media is naturally gamified, where you get people liking your picture, or hearting it, or whatever the reactions that you get on that, it makes you feel good.

**[Casey]**

It seems clear that taking part in social media brings us a sense of belonging and connection. We choose to share our experiences and memories online, even though they may have market value.

**[Keshav]**

They're actually already a commodity, that's out there, that people are using to understand you. So, and that sounds a little bit bad, but it's not all bad, right? The choices that are available to us out there are incredibly greater than what we had before. And to be able to find the perfect choice for you is not easy anymore. And advertising is a way to kind of show you things that you may not have expected to see.

**[Casey]**

So, the least we can learn from Malani's insights is that with data comes options. The world opens up to us, and we gain access to things we could never imagine before. Let's suppose you're online doing your stuff, and an ad pops up...It shows you a vacation destination that never crossed your mind! And to make things better, it meets your regular vacation budget! How cool is that? Maybe, if it weren't for that ad, you would have never thought of that place as a possibility! I'd say having options is hardly ever a bad thing...

Companies may use the data footprints we leave behind to predict or modify our behavior, but then again, we provide them with this information willingly just by being part of social media. And we do that because we get something back. It's a kind of trade we make, don't you think?

**IMPACTOS DAS MÍDIAS SOCIAIS****[Casey]**

No episódio anterior, aprendemos que, graças aos megadados, as empresas nos conhecem mais do que conhecemos a nós mesmos. Cada passo que damos é usado para prever nosso potencial como consumidores.

Quando entendemos isso, é impossível não pensar nos impactos práticos da disponibilização de tanta informação.

O que ganhamos com isso? E o que perdemos?

**[Keshav]**

Levando em consideração que nunca compartilhamos tanto a nosso respeito quanto agora, abrimos mão de muito controle nesse processo. Mas abrimos mão desse controle para conseguir algo em troca. Conseguimos aquela sensação de sermos visto pelos outros, de termos uma conexão com mais pessoas.

Você vai malhar, compartilha uma *selfie*, vai para um café, e diz: “Oh, eu amo esse café, que legal”, e compartilha. Você tira uma foto de um prato que você está comendo – tudo isso está crescendo muito, e as empresas estão captando isso.

A experiência é gamificada para levar as pessoas a fazerem isso mais vezes. As redes sociais são naturalmente gamificadas; um “like” ou “amei” nas suas fotos, ou qualquer outra reação que você receba, faz com que você se sinta bem.

**[Casey]**

É nítido que participar das redes sociais nos dá uma sensação de pertencimento e conexão. Nós escolhemos compartilhar nossas experiências e nossas lembranças na internet, mesmo que elas tenham um valor de mercado.

**[Keshav]**

Nossas experiências e memórias são uma mercadoria que está disponível, que as pessoas usam para tentar nos entender. Então, e isso soa um pouco mal, mas não completamente, certo? As escolhas que estão disponíveis para nós nunca foram tão incríveis. Não é mais tão fácil encontrar a escolha perfeita para você. As propagandas são uma maneira de mostrar coisas que você não esperava ver.

**[Casey]**

O mínimo que podemos tirar dos insights do Malani é: megadados trazem opções. O mundo se abre para nós, e temos acesso a coisas que nunca imaginamos antes. Vamos supor que você esteja online, navegando, e um anúncio aparece... Ele te mostra um destino de férias que você nunca havia imaginado! E, para melhorar as coisas, ele se encaixa no seu orçamento! Que legal, não é? Eu diria que ter opções nunca é ruim...

Empresas podem usar nossos rastros de megadados para prever ou modificar nosso comportamento, mas vale lembrar: nós fornecemos nossas informações voluntariamente ao usar as redes sociais. E nós fazemos isso porque recebemos algo em retorno. É uma troca, não acha?

## Part 2.

# Vocabulary

You have seen that, thanks to the **big data** generated by our interactions on **social media**, we end up being offered a bunch of things that, sometimes, would not even cross our minds. Even though we might lose a bit of control over the information we share, the upside is that we gain a variety of options. In fact, if you think about it, every choice you make comes with **gains** and **losses**.

There are many verbs that we can use to refer to gains, and they will be applied in different contexts. For example, when it comes to sports, we can say:

**My team wins every game.**

Meu time ganha todos os jogos.

We may also use the verb win to refer to prizes, such as the lottery, whose prize is usually a lot of money:

**Few people win the lottery.**

Poucas pessoas ganham na loteria.

In terms of politics, the verb win also applies:

**Who is winning the presidential election?**

Quem está ganhando a eleição presidencial?

And, of course, in the corporate environment too:

**The CEO hopes to win financial backing from an investment firm.**

O CEO espera ganhar/conseguir apoio financeiro de uma firma de investimento.

But, if you remember chapter 1, you **cannot use the verb to win** to talk about the **money** you receive in exchange **for your work**. Instead, you would use **to make** or **to earn**. For example:

Jessica makes forty thousand a year as a teacher.

Jessica earns forty thousand a year as a teacher.

Jessica ganha quarenta mil por ano como professora.

When it comes to **profit**, it is just the same. Observe:

The company makes a profit of a hundred million a year.

The company earns a hundred million every year.

A empresa tem um lucro de cem milhões por ano.

The verb **to gain** can also be used to refer to gains, as in the **benefits we can get from something**. Take a look:

What do we gain from it?

O que ganhamos com isso?

The verb **to gain** can yet be collocated with the noun **time**, as in:

Mary wants to gain time until her boss arrives. So, she's stalling to start the meeting.

Mary quer ganhar tempo até o seu chefe chegar. Então, ela está enrolando para começar a reunião.

So far, you have seen lots of **verbs** that can be used to talk about **gains**. The word **gain** can also be a **noun**. In the business world, when you talk about **gains**, it is almost automatic to think about **profit**, which can also be a **noun**. But you can choose to use a **synonym** and say:

The company's earnings increase 2% every trimester.

Os lucros da empresa aumentam 2% a cada trimestre.

The director is giving up on the deal because it brings no gain to the company.

O diretor está desistindo do acordo porque ele não traz lucro/ganho para a companhia.

Another very common word used in the financial world is **interests**. It means the extra money you need to pay when you borrow money at a bank or when you buy something in installments. For instance:

**It's possible to pay in installments, but the interests are too high.**  
É possível pagar em prestações, mas os juros são altos demais.

**High interests** can be a source of **profit** for the company, but it is quite a **loss** for the consumer.

To talk about losses, we can use the expression **to make a loss**, which is the opposite of **to make a profit**. Observe:

**The company is making a loss of 8% this semester.**  
A empresa está tendo uma perda ou um prejuízo de 8% neste semestre.

The expression to run at a loss means to operate without making a profit. For example:

**Two plants are running at a loss.**  
Duas fábricas estão operando com prejuízo.

Every loss implies losing something. So, **to lose** is the verb related to **losses**. But just like the verb **to win**, it can have **different meanings in different contexts**. And just as you have various verbs to talk about **gains**, there are also various **verbs** to refer to **different kinds of losses**.

Let's start with the financial context, since that is the topic of this module. Take a look:

**The company is losing money with those plants.**  
A empresa está perdendo dinheiro com aquelas fábricas.

**To lose money** means to spend more money than you make.

Another context in which we can use the verb to lose is in sports and competitions. For example:

**The blue car is losing the race.**  
O carro azul está perdendo a corrida.

To lose can also refer to not knowing where something is. So, we say:

I lost my keys.  
Eu perdi minhas chaves.

It is important to be careful not to confuse to lose with the verb to miss. Look at this example:

I missed the bus.  
Eu perdi o ônibus.

In this context, it is not that the person does not know where the bus is. It means they were late to catch it and now it is gone. The idea here is **not being able to get or achieve something**.

Gains and losses are two sides of a coin. However, the ideal path is balance. Here are some verbs and expressions we can use to refer to balancing finances:

The costs of production meet the budget.  
Os custos de produção estão dentro do orçamento.

Claire is having difficulty making ends meet.  
Claire está tendo dificuldade em fazer face às despesas.

The firm is having trouble meeting its debt payments.  
A empresa está tendo problemas em quitar os pagamentos de sua dívida.

Observe that all of the previous expressions have the verb **meet**. This verb can also have different meanings depending on the context. For instance, it can also be used for **introductions**. For example:

I'd like you to meet Tom.  
Quero que você conheça o Tom.

Nice to meet you.  
Prazer em te conhecer.

Now you know some vocabulary related to finances, the uses of the verbs **to win**, **to earn**, and **to gain**, as well as the difference between **to lose** and **to miss**.

# Part 3.

# Vocabulary Activities

## A. Number the columns according to the translation of the words.

|                                        |                                   |                                   |                                      |
|----------------------------------------|-----------------------------------|-----------------------------------|--------------------------------------|
| ( 1 ) ganhar na loteria                | ( 7 ) ter perda / prejuízo        | ( ) to win a game                 | ( ) to gain time                     |
| ( 2 ) ganhar tempo                     | ( 8 ) perder as chaves            | ( ) to earn a salary              | ( ) to run at a loss                 |
| ( 3 ) ganhar / receber salário         | ( 9 ) ganhar um jogo              | ( ) to make forty thousand a year | ( ) to lose the keys                 |
| ( 4 ) ganhar quarenta mil por ano      | ( 10 ) perder o ônibus            | ( ) to make a loss                | ( ) to win the presidential election |
| ( 5 ) ter lucro / lucrar               | ( 11 ) conseguir apoio financeiro | ( ) to miss the bus               | ( ) to win the lottery               |
| ( 6 ) ganhar as eleições presidenciais | ( 12 ) operar com prejuízo        | ( ) to make a profit              |                                      |
|                                        |                                   | ( ) to win financial backing      |                                      |

## B. Fill in the blanks with the appropriate words according to the translation.

a) The company is making \_\_\_\_\_ of 8% this semester.

A empresa está tendo **um prejuízo** de 8% neste semestre.

b) The director is giving up on the deal because it brings no \_\_\_\_\_ to the company.

O diretor está desistindo do acordo porque ele não traz **lucro** para a companhia.

c) It's possible to pay \_\_\_\_\_, but the interests are too high.

É possível pagar **em prestações**, mas os juros são altos demais.

d) The company makes \_\_\_\_\_ of a hundred million a year.

A empresa tem **um lucro** de cem milhões por ano.

e) The costs of production \_\_\_\_\_.

Os custos de produção **estão dentro do orçamento**.

f) The company's \_\_\_\_\_ increase 2% every trimester.

Os **lucros** da empresa aumentam 2% a cada trimestre.

### Activity A – Answers

1. to win the lottery
2. to gain time
3. to earn a salary
4. to make forty thousand a year
5. to make a profit
6. to win the presidential election
7. to make a loss
8. to lose the keys
9. to win a game
10. to miss the bus
11. to win financial backing
12. to run at a loss

### Activity B – Answers

- a. a loss
- b. gain / profit
- c. in installments
- d. a profit
- e. meet the budget
- f. earnings / profits

## Part 4.

# Grammar

In this part of the chapter, we are going to revisit some grammar topics so you can understand a few important details.

Let's start by reviewing the use of the **infinitive form** as a **complement of other verbs**:

### VERB + INFINITIVE FORM

The CEO hopes to win financial backing.  
O CEO espera ganhar apoio financeiro.

We saw this construction in chapter 3. This is one of the uses of the infinitive form. And what defines the form of the second verb is the first verb. In the case you have just seen, the verb **to hope** can **only be followed by verbs in the infinitive**.

The **infinitive** can also **follow some adjectives**. Check out this example:

### ADJECTIVE + INFINITIVE FORM

It's possible to pay in installments.  
É possível pagar em prestações.

To be able to find the perfect choice for you is not easy.  
Ser capaz de achar a escolha perfeita para você não é fácil.

In the examples, the adjectives are **possible** and **able**. Notice how they are followed by the verbs **to pay** and **to find**.

Besides the infinitive, there is yet another verb form that we know: the **-ING form**. In the last chapter, you saw that it can also be used as **a complement to other verbs**. Let's check that again:

### VERB + -ING FORM

The company risks losing investments.  
A empresa corre o risco de perder investimentos.

Mary enjoys working at the office.  
Mary gosta de trabalhar no escritório.

After the verbs **to risk** and **to enjoy**, the verb must be in the **-ING form**.

There are **some verbs** that accept **both verb forms as complements, with no alteration in meaning**. It is the case of the verbs **like** and **hate**, for example. Check it out:

### VERB + INFINITIVE OR -ING FORM

Companies like to make a profit.  
Companies like making a profit.  
Empresas gostam de lucrar.

Companies hate to make losses.  
Companies hate making losses.  
Empresas detestam ter prejuízo.

Keep in mind that the **-ING form** as a complement of a verb does **not** express an **action in progress**. In other words, it is **not related to the present continuous form**.

The only thing they have **in common is the spelling**: the **-ING** at the end of the verb. **Their uses are completely different**.

In the **present continuous**, the **-ING form** is **preceded by the verb to be**, but, as a **verb complement**, it is **preceded by other verbs**.

Observe that by looking at the following examples in the **present continuous**:

### PRESENT CONTINUOUS

Two plants are running at a loss.  
Duas fábricas estão operando com prejuízo.

The company is making a loss of 8%.  
A empresa está tendo um prejuízo de 8%.

Now, you need to bear in mind that there are some verbs in English that we **cannot conjugate** in the present continuous. They are called **non-progressive verbs**. That means they do not make sense when used in a verb form that indicates an action in progress.

Basically, these are the verbs that express **senses** and verbs that express **opinions** and **feelings**. Here is a list of some non-progressive verbs:

### NON-PROGRESSIVE VERBS

#### Verbs that express senses

Verbos que expressam sentidos

**to smell**

cheirar

**to taste**

ter gosto

**to see**

ver

**to hear**

escutar

#### Verbs that express opinion

Verbos que expressam opinião

**to believe**

acreditar

**to agree**

concordar

**to suspect**

suspeitar

**to disagree**

discordar

#### Verbs that express feelings

Verbos que expressam sentimentos

**to love**

amar

**to hate**

odiar

**to like**

gostar

Let's see some examples of those verbs:

### NON-PROGRESSIVE VERBS

I like to see my team win.

~~I'm liking to see my team win.~~

Eu gosto de ver meu time ganhar.

Eu estou gostando de ver meu time ganhar.

I hear a strange noise outside.

~~I'm hearing a strange noise outside.~~

Eu ouço um barulho estranho lá fora.

Eu estou ouvindo um barulho estranho lá fora.

The CEO doesn't believe that Kate is able to do a good job.

~~The CEO is not believing that Katie is able to do a good job.~~

O CEO não acredita que Kate seja capaz de fazer um bom trabalho.

O CEO não está acreditando que Kate seja capaz de fazer um bom trabalho.

Besides knowing verb complements to express yourself correctly, it is also important to know how to connect ideas in the speech. To do so, we use **connectors**. **Connectors** are important **cohesion elements** that help the speech make sense. Here are some examples with the most common ones and their function:

### CONNECTORS

**But: contrasting ideas**

But: contrastando ideias

The CEO doesn't believe that Kate is able to do a good job. But the manager disagrees.

O CEO não está acreditando que Kate seja capaz de fazer um bom trabalho. Mas o gerente está discordando.

**Because: introducing reason**

Porque: introduzindo motivo

The director is giving up on the deal because it brings no gain to the company.

O diretor está desistindo do acordo porque ele não traz lucro para a companhia.

**So: introducing conclusion**

Então: introduzindo conclusão

Mary wants to gain time until her boss arrives. So, she's stalling to start the meeting.

Mary quer ganhar tempo até o seu chefe chegar. Então, ela está enrolando para começar a reunião.

**And: adding idea**

E: acrescentando uma ideia

Bert lost his keys and his wallet.

Bert perdeu suas chaves e sua carteira.

In this chapter, we revisited the **infinitive**, the **-ING form**, and the **present continuous**. You have also learned about **non-progressive verbs** and the most common **connectors**. If you want to learn more about these topics, you can refer to the Grammar Guide section at the end of your book.

**GRAMMAR GUIDE**

|                            |          |
|----------------------------|----------|
| Connectors                 | Page 141 |
| Infinitive Form            | Page 152 |
| Present Continuous         | Page 179 |
| Verbs + Infinitive or -ING | Page 225 |

# Part 5.

# Grammar Activities

## A. Mark the non-progressive verbs.

- |                            |                                   |                               |                            |
|----------------------------|-----------------------------------|-------------------------------|----------------------------|
| a) (    ) to run<br>correr | b) (    ) to believe<br>acreditar | c) (    ) to like<br>gostar   | d) (    ) to make<br>fazer |
| e) (    ) to hear<br>ouvir | f) (    ) to do<br>fazer          | g) (    ) to smell<br>cheirar |                            |

## B. Fill in the blanks with the missing connector.

- a) The CEO doesn't believe that Kate is able to do a good job. \_\_\_\_\_ the manager disagrees.

O CEO não está acreditando que Kate seja capaz de fazer um bom trabalho. **Mas** o gerente discorda.

- b) The director is giving up on the deal \_\_\_\_\_ it brings no gain to the company.

O diretor está desistindo do acordo **porque** ele não traz lucro para a companhia.

- c) The company makes a profit of a hundred million a year, \_\_\_\_\_ two plants are running at a loss.

A empresa tem um lucro de cem milhões por ano, **mas** duas fábricas estão operando com prejuízo.

- d) Mary wants to gain time until her boss arrives. \_\_\_\_\_, she's stalling to start the meeting.

Mary quer ganhar tempo até o seu chefe chegar. **Então**, ela está enrolando para começar a reunião.

- e) It's possible to pay in installments, \_\_\_\_\_ the interests are too high.

É possível pagar em prestações, **mas** os juros são altos demais.

- f) Bert lost his keys \_\_\_\_\_ his wallet.

Bert perdeu suas chaves e sua carteira.

### Activity A – Answers

- b. to believe
- c. to like
- e. to hear
- g. to smell

### Activity B – Answers

- a. But
- b. because
- c. but
- d. So
- e. but
- f. and

5

# Artificial Intelligence

# Part 1.

# Video Script

It is amazing how far we have come in terms of technology. Even so, there is yet a lot to be developed. The possibilities are infinite. However, it is essential not to lose focus and sense of direction.

In this chapter, you are going to learn how to talk about **purposes**, **goals**, and **objectives**. You will also learn how to talk about **abilities** and **possibilities**.

Now look at the script of **Artificial Intelligence**.

## ARTIFICIAL INTELLIGENCE

### [Casey is making a presentation]

Okay, guys. Let's keep going.

So far, we've seen the role of social media in generating big data and how it has been used to create new businesses, define market strategies, and influence consumers' buying potential.

But those are not the only applications of big data.

It all starts back in the 1940s, when human neural network researchers started to replicate them artificially. They thought it would be possible to make a machine mimic human cognitive functions, mainly the ones involved in the process of learning and solving problems.

When we consider that big data is essentially a bunch of information about people's preferences and behavior, it becomes possible to feed a machine with this information to make it act and think as humans would. Does that ring a bell?

I'm talking about artificial intelligence, or simply AI. It is a wide-ranging branch of computer science that attempts to replicate or simulate human intelligence in machines.

And how do scientists do that? They input a lot of data in machines, increasing the frequency of certain traits. And that will eventually build a tendency of behavior. The more information they add, the more predictably the machines will respond. This process is called machine learning.

Bruno Bratti, a principal engineer at Wave Semiconductor, can help us understand that a bit better.

**[Bruno]**

Any kind of modern electronic device these days has the opportunity to benefit from machine learning. Why machine learning works? It works because humans behave predictably.

**[Casey]**

Take Siri, for example—that's artificial intelligence! You ask Siri to call someone just by saying the verb "call" followed by the person's name, then Siri searches that person's name in the contact list and dials the number, right? That's what a human would do in this situation, but Siri just does it automatically.

So, in order to solve a specific problem, the machine must be given specific information on how to respond to it. Where does that information come from? From the data that we, humans, leave behind. Machines act based on what we would probably do if presented with the same issue.

**[Bruno]**

Having all kinds of information to use to train a machine means that you're going to get better and better results. Depending on the type of business you have, you could apply it from customer support...we can replace whole call centers with a machine learning system, and it's just one example.

You can use it in terms of the predicting trends in advertising, you know, how to reach your market. Basically, any situation when you have large reams of data, which you think is something interesting and relevant to your business, you know, exists within that "finding that needle in the haystack"—machine learning allows you to find that. Whether it's finding what's bugging your costumers, even, you know, just rolling it into your product itself.

**[Casey]**

As you can see, it's vital to find a purpose for the data. That's why I said before that they clean up the data they collect according to their needs. It would be a waste of time to input whatever data they collect in a machine if it is not going to be useful for a specific purpose. And based on Bruno's inputs, the applications are infinite.

That is an important insight for life: it's essential to measure your actions according to the goals you need to reach. If you don't know where you're going, every road will take you nowhere.

**[Richard]**

Machine learning per se doesn't tell you very much unless you know what kinds of problems they are attempting to solve. There's more profound uses of that technology than there was a decade ago. And the question is: what do you apply it to?

**[Casey]**

Besides taking data and using it to make machines that can think and act like humans, artificial intelligence can be applied to many purposes. But as with everything in life, you should know your purpose. Otherwise, it's just a bunch of meaningless information that ends up having no use whatsoever.

**INTELIGÊNCIA ARTIFICIAL****[Casey está fazendo uma apresentação]**

Okay, pessoal, vamos continuar.

Até agora, vimos o papel das redes sociais no fornecimento de megadados e como elas são usadas para criar novos negócios, definir estratégias de mercado e influenciar o potencial de compra dos consumidores.

Mas essas não são as únicas utilidades dos megadados.

Tudo começou nos anos 40, quando pesquisadores de redes neurais humanas começaram a replicá-las artificialmente. Eles pensaram que seria possível fazer uma máquina que imitasse as funções cognitivas humanas, principalmente funções envolvidas no processo de aprendizagem e solução de problemas.

Considerando que os megadados são essencialmente um emaranhado de informações sobre as preferências e o comportamento das pessoas, torna-se possível inserir estas informações em uma máquina e fazê-la agir como um ser humano. Isso te lembra alguma coisa?

Estou falando de Inteligência Artificial, ou, simplesmente, IA. É um ramo bastante abrangente da ciência da computação, que tenta replicar ou simular a inteligência humana em máquinas.

E como os cientistas fazem isso? Eles inserem uma grande quantidade de dados em máquinas, o que aumenta a frequência de certos traços. Consequentemente, isso constrói uma tendência de comportamento. Quanto mais informação eles inserem, mais previsivelmente as máquinas vão responder. Esse processo se chama *machine learning* (aprendizado da máquina).

Bruno Bratti, engenheiro-chefe da Wave Semiconductor, pode nos ajudar a entender isso um pouco melhor.

**[Bruno]**

Hoje em dia, qualquer aparelho eletrônico pode se beneficiar de *machine learning*. Por que *machine learning* funciona? Funciona porque os comportamentos humanos são previsíveis.

**[Casey]**

Veja a Siri, por exemplo – é inteligência artificial! Você pede para a Siri telefonar para alguém simplesmente usando o verbo “ligar”, seguido do nome da pessoa, e a Siri procura o nome daquela pessoa na lista de contatos e disca o número, certo? É isso que um humano faria nessa situação, só que a Siri faz automaticamente.

Para resolver um problema específico, a máquina precisa receber uma informação específica sobre como proceder. De onde vem essa informação? Dos dados que nós, humanos, deixamos para trás. As máquinas agem com base no que nós provavelmente faríamos se deparados com o mesmo problema.

**[Bruno]**

Usar todo tipo de informação para treinar uma máquina significa ter resultados cada vez melhores. Dependendo do tipo de negócio que você tem, isso poderia ser aplicado desde o atendimento ao cliente... Podemos substituir call centers, completamente, por um sistema de *machine learning*, e esse é apenas um exemplo.

Você pode usar *machine learning* para prever tendências de publicidade, como atingir seu nicho. Basicamente, qualquer situação na qual você tem uma grande quantidade de dados que você acha relevante para seus negócios, onde existe aquele lance de “encontrar a agulha no palheiro” – *machine learning* te ajuda a achar isso. Pode servir para descobrir o que está incomodando seus clientes ou até para acoplar ao próprio produto.

**[Casey]**

Como você pode ver, encontrar um propósito para os dados é essencial. É por isso que eu disse anteriormente que eles limpam os dados coletados de acordo com as necessidades. Seria um desperdício de tempo inserir dados aleatórios em uma máquina, se isso não vai ter um propósito específico. E tendo como base as colocações do Bruno, as aplicações são infinitas.

É um *insight* importante para a vida: é essencial medir suas ações de acordo com os objetivos que você precisa alcançar. Se você não sabe para onde está indo, qualquer estrada te levará para lugar nenhum.

**[Richard]**

*Machine learning* em si não te diz muita coisa, a não ser que você saiba quais problemas resolver. Hoje existem usos mais profundos dessa tecnologia do que há uma década. A pergunta é: a que isso se aplica?

**[Casey]**

Além de coletar dados e usá-los para fazer máquinas que podem pensar e se comportar como humanos, a inteligência artificial pode ser usada com muitos objetivos. Mas, como tudo na vida, você precisa saber seu objetivo. Caso contrário, é só um monte de informação sem sentido que acaba não tendo utilidade alguma.

## Part 2.

# Vocabulary

In this part, you will learn specific vocabulary related to **purpose, goals, and objectives**, since they are crucial in life as a whole.

Every day, we are given the possibility to make choices and, as they say: **look before you leap**, which means to **think carefully before acting**. That's why it is so important to reflect on the motivations behind our decisions. To do so, you can ask yourself some questions, such as:

**Why am I making this choice?**

Por que estou fazendo esta escolha?

**What do I wish to achieve?**

O que eu desejo alcançar?

**How can I achieve it?**

Como posso alcançá-lo?

All these questions relate to our **purposes, goals, and objectives**. In the business world, **these are three different concepts**, and they should be crystal clear in any negotiation. In many cases, such as opinion surveys or project scope definitions, they will literally have to be written down. Let's understand the differences:

### PURPOSE VS. GOALS VS. OBJECTIVES

**A purpose provides us with the reason to do something.**

Um propósito nos dá o motivo / a razão para fazer alguma coisa.

**Goals are the results we wish to achieve.**

Metas são os resultados que desejamos alcançar.

**Objectives represent concrete actions that are needed to achieve the results.**

Os objetivos representam as ações concretas necessárias para alcançar os resultados.

As mentioned, these concepts are closely related to the **business environment**. But in everyday English, these terms may be interchangeable. There are some **specific ways and contexts** in which we can use them.

Here are some contexts in which the word **purpose** can be applied:

The **purpose of this meeting** is to present the project.

O propósito dessa reunião é apresentar o projeto.

The **purpose of hiring** more people is to increase production.

O propósito de contratar mais pessoas é aumentar a produção.

This strategy can achieve the **purpose of increasing** production.

Esta estratégia pode alcançar o propósito de aumentar a produção.

We may say the **purpose of something**, or the **purpose of doing something**.

See that **of** is a preposition. When verbs come immediately after prepositions, they should be in the **-ING form**.

The word **purpose** can also be used in contexts that are not necessarily related to business. For example, when you travel, you could be asked the following question at the hotel or at customs:

What's the **purpose of your trip**?

Qual é o propósito da sua viagem?

We can also use the word **purpose** in the expression **to serve its purpose**. It is used to say that an object does what it is intended to do. For example:

This smartphone **serves its purpose**.

Este smartphone cumpre sua função.

There is also the expression **on purpose**, that means **deliberately**. Have a look at the example:

Joe broke the window **on purpose**.

Joe quebrou a janela de propósito.

As you can see, there are some fixed expressions with the word **purpose**.

Let's see the word **goal**. This term can, sometimes, have the same meaning as the word **objective**. And, in many cases, you will be able to use the same verbs with both of them, in the same contexts.

For example, when you are defining a **goal** or an **objective**, you can use the verb **set** and say:

**It's advisable to set clear goals / objectives before starting a new project.**

É aconselhável estabelecer metas claras / objetivos claros antes de começar um projeto.

The verb **to pursue** can also be used with both nouns, in the same context. Look:

**As you pursue your goal / objective, you need to have focus.**

Enquanto você persegue a sua meta / seu objetivo, você precisa ter foco.

Keeping focus can be challenging. So, to help you out, some specialists advise dividing your **goals** into short-, medium-, and long-term ones. For example:

**Jack's short-term goal is to cut costs.**

A meta do Jack em curto prazo é diminuir custos.

**The medium-term goal is to redirect investments.**

A meta em médio prazo é redirecionar investimentos.

**The long-term goal is to make more money.**

A meta em longo prazo é ganhar mais dinheiro.

To talk about the end of the process of pursuing a goal, it is very common to use the verb **reach**:

**Jack can reach his goals within a few months.**

Jack pode alcançar suas metas em alguns meses.

Note that **can** expresses an idea of ability in the previous sentence.

With the word **objectives**, it is more common to hear the verb **meet** instead of **reach**. As in:

**Jack can meet his objectives within a few months.**

Jack pode atingir seus objetivos em alguns meses.

In the previous examples, the word **goal** is used in contexts that refer to the objectives we would like to reach in life.

But it can also be used in other contexts, such as sports. For instance, the objective of a soccer team is to score **goals**. So, you could say:

**The player scored a goal just minutes before the end of the game.**

O jogador marcou um gol minutos antes do final do jogo.

However, in this case, the words **goal** and **objective** are not synonymous, so you cannot say:

~~**The player scored an objective just minutes before the end of the game.**~~

In a crisis, having clear **purposes**, **goals**, and **objectives** is essential in **decision-making** and **problem-solving processes**. Take a look:

**The first step is to acknowledge the problem.**

O primeiro passo é reconhecer o problema.

After that, there are two general alternatives:

**We can respond to the problem.**

Podemos reagir ao problema.

**We can measure the problem and its impacts.**

Podemos medir o problema e seus impactos.

**To respond to** means to react without pondering. The most suitable reaction would be to measure the problem and its impacts. Then, finally:

**After analyzing the problem, we can find a solution to solve it.**

Depois de analisar o problema, podemos encontrar uma solução para resolvê-lo.

See that **to solve problems** means to find a solution for them.

Now you know how to talk about **purposes, goals, objectives, and possibilities**. You have also seen some important steps in **problem-solving and decision-making processes**.

# Part 3.

# Vocabulary Activities

## A. Number the columns according to the translation of the words.

- |                             |                             |                                |                          |
|-----------------------------|-----------------------------|--------------------------------|--------------------------|
| ( 1 ) perseguir metas       | ( 8 ) meta em longo prazo   | ( ) to score a goal            | ( ) to serve its purpose |
| ( 2 ) marcar / fazer um gol | ( 9 ) alcançar metas        | ( ) to meet objectives         | ( ) to solve a problem   |
| ( 3 ) de propósito          | ( 10 ) reagir ao problema   | ( ) to acknowledge the problem | ( ) to pursue goals      |
| ( 4 ) meta em curto prazo   | ( 11 ) cumprir sua função   | ( ) long-term goal             | ( ) to set goals         |
| ( 5 ) atingir objetivos     | ( 12 ) resolver um problema | ( ) to respond to the problem  | ( ) short-term goal      |
| ( 6 ) reconhecer o problema |                             | ( ) on purpose                 |                          |
| ( 7 ) estabelecer metas     |                             | ( ) to reach goals             |                          |

## B. Fill in the blanks with the appropriate words according to the translation.

- a) \_\_\_\_\_ is to present the project.  
O **propósito** dessa reunião é apresentar o projeto.
- b) \_\_\_\_\_ more people is to increase production.  
O **propósito de contratar** mais pessoas é aumentar a produção.
- c) It's advisable to \_\_\_\_\_ before starting a new project.  
É aconselhável **estabelecer metas claras** antes de começar um projeto.
- d) This strategy can \_\_\_\_\_ of increasing production.  
Esta estratégia pode **alcançar o propósito** de aumentar a produção.
- e) \_\_\_\_\_, we can find a solution to solve it.  
Depois de **analisar o problema**, podemos encontrar uma solução para resolvê-lo.
- f) A purpose provides \_\_\_\_\_ for doing something.  
Um propósito nos dá o **motivo** pra fazer alguma coisa.

### Activity B – Answers

- The purpose of this meeting
- The purpose of hiring
- set clear goals
- achieve the purpose
- After analyzing the problem
- the reason for doing

### Activity A – Answers

- to pursue goals
- to score a goal
- on purpose
- short-term goal
- to meet objectives
- to acknowledge the problem
- to set goals
- long-term goal
- to reach goals
- to respond to the problem
- to serve its purpose
- to solve a problem

## Part 4.

# Grammar

Previously, you saw how important it is to ask yourself about purposes and goals, especially before making a decision. You saw some questions you can ask to help you reflect on that. The first one was:

### QUESTION WORD WHY

Why am I making this choice?  
Por que estou fazendo esta escolha?

The **question word why** is used to **question the reason for something**. To do that, the structure of the sentence should be in the interrogative form. This sentence is in the **present continuous**, so the structure will be as follows:

### QUESTION WORD + INTERROGATIVE FORM Present Continuous

**Question word + verb to be + subject + main verb in the -ING form + complement**  
Question word + verbo to be + sujeito + verbo principal com -ING + complemento

The **answer to** questions with **why** is usually introduced by the word **because**. Check it out:

### TALKING ABOUT REASON

Why am I making this choice?  
Por que estou fazendo esta escolha?

Because I think this is a good choice.  
Porque eu acho que esta é uma boa escolha.

Note that the verb **to think** is in the **simple present**. In this context, we **cannot use** the verb **to think** in the **present continuous** because it is a **non-progressive verb** that expresses an opinion.

Another question we considered when thinking about purposes, goals, and objectives was this one:

### QUESTION WORD WHAT

What do I wish to achieve?

O que eu desejo alcançar?

Note the **question word what**, which is normally **used to ask for information about something**. In the previous sentence, **what** is followed by the **interrogative form of the simple present**, that is: the **auxiliary verb do** followed by the **subject I** and the main verb **wish** in the **base form**. See that the complement of the verb wish is in the infinitive form: **to achieve**.

In short, the question word will be followed by the interrogative form. In the simple present, it will be:

### QUESTION WORD + INTERROGATIVE FORM

#### Simple Present

Question word + auxiliary verb **do** + subject + main verb + complement

Question word + verbo auxiliar do + sujeito + verbo principal + complemento

Another question we saw was this one:

### QUESTION WORD WHAT

What's the purpose of your trip? / What is the purpose of your trip?

Qual é o propósito da sua viagem?

Note that we used the verb **to be**. It may or may not be contracted with the **question word what**. In the interrogative form, you must **invert the verb to be and the subject**. Check it out:

### QUESTION WORD + INTERROGATIVE FORM

#### Verb To Be

Question word + verb **to be** + subject + complement

Question word + verbo to be + sujeito + complemento

And then, the last **question** you saw in the vocabulary part of this chapter refers to the **goals and objectives**. Check it out:

### QUESTION WORD HOW

How can I achieve my goal?  
Como posso alcançar meu objetivo?

**How** is a **question word** used to ask about **manner**, the way something is done. So, if you pay close attention to this structure, right after the **question word how**, there is the **modal verb can** followed by the **subject I**, the **main verb**, and finally, the complement. Basically, you have **how** followed by the **interrogative form of the modal verb can**. Check:

### QUESTION WORD + INTERROGATIVE FORM Modal Verb Can

Question word + modal verb can + subject + main verb in the base form + complement  
Question word + verbo modal can + sujeito + verbo principal na forma base + complemento

Note that this structure follows the same logic of the interrogative sentences with the verb to be, that is, we just **invert can and the subject**. We do not use the auxiliary verb **do** in this case.

**Modal verbs** work as **auxiliary verbs** that **add specific meaning to the main verb** of the sentence, **depending on the context**.

The **modal verb can** will have **different meanings** in the affirmative, negative, and interrogative forms.

Take a look at the **general structure of the modal verb can in the affirmative form**:

### MODAL VERB CAN Affirmative Form

Subject + modal verb can + main verb (base form) + complement  
Sujeito + verbo modal can + verbo principal na forma base + complemento

When used in the affirmative form, the **modal verb can** may convey an idea of **possibility**. For example:

### MODAL VERB CAN

#### Possibility

**We can achieve our goals with hard work.**

Nós podemos alcançar nossas metas com trabalho duro.

Note that the subject is **we**, followed by the **modal verb can** and the **main verb achieve** in the base form. The rest of the sentence is the **complement**. The idea here is that it is possible to achieve goals with hard work.

The **modal verb can** may also mean **ability in the present**. Check it out:

### MODAL VERB CAN

#### Ability in the present

**We can find a solution to the problem.**

Nós podemos achar uma solução para o problema.

**Mark can speak English very well.**

Mark pode / sabe falar inglês muito bem.

Note that, even though the subject is in the **third person singular**, the **modal verb doesn't change** and the **main verb remains in the base form**.

There are other ways to talk about **ability** without using the **modal verb can**. One of them is using the adjective **able**. Check this out:

### BE ABLE + INFINITIVE

#### Ability in the present

**Mary is able to speak English very well.**

Mary é capaz de falar inglês muito bem.

In this case, see that **the verb to be** will be conjugated according to the subject.

To make the **negative form**, you will only need to **add not** right **after the modal verb can**. That will form the word **cannot**. It's written as one word. You may also use the **contracted form can't**. Remember that the contracted form **can't** is a lot **less emphatic** than **cannot**. Have a look at the basic structure:

### MODAL VERB CAN Negative Form

**Subject + cannot or can't + main verb in the base form + complement**  
Sujeito + cannot ou can't + verbo principal na forma base + complemento

Now, let's go over some examples and compare the ideas expressed by the **negative form of the modal verb can**:

### MODAL VERB CAN

#### Lack of possibility

**We can't achieve our goals without hard work.**  
Nós não podemos alcançar nossas metas sem trabalho duro.

#### Lack of ability

**Mary can't speak Spanish very well.**  
Mary não consegue falar espanhol muito bem.

As you can see, we can use **can't** to refer to **lack of possibility** or **lack of ability**.

Finally, the **interrogative form**. As mentioned before, we form the interrogative by inverting the **modal verb can** and the subject. The rest of the sentence will remain the same. Observe:

### MODAL VERB CAN Interrogative Form

**Modal verb can + subject + main verb in the base form + complement**  
Verbo modal can + sujeito + verbo principal na forma base + complemento

You can use the interrogative to question the ideas expressed by the affirmative and negative sentences. For example:

### MODAL VERB CAN

#### Question about possibility

Can we achieve our goals without hard work?

Nós podemos alcançar nossas metas sem trabalho duro?

#### Question about ability

Can Mary speak Spanish very well?

Mary sabe falar espanhol muito bem?

But there are two more uses of the **modal verb can** in the **interrogative form** that are quite **specific**, for **they depend on the subject**.

We can use this modal verb to **make requests**. Normally, in this context, the subject will **necessarily be in the second person singular or plural** represented by the subject pronoun **you**. Check out these examples:

### MODAL VERB CAN

#### Requests

Can you help me, Mr. Johnson?

Você pode me ajudar, senhor Johnson?

Can you both come to my office?

Vocês dois podem vir ao meu escritório?

We can also use the **interrogative form of can** with the subjects **I** or **we** to **make offers**, that is, to **offer something to someone else**. Check out these examples:

### MODAL VERB CAN

#### Offers

Can we give you a ride to work?

Podemos te dar uma carona para o trabalho?

**How can I help you?**  
Como eu posso te ajudar?

**What can I do for you?**  
O que eu posso fazer por você?

In this chapter, we revisited the **interrogative form**. You have also learned about **question words** and the uses of the **modal verb can**. If you want to learn more about these topics, you can refer to the **Grammar Guide** section at the end of your book.

#### GRAMMAR GUIDE

# Part 5.

# Grammar Activities

**A. Change the sentences into the interrogative form (INT) or the negative form (NEG).**

**a)** Mary is able to speak English very well.

(INT) \_\_\_\_\_

**b)** We can find a solution to the problem.

(NEG) \_\_\_\_\_

**c)** Mark can speak English very well.

(NEG) \_\_\_\_\_

**d)** Jack can reach his goals within a few months.

(INT) \_\_\_\_\_

**e)** We can respond to the problem.

(INT) \_\_\_\_\_

**f)** We can measure the problem and its impacts.

(INT) \_\_\_\_\_

**g)** We can find a solution to solve it.

(NEG) \_\_\_\_\_

**h)** Jack can meet his objectives within a few months.

(NEG) \_\_\_\_\_

**B. Fill in the blanks with the missing question word.**

a) \_\_\_\_\_ am I making this choice?

*Por que* estou fazendo esta escolha?

b) \_\_\_\_\_ can I help you?

*Como* eu posso te ajudar?

c) \_\_\_\_\_ do I wish to achieve?

*O que* eu desejo alcançar?

d) \_\_\_\_\_ can I do for you?

*O que* eu posso fazer por você?

e) \_\_\_\_\_ can I achieve my goal?

*Como* posso alcançar meu objetivo?

f) \_\_\_\_\_ is the purpose of your trip?

*Qual* é o propósito da sua viagem?**Activity B – Answers**

- a. Why
- b. How
- c. What
- d. What
- e. How
- f. What

**Activity A – Answers**

- a. Mary isn't / is not able to speak English very well.
- b. We cannot / can't find a solution to the problem.
- c. Mark cannot / can't speak English very well.
- d. Can Jack reach his goals within a few months?
- e. Can we respond to the problem?
- f. Can we measure the problem and its impacts?
- g. We cannot / can't find a solution to solve it.
- h. Jack cannot / can't meet his objectives within a few months.

# AI Trends

# Part 1.

# Video Script

In this chapter, you will learn how to talk about **necessities and obligations**; **wishes and desires**, and how to express **possession**. You will also see some important vocabulary and grammar topics to make it happen.

Now look at the script of **AI Trends**.

## AI TRENDS

### [Casey]

In the previous episode, we learned that having tons of information with no clear purpose of how to use it will only take us to dead ends.

Scientists have been asking themselves to which purposes machine learning and artificial intelligence could serve. Simplifying daily tasks, promoting then more comfort to consumers, was one of the purposes they came up with. And that takes us to the concept of the Internet of Things.

The Internet of Things, or IoT, refers to the billions of physical devices that are connected to the internet around the globe, collecting and sharing data without the need for human mediation.

Our guest Curtis Sasaki will tell us about some of the applications this technology can have. He is the one responsible for heading the IoT initiative at Samsung.

### [Curtis]

We think IoT has a very transformative potential for society, not just building technology for technology's sake. You know, with all of the world challenges going on, from drinking water supplies to food supplies, to what's happening in urbanization.

Then, you know, on the industrial enterprise side, there's so many applications that are already being improved. In hospitals, in supply chain management, you know, putting sensors on cargos...

You know, I think there's going to be incredibly interesting IoT-based projects that people don't think about it as IoT, but people just are benefiting from it, either indirectly or, in many cases, directly.

**[Casey]**

Curtis Sasaki points out some practical applications of IoT. Thanks to it, it's possible to add a sensor to an item and accompany its shipping around the world, making sure it gets safely to its destination as planned.

But there are some other applications of IoT that don't really seem to be that meaningful or even useful at all. That's what our guest Mark Zawacki points out.

**[Mark]**

I think a lot of that is hyped, and it may be inflated. What really is the use case if your dishwasher is on the internet? It's possible, and we know it has integrated circuits inside, and we're starting to see, for instance, appliance manufacturers make very advanced home appliances.

I saw one recently, it had a camera in it, and you could see inside your refrigerator. This is technology that is not even clear of what problem it's chasing. You know, to have a camera facing in your refrigerator to tell you that that shelf is empty...In my mind, it may not meet the test of real customer need.

**[Casey]**

So, Mark calls our attention to real customer need. What would really be an application of IoT that would meet customer's expectations or necessities? Having our home appliances connected to the web may give us some kind of comfort or status, but maybe it really isn't a good use of all the potential that an AI system can reach.

**[Bruno]**

What is the ultimate goal of any kind of AI system? Do we want to create a new class of servants? That's certainly fine, but we need to depend sometimes less on machines for basic stuff and depend more on ourselves.

I think someone like myself is much more interested in AI as a way to approach interesting scientific and medical problems, like sort of insoluble scientific questions up to this point. And I think it would be a much more interesting thing to apply machine learning and artificial intelligence to, you know, cancer, cosmology, you know...you name it. As opposed to having something driving around serving you drinks.

**[Casey]**

With that in mind, it becomes clear that all this technology has the potential to provide us just with the right tools to accept the challenge of solving greater problems. It's a new field that still needs to be improved. But it seems it's got all it takes to really change civilization as we know it.

**TENDÊNCIAS EM IA****[Casey]**

No episódio anterior, aprendemos que ter um tanto de informação sem um propósito claro para seu uso só nos leva a um beco sem saída.

Os cientistas têm se perguntado sobre os possíveis usos para *machine learning* (aprendizado da máquina) e inteligência artificial (IA).

Simplificar tarefas cotidianas e com isso trazer mais conforto para os consumidores foi uma das respostas encontradas. Isso nos leva ao conceito de "Internet das Coisas".

"Internet das Coisas", ou IdC, refere-se aos bilhões de aparelhos conectados à internet em todo o mundo, coletando e compartilhando dados sem a necessidade de mediação humana.

Nosso convidado, Curtis Sasaki, vai falar sobre algumas das aplicações que essa tecnologia pode ter. Ele é o responsável por liderar a iniciativa de IdC na Samsung.

**[Curtis]**

Acreditamos que IdC tem um potencial transformador para a sociedade, não se tratando apenas de desenvolver uma tecnologia simplesmente pela tecnologia em si. Sabe, para todos os desafios globais atuais, do abastecimento de água potável e de alimentos, até o que está acontecendo no âmbito da urbanização.

Aí, sabe, no campo do empreendimento industrial, muitas aplicações já estão sendo aprimoradas. Em hospitais, na gestão de cadeias de abastecimento, sabe, colocando sensores em cargas de mercadorias... Sabe, eu acho que haverá projetos baseados em IdC incrivelmente interessantes e que as pessoas não vão ver como IdC, mas elas vão se beneficiar deles mesmo assim, indireta, ou, em muitos casos, diretamente.

**[Casey]**

Curtis Sasaki ressaltava algumas aplicações práticas de IdC. É possível colocar um sensor em um item e rastrear seu envio pelo mundo, assegurando sua chegada em seu destino conforme planejado.

No entanto, outras aplicações de IdC não parecem ser relevantes nem úteis. É o que nosso convidado Mark Zawacki aponta.

**[Mark]**

Acho que muito disso é exagerado e aumentado. O que realmente significa o fato de que sua lava-louças acessa a internet? É possível, e sabemos que lá dentro há circuitos integrados para isso, e agora começamos a ver, por exemplo, fabricantes que fazem eletrodomésticos muito avançados.

Recentemente, eu vi uma geladeira com uma câmera, você podia ver dentro da sua geladeira. Isso é tecnologia que não soluciona um problema específico. Sabe, ter uma câmera na sua geladeira, para saber qual prateleira está vazia... Na minha cabeça, isso pode não atender uma necessidade real do cliente.

**[Casey]**

O Mark chama nossa atenção para a necessidade real do cliente. Qual seria uma utilização de IdC que realmente atenderia às expectativas ou as necessidades dos clientes? Ter nossos eletrodomésticos conectados à internet pode nos reconfortar ou nos dar status, mas talvez não seja o melhor uso de todo o potencial que os sistemas de IA podem alcançar.

**[Bruno]**

Qual é o objetivo final de qualquer tipo de sistema de IA? Queremos criar uma nova classe de serviços? Tudo bem, mas, às vezes, nós deveríamos depender menos de máquinas para coisas básicas e depender mais de nós mesmos.

Acho que alguém como eu está muito mais interessado em IA como uma forma de abordar problemas científicos e médicos interessantes, como questões científicas insolúveis até agora. E eu acho que seria muito mais interessante aplicar *machine learning* e IA ao câncer, à cosmologia... o que quer que seja, ao invés de ter algo rodando por aí servindo bebidas.

**[Casey]**

Com isso em mente, fica claro que toda essa tecnologia tem o potencial de fornecer para nós as ferramentas certas para encarar os desafios de resolver problemas maiores. É uma nova área que ainda precisa ser aprimorada, mas tudo indica que ela pode transformar a civilização.

## Part 2.

# Vocabulary

In this chapter, you learned about tendencies in artificial intelligence. You saw some of its applications, especially those related to the **Internet of Things**. You learned that this kind of technology can have far more sophisticated applications, bringing comfort and status to users.

Imagine having your whole house connected to the internet. Adjusting the lights with voice control, receiving a text message with a shopping list of the items running out in your fridge, programming the time the blinds are going to open. As you can imagine:

Having your house connected to the internet is a luxury.  
To have your house connected to the internet is a luxury.

Ter sua casa conectada à internet é um luxo.

When you say something is a **luxury**, you are saying **it is not an essential item**, that is, you can live without it perfectly fine. To refer to items that are **the opposite of a luxury**, that is, essential, you can use the term **basic necessities** or **basic needs**. For example:

Food is a **basic necessity**.

Comida é uma necessidade básica.

Drinking water is a **basic need** too.

Água potável é uma necessidade básica também.

Note that in the previous sentences, **need** and **necessity** are both **nouns**, and in the context, they are also **synonyms**. Both **necessity** and **need** refer to essential items that you must have in your life.

However, there are some contexts in which **the noun need** expresses a **condition** marked by the **lack of something**. For example:

There's a need for improvement in communication.

Há/Existe uma necessidade de melhoria na comunicação.

The company will donate money to people in need.

A empresa vai doar dinheiro para pessoas necessitadas.

As you can see, the word **need** is used as a **noun**, but it can **also be used** as a **verb**. Check it out:

**The company needs to profit.**

A empresa precisa lucrar.

**I need help.**

Eu preciso de ajuda.

**To need** is a **non-progressive verb**. It means that you **cannot use this verb in a progressive form**, such as the **present continuous**. So, **you cannot say**, for example:

**I'm needing help.**

Instead, we say:

**I need help.**

Eu estou precisando de ajuda. / Eu preciso de ajuda.

When you say you **need something** or you **need to do something**, it can be understood as a **necessity** or an **obligation**. The verb **to need followed by infinitive** can express these two ideas depending on the context. The verb **to have + infinitive** is another structure that you can use to express these ideas. So, you could say:

### NEED / HAVE + INFINITIVE

**I need to attend a meeting at 8.**

Eu preciso participar de uma reunião às 8.

**I have to attend a meeting at 8.**

Eu tenho que participar de uma reunião às 8.

Eu preciso participar de uma reunião às 8.

**The director has to hire someone until the end of the week.**

O diretor tem que contratar alguém até o final da semana.

The verb **to have** expresses the **ideas of necessity or obligation** when it is **followed by another verb** in the **infinitive**. However, when it is **followed by a noun, the idea changes**. Check it out:

### HAVE + NOUN

**I have a meeting at 8.**  
Eu tenho uma reunião às 8.

In this case, **to have** refers to a scheduled event, **a meeting**. It is not about necessity or obligation.

Now, pay attention to the next example:

### HAVE + NOUN

**Joanna has a new dishwasher.**  
Joanna tem uma lavadora de louças nova.

In this case, the verb **to have + noun** expresses **possession**. The dishwasher belongs to Joanna.

When we use the verb **to have** with the **idea of necessity or obligation**, or when we **talk about possession**, it will be considered **non-progressive**. That is, you cannot use it in verb forms such as the present continuous.

Now, **depending on the context**, the verb **to have** can be **progressive**. Take a look:

**Jessica is having a drink with her boss.**  
Jessica está tomando um drinque com o chefe dela.

As you can see in the example, the verb **to have** may be synonymous to the verb **to drink**. It can also mean the same as the verb **to eat**. As in:

Jessica is having a sandwich.  
Jessica está comendo um sanduíche.

Another use for the verb **to have** is in the expression **to have someone over**. It means to receive people at your house. For example:

We are having my co-workers over tonight.  
Nós vamos receber meus colegas de trabalho esta noite.

There is also the expression **to have fun**, which is the same as to have a good time or enjoy yourself. Take a look:

The staff is having fun at the company party.  
Os funcionários estão se divertindo na festa da empresa.

Basically, when the verb **to have** is **followed by a noun in some specific contexts**, it can be considered a **progressive verb**.

So far, you have already learned how to express necessity, obligation, and possession.

Now, let's focus on expressing **desires**. In order to do that, we usually use the verb **to want**. Look at the examples:

I want a new smartphone.  
Eu quero um smartphone novo.

I want to buy a new smartphone.  
Eu quero comprar um smartphone novo.

As you can see in the previous sentences, the verb **to want** can be followed by a **noun** or by the **infinitive form** to express **desire**.

The verb **to want** is **non-progressive**. So, it is not possible to say:

I'm wanting to buy a new smartphone.

In this case, you may use the word **willing**, which is an **adjective** that gives the idea of being **inclined to do something**. Note that the expression is: **be willing + infinitive**. Check:

**I'm willing to buy a new smartphone.**

Eu estou querendo comprar um smartphone novo.

Eu estou com vontade de comprar um smartphone novo.

In a **formal situation**, it is advisable to replace **want** with **wish**. You will say, for example:

**I wish to speak to the manager.**

Eu desejo falar com o gerente.

Note that the verb **to wish** is followed by the **infinitive**.

In other contexts, you can use the verb **to wish** to **express what you desire for someone else**, for example:

**I wish you good luck in your new job.**

Eu te desejo boa sorte no seu emprego novo.

Have in mind that, in this context, the verb **to wish** will be **followed by a noun**.

We can also **express what you desire for someone else** by using **wish as a noun**.

In this case, it is common to use **wish** in the plural form: **wishes**. Check it out:

**My best wishes for your success!**

Meus melhores votos pelo seu sucesso!

**Now you know how to express **necessity and obligation**;  
**wishes and desires**; and **possession**.**

# Part 3.

# Vocabulary Activities

## A. Number the columns according to the translation of the words.

- |                                 |                                 |                                  |                         |
|---------------------------------|---------------------------------|----------------------------------|-------------------------|
| ( 1 ) tomar um drink            | ( 7 ) comer um sanduíche        | ( ) to have a sandwich           | ( ) to have fun         |
| ( 2 ) receber amigos em casa    | ( 8 ) se divertir               | ( ) to hire someone              | ( ) luxury              |
| ( 3 ) participar de uma reunião | ( 9 ) emprego                   | ( ) in need                      | ( ) to attend a meeting |
| ( 4 ) necessidade básica        | ( 10 ) lavadora de louças       | ( ) basic necessity / basic need | ( ) dishwasher          |
| ( 5 ) luxo                      | ( 11 ) desejar / querer         | ( ) to have a drink              | ( ) job                 |
| ( 6 ) contratar alguém          | ( 12 ) em necessidade / carente | ( ) to wish / to want            |                         |
|                                 |                                 | ( ) to have friends over         |                         |

## B. Fill in the blanks with the appropriate words according to the translation.

- a) I \_\_\_\_\_.  
Eu **preciso de ajuda**.
- b) The director \_\_\_\_\_ someone until the end of the week.  
O diretor **tem que contratar** alguém até o final da semana.
- c) I \_\_\_\_\_ a meeting at 8.  
Eu **preciso participar** de uma reunião às 8.
- d) The company \_\_\_\_\_.  
A empresa **precisa lucrar**.
- e) Drinking water is a \_\_\_\_\_.  
Água potável é uma **necessidade básica**.
- f) The company will donate money to people \_\_\_\_\_.  
A empresa vai doar dinheiro para pessoas **necessitadas**.

### Activity B – Answers

- a. need help
- b. has to hire / needs to hire
- c. need to attend / have to attend
- d. needs to profit / has to profit
- e. basic necessity / basic need
- f. in need

### Activity A – Answers

1. to have a drink
2. to have friends over
3. to attend a meeting
4. basic necessity / basic need
5. luxury
6. to hire someone
7. to have a sandwich
8. to have fun
9. job
10. dishwasher
11. to wish / to want
12. in need

## Part 4.

# Grammar

In the vocabulary part of this chapter, you learned different ways to talk about necessity and obligation, including expressions with the verbs **to need** and **to have**. Let's revisit some examples:

### NECESSITY AND OBLIGATION

#### Need + infinitive

**The company needs to profit.**

A empresa precisa lucrar.

#### Have + infinitive

**I have to attend a meeting at 8.**

Eu tenho que participar de uma reunião às 8.

The verb **to have** can also be followed by **nouns** to refer to **possessions** and **scheduled events**. Check:

### HAVE + NOUN

#### Possession (Posse)

**Jackson has a briefcase.**

Jackson tem uma pasta.

#### Event (Evento)

**I have a meeting at 8.**

Eu tenho uma reunião às 8.

The verb **to have** cannot be used to express existence, as in:

~~**Have a need for improvement in communication.**~~

We use **THERE + BE** instead. Check it out:

### **THERE + BE** Existence

**There is a meeting at 8.**  
Tem uma reunião às 8.

Note that the sentence started with **there is**, which is the conjugated form of **THERE + BE**, followed by the noun **meeting**. In this sentence, the idea is to **inform about the existence** of the meeting.

Have a look at another example:

### **THERE + BE** Existence

**There's a need for improvement in communication.**  
Tem uma necessidade de melhoria na comunicação.  
Existe/Há uma necessidade de melhoria na comunicação.

In this case, note that the verb **to be** is contracted with there: **there's**.

You have probably heard the word **THERE** being used to **indicate a place**, as an antonym of the word **here**. But this is different. The structure **THERE + BE** and the word **there**, in this case, have nothing to do with indicating a place. **This structure is only used to talk about existence.**

And to talk about existence in the present, you need to conjugate the verb **to be** in the structure **THERE + BE** according to what you are saying exists. In the previous examples, we used **there's** or **there is**, in the **singular form**. Check it out:

### **THERE + BE** Singular

#### **Affirmative Form**

There is / There's a new product on the market.  
Tem/Existe um novo produto no mercado.

**Negative Form**

There isn't a new product on the market.

Não tem / Não existe um novo produto no mercado.

**Interrogative Form**

Is there a new product on the market?

Tem / Existe um novo produto no mercado?

Now, to talk about the existence of things or people in the **plural**, we conjugate the verb **to be** accordingly. Instead of using **is**, we use **are**. Check out this example:

**THERE + BE****Plural****Affirmative Form**

There are two people in the office

Tem duas pessoas no escritório.

**Negative Form**

There aren't two people in the office.

Não tem duas pessoas no escritório.

**Interrogative Form**

Are there two people in the office?

Tem duas pessoas no escritório?

Summing up, we use **there is** for **nouns in the singular** and **there are** for **nouns in the plural**. This is what is **grammatically correct**. In everyday life, it is common to hear people using **there's** to refer to the existence of **elements in the plural**. For example:

**THERE + BE****Informal use**

There's lots of things we need to do.

Tem muitas coisas que precisamos fazer.

There are a few details you should know about **plural nouns**. Most of them will be formed by **adding an -S** to the end of the word. Let's check that with some examples:

| PLURAL NOUNS               |                              |                                 |                                    |
|----------------------------|------------------------------|---------------------------------|------------------------------------|
|                            | -S                           |                                 | -IES                               |
| <b>report</b><br>relatório | <b>reports</b><br>relatórios | <b>necessity</b><br>necessidade | <b>necessities</b><br>necessidades |
| <b>product</b><br>produto  | <b>products</b><br>produtos  | <b>luxury</b><br>luxo           | <b>luxuries</b><br>luxos           |
| <b>dollar</b><br>dólar     | <b>dollars</b><br>dólares    | <b>technology</b><br>tecnologia | <b>technologies</b><br>tecnologias |

Note that when the word ends in **Y**, we replace it with **-IES** to form the plural. These are **regular plural forms**, which are the most common ones.

But you should know that sometimes the plural will not follow this rule and will not end in **-S**. Have a look at some **irregular plural nouns**:

| IRREGULAR PLURAL NOUNS  |                          |
|-------------------------|--------------------------|
| <b>person</b><br>pessoa | <b>people</b><br>pessoas |
| <b>woman</b><br>mulher  | <b>women</b><br>mulheres |
| <b>man</b><br>homem     | <b>men</b><br>homens     |

Bear in mind that irregular plural forms are exceptions. Most of the nouns will end in **-S**.

Another detail worth mentioning is that **nouns are divided into two large groups: countable and uncountable nouns**. **Countable nouns can be counted**, so they have plural forms.

Consequently, all the previous examples of plural nouns are countable. You could say, for example, **ten reports** or **two people**, because you can **use numbers to refer to their quantity**.

The **uncountable nouns**, on the other hand, **cannot be counted**. For instance:

### UNCOUNTABLE NOUNS

**information**  
informação

**money**  
dinheiro

**stuff**  
coisa

Since you cannot use numbers with these nouns, you need **quantifiers** to express quantity. Check the following examples

### QUANTIFIERS Uncountable Nouns

I need two pieces of information from you: your age and address.

Eu preciso de duas informações de você: sua idade e seu endereço.

There is a lot of stuff we can do with artificial intelligence.

Tem um monte de coisas que podemos fazer com inteligência artificial.

They have little money to invest.

Eles têm pouco dinheiro para investir.

**A lot of** is the opposite of **little**. You may use different numbers with the expression **pieces of**, as in: **three pieces of information**, **ten pieces of information**, and so on.

Now, if you want to quantify **countable nouns**, you can use **numbers**, as mentioned, or other **quantifiers**. Check these examples:

## QUANTIFIERS

### Countable Nouns

Karla has many reports to write.  
Karla has a lot of reports to write.  
Karla tem muitos relatórios para escrever.

There are few people at the meeting.  
Tem poucas pessoas na reunião.

Note that the **quantifier a lot of** can be used both with **countable** and **uncountable nouns**. In this case, it is the opposite of **few**.

In this chapter, you learned how to talk about **existence** and some **plural nouns**. You have also seen **countable and uncountable nouns** and, most importantly, how to **quantify** them properly. If you want to learn more about these topics, you can refer to the Grammar Guide section at the end of your book.

#### GRAMMAR GUIDE

|                                 |          |

| There + be                      | Page 221 |

# Part 5.

# Grammar Activities

## A. Mark the uncountable nouns.

- |                       |                      |
|-----------------------|----------------------|
| a) (    ) stuff       | e) (    ) money      |
| b) (    ) information | f) (    ) technology |
| c) (    ) women       | g) (    ) people     |
| d) (    ) report      | h) (    ) dollar     |

## B. Fill in the blanks with the correct form of the missing verbs.

- a) There aren't \_\_\_\_\_ in the office.

Não tem **duas pessoas** no escritório.

- b) There are \_\_\_\_\_ at the meeting.

Tem **poucas pessoas** na reunião.

- c) Karla has \_\_\_\_\_ to write.

Karla tem **muitos relatórios** para escrever.

- d) There is \_\_\_\_\_ we can do with artificial intelligence.

Tem **um monte de coisas** que podemos fazer com inteligência artificial.

- e) They have \_\_\_\_\_ to invest.

Eles têm **pouco dinheiro** para investir.

- f) The company has \_\_\_\_\_ on the market.

A empresa tem **um produto** no mercado.

### Activity B – Answers

- two people
- few people
- a lot of reports / many reports
- a lot of stuff / a lot of things / many things
- little money
- one product / a product

### Activity A – Answers

- stuff
- information
- money

7

# Jobs and Technology

# Part 1.

# Video Script

In this chapter, you will learn how to talk about **challenges** and to **express your opinion**. You will also see some important vocabulary and grammar topics to make it happen.

Now look at the script of **Jobs and Technology**.

## JOBS AND TECHNOLOGY

### [Casey]

So far, we've seen how big data can broaden options, influence consumers' behavior, and help companies make more profit. We've also seen how artificial intelligence and IoT can help us find and solve more significant problems, from logistics to medical care.

All those gains bring about some questions: how does all that affect jobs around the world? If machines are learning how to act like humans, what will there be left for humans to do?

We would be quite naïve if we didn't consider the challenges underneath those gains from a job market perspective. What do we, 21st-century professionals, need to be ready for if we wish to stand out professionally in such a technological world?

### [Bruno]

If you look at what a company is, it's decision making. And you even see that level of integration, where the decision makers themselves are being replaced by machines, right? And organizations themselves are going to become kind of hybrids of humans and machine learning, where you have machines contributing with their own opinions on things and contributing with their own ideas about the direction of organizations.

You can produce enough to keep a population going without having full participation in the labor force. We might have to kind of do away with all the economic concepts, look at something like a guaranteed living wage...

This power is imminent, but like I said, in 10, 15, 20 years. But it's going to change civilization.

**[Casey]**

In the face of so many changes, we need to accept that cognitive computing, artificial intelligence, and hybrid companies are a reality. We've reached that part of the future that we envisioned decades ago, and there is no use denying it. We'll just need to adapt to it.

**[Mark]**

You look at the traditional companies, look at the traditional big banks, look at the traditional media companies, retail companies—I believe that they're behind in the use of big data. But the good news is that there's lots of opportunity to catch up and to make something of it.

**[Casey]**

Old habits die hard. But from Mark's perspective, we can assume that maintaining tradition will only delay the necessary changes both companies and professionals will have to go through.

**[Bruno]**

We have to always think about exercising wisdom and appreciate the amount of power that this technology has to change the world. It's coming, it's happening, nothing is going to stop it. We have to make ourselves acquainted with it, understand it; it's as much as a political and economic question as it is a technical question.

**[Casey]**

It seems that a possible path toward understanding this new job market would be getting up to date with these changes, getting to know more about their technological applications, and, perhaps, taking an active part in the process.

We should have in mind that artificial intelligence is one thing, but consciousness is another. A machine is incapable of reflecting on what it does. It just does what it has been taught to do, according to the information people have fed it with.

That means the market still needs people who can actually think, who have a critical point of view and can interpret data. They also need people who can reflect on their own standing point and work on the aspects that need to be developed. Being willing to grow is a trait of humans, not machines.

Based on what we've heard from our guests here, there's a whole market in various fields for people who are aware of the potential greatness that all this technology has.

So, tell me...Are you ready for a 21st-century job?

**TRABALHO E TECNOLOGIA****[Casey]**

Até agora, vimos como os megadados podem ampliar opções, influenciar o comportamento dos consumidores, e ajudar as empresas a lucrar mais. Também vimos como a inteligência artificial (IA) e a internet das coisas (IdC) podem nos ajudar a encontrar e resolver problemas mais significativos, desde logística a cuidados médicos.

Todos esses ganhos levantam alguns questionamentos: como isso afeta o trabalho em todo o mundo? Se as máquinas estão aprendendo a agir como humanos, o que restará para os humanos fazerem?

Seríamos muito ingênuos se não considerássemos os desafios subjacentes a esses ganhos, de um ponto de vista do mercado de trabalho. Para o que, nós, profissionais do século XXI, precisamos estar preparados se quisermos nos destacar profissionalmente em um mundo tão tecnológico assim?

**[Bruno]**

Se você olhar para o que é uma empresa, trata-se de tomada de decisões. E você ainda vê um nível de integração no qual aqueles que tomam decisões estão sendo substituídos por máquinas, certo? As próprias organizações vão se tornar um híbrido entre pessoas e machine learning (aprendizado de máquina), com máquinas contribuindo com suas próprias opiniões e suas próprias ideias sobre a direção das organizações.

Você pode produzir o suficiente para manter uma população sem participação plena na força de trabalho. Talvez tenhamos que abrir mão de todos os conceitos econômicos... pense em algo como o salário mínimo garantido...

Esse poder é iminente, mas, como eu disse, em 10, 15, 20 anos. Mas vai mudar a civilização.

**[Casey]**

Diante de tantas mudanças, precisamos aceitar que computação cognitiva, IA e empresas híbridas são uma realidade. Chegamos naquela parte do futuro que imaginamos há décadas, e não adianta negar isso. Precisamos apenas nos adaptar.

**[Mark]**

Pense nas empresas tradicionais, pense nos grandes bancos tradicionais, pense nas empresas tradicionais de mídia, no varejo tradicional – eu acredito que eles estão atrasados no uso de megadados. A boa notícia é que há muitas oportunidades para recuperar esse atraso e agir.

**[Casey]**

É difícil abandonar velhos hábitos. Mas, pela perspectiva do Mark, podemos inferir que manter tradição só vai atrasar as mudanças necessárias pelas quais empresas e trabalhadores terão de passar.

**[Bruno]**

Sempre temos que lembrar de exercitar a sabedoria e reconhecer a quantidade de poder que essa tecnologia tem para mudar o mundo. Ela está chegando, está acontecendo; nada vai impedi-la. Temos que nos familiarizar com ela, entendê-la; é uma questão tanto política e econômica quanto técnica.

**[Casey]**

Parece que um caminho possível para entender esse novo mercado de trabalho seria se atualizar sobre essas mudanças, saber mais sobre suas aplicações tecnológicas, e, talvez, participar ativamente do processo.

Devemos ter em mente que IA é uma coisa, mas consciência é outra. Uma máquina é incapaz de refletir sobre o que ela faz. Ela apenas faz o que foi ensinada a fazer, de acordo com as informações que recebeu de pessoas.

Isso significa que o mercado ainda precisa de pessoas que possam realmente pensar, que tenham um posicionamento crítico, e que possam interpretar dados. Eles também precisam de pessoas que possam refletir sobre seu próprio ponto de vista e trabalhar nos aspectos que precisam ser desenvolvidos. Estar disposto a crescer é uma característica dos humanos, não das máquinas.

Com base no que ouvimos dos nossos convidados, há todo um mercado em vários campos para pessoas que estão cientes da grandeza em potencial de toda essa tecnologia.

Então, me diga... Você está pronto para um trabalho do século XXI?

## Part 2.

# Vocabulary

You have already seen how much the advances in technology affect the job market. The hybrid world where machines and humans interact on a daily basis is here.

This means traditional habits need to be reviewed. To be successful, one should do more than just the basics and face the challenges that come with those changes. As Ray Davis, a successful businessman and the owner of the Texas Rangers baseball team, once said:

**“A challenge only becomes an obstacle when you bow to it.”**

Um desafio só se torna um obstáculo quando você se curva a ele.

**Ray Davis**

Since challenges are inherent to the work environment and to life, let's take a look at some constructions that can be formed with this word. For example:

**to face a challenge**

enfrentar um desafio

**to meet a challenge**

lidar com um desafio

**to rise to a challenge**

superar um desafio

These expressions make sense based on the perspective of someone managing the challenges they are coming across.

But there is also the opposite perspective, that is, situations that impose challenges on people. In this case, you can use the following expressions:

**to pose a challenge**

representar um desafio / ameaçar

**to provide a challenge**

proporcionar um desafio

There is a difference between the two previous expressions: **to pose a challenge** implies a negative kind of challenge, whereas **to provide a challenge** implies a positive endeavor, that forces one to leave one's comfort zone.

Now, let's put these expressions into context so you can better understand them:

**The training method provides one challenge at a time. This way, the trainees can meet them all.**

O treinamento proporciona um desafio de cada vez. Assim, os estagiários podem lidar com todos eles.

In the previous example, it becomes clear that the expressions convey a positive outcome.

Now, let's analyze another situation:

**Lucy's job is not very simple. She is facing the challenge of attracting investors to the project.**

O trabalho de Lucy não é muito simples. Ela está enfrentando o desafio de atrair investidores para o projeto.

**The economic crisis poses a challenge to that.**

A crise econômica representa um desafio para isso.

**However, she is a very competent professional, and I'm absolutely sure she'll rise to the challenge.**

No entanto, ela é uma profissional muito competente, e tenho absoluta certeza de que ela vai superar o desafio.

On the other hand, in this case, the examples show that Lucy is going through a difficult situation, and one hopes she'll be able to overcome it.

Now, a real challenge to some people in the work environment is to speak in public. There are several strategies that can help solve that.

One of them is to learn how to use the right words. In English, there are some expressions commonly used to introduce opinions. Take a look:

### INTRODUCING OPINIONS

**I think that...**

Eu acho que...

**From my perspective...**

Da minha perspectiva...

**From my point of view...**

Do meu ponto de vista...

**It seems that...**

Parece que...

Have a look at some examples:

**“It seems that a possible path toward understanding this new job market would be getting up to date with these changes.”**

Parece que um caminho possível para entender esse novo mercado de trabalho seria se atualizar com relação às mudanças.

**“From my perspective, big data is extremely large amounts of data.”**

Da minha perspectiva, megadados são quantidades enormes de dados.

**“I think someone like myself is much more interested in AI as a way to approach interesting scientific and medical problems.”**

Eu acho que alguém como eu está muito mais interessado em inteligência artificial como um meio de abordar problemas médicos e científicos interessantes.

**“I believe that they’re behind in the use of big data.”**

Eu acredito que elas estejam ficando para trás no uso de megadados.

In the last two examples, you saw the verbs **to think** and **to believe**. They are introducing opinions, and in that sense, you already know that they are **non-progressive verbs**.

But they can also be used in other contexts. Let’s start with the verb **to think**. You can say:

**I'm thinking about what you said before, and I see your point.**

Eu estou pensando sobre o que você disse antes, e entendo seu argumento.

In the previous example, the verb to think is the same as to ponder, to reflect on something. In this context, it is progressive.

Now, see an example with the verb **to believe**:

**Believe in yourself, or you won't be successful.**

Acredite em você mesmo, ou você não vai ser bem-sucedido.

In this case, **to believe** means to trust, to have faith. So, it is progressive.

All the expressions you have just seen can be used to introduce opinions that are based on what the speaker thinks. But it is also possible to draw attention to important points of a situation by making it clear that you are using **other people's perspectives and opinions**. Check it out:

**Based on Mark's perspective, we can assume that maintaining traditions will only delay changes.**

Com base na perspectiva do Mark, nós podemos supor que manter tradições só vai atrasar mudanças.

**From Mark's point of view, sticking to tradition delays changes.**

Do ponto de vista do Mark, ficar agarrado à tradição atrasa mudanças.

**Now you know how to talk about challenges and some introductory words to express your opinion.**

# Part 3.

# Vocabulary Activities

## A. Number the columns according to the translation of the words.

- |                                      |                             |                             |                            |
|--------------------------------------|-----------------------------|-----------------------------|----------------------------|
| ( 1 ) abordar                        | ( 7 ) se agarrar à tradição | ( ) path                    | ( ) to approach            |
| ( 2 ) desafio                        | ( 8 ) superar um desafio    | ( ) to rise to a challenge  | ( ) to pose a challenge    |
| ( 3 ) caminho                        | ( 9 ) lidar com um desafio  | ( ) to see somebody's point | ( ) to provide a challenge |
| ( 4 ) representar um desafio         | ( 10 ) mudanças             | ( ) changes                 | ( ) to delay               |
| ( 5 ) entender o argumento de alguém | ( 11 ) enfrentar um desafio | ( ) to stick to tradition   | ( ) challenge              |
| ( 6 ) proporcionar um desafio        | ( 12 ) atrasar              | ( ) to face a challenge     | ( ) to meet a challenge    |

## B. Fill in the blanks with the appropriate words according to the translation.

- a) “\_\_\_\_\_ a possible path toward understanding this new job market would be getting up to date with these changes.”

*Parece que um caminho possível para entender esse novo mercado de trabalho seria se atualizar com relação às mudanças.*

- b) \_\_\_\_\_, big data is extremely large amounts of data.

*Da minha perspectiva, megadados são quantidades enormes de dados.*

- c) \_\_\_\_\_ someone like myself is much more interested in AI as a way to approach interesting scientific and medical problems.

*Eu acho que alguém como eu está muito mais interessado em inteligência artificial como um meio de abordar problemas médicos e científicos interessantes.*

- d) \_\_\_\_\_ they're behind in the use of big data.

*Eu acredito que elas estejam ficando para trás no uso de megadados.*

- e) \_\_\_\_\_ yourself, or you won't be successful.

*Acredite em você mesmo, ou você não vai ser bem-sucedido.*

f) \_\_\_\_\_ Mark's perspective, we can assume that maintaining traditions will only delay changes.

**Com base** na perspectiva do Mark, nós podemos supor que manter tradições só vai atrasar mudanças.

## Activity A – Answers

1. to approach
2. challenge
3. path
4. to pose a challenge
5. to see somebody's point
6. to provide a challenge

7. to stick to tradition
8. to rise to a challenge
9. to meet a challenge
10. changes
11. to face a challenge
12. to delay

## Activity B – Answers

- a. It seems (that)
- b. From my perspective
- c. I think (that)
- d. I believe (that)
- e. Believe in
- f. Based on

# Notes

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

## Part 4.

# Grammar

You have seen a lot of grammar topics over the course of our lessons, and today, to wrap up this module, you are going to see a few more topics that are commonly used in our daily lives. One of them is used in this sentence, check it out:

From **Mark's** point of view, sticking to tradition delays changes.  
Do ponto de vista do Mark, ficar agarrado à tradição atrasa mudanças.

Note that the **apostrophe + "s" ('s)** indicates that the point of view being stated belongs to Mark. This is the **possessive case**.

You have probably already seen it in names of establishments everywhere in the world, usually names of bars, stores, and especially restaurants such as:

### POSSESSIVE CASE

**Johnny's Bar**  
Bar do Johnny

**Ms. McDougal's Diner**  
Restaurante da Senhora McDougal

The **possessive case** is not used just to name establishments. Actually, it is a frequently used way to **talk about possession**. So you could say, for example:

### POSSESSIVE CASE

**Lucy's job is not very simple.**  
O trabalho da Lucy não é muito simples.

**The director's office is upstairs.**  
O escritório do diretor fica no andar de cima.

**Peter's opinions are important to the company.**  
As opiniões do Peter são importantes para a empresa.

This way of talking about possession is really practical when you do not have a lot of context to know who owns the object. But, if you do have a context, using the **possessive adjectives** is probably the most natural way to express possession. Take a look at the examples:

### POSSESSIVE ADJECTIVES

Lucy's job is not very simple. Her boss is quite demanding.

O trabalho da Lucy não é muito simples. O chefe dela é bastante exigente.

In this case, we used the **possessive adjective her**, because you are referring to Lucy, who is a woman, in the singular. Basically, **the possessive adjective must correspond to the person who owns the item** you are talking about. For instance:

Here is a list of all the **possessive adjectives** organized according to their corresponding **subject pronoun**:

#### SUBJECT PRONOUN

#### POSSESSIVE ADJECTIVES

**I**

eu

**my**

meu(s), minha(s)

**you**

você

**your**

seu(s), sua(s)

**she**

ela

**her**

dela, seu(s), sua(s)

**he**

ele

**his**

dele, seu(s), sua(s)

**it**

ele, ela

**its**

dele, dela, seu(s), sua(s)

**we**

nós

**our**

nosso(s), nossa(s)

**you**

você(s)

**your**

seu(s), sua(s), de você(s)

**they**

eles, elas

**their**

deles, delas, seu(s), sua(s)

It is worth mentioning that the use of **possessive adjectives** is preferred, but just **when the context is clear**. And their function is **to avoid the repetition of terms in the speech**. Take a look at some examples:

### POSSESSIVE ADJECTIVES

**My job is great.**

Meu trabalho é ótimo.

**Our main purpose here is to learn together.**

Nosso principal objetivo aqui é aprendermos juntos.

**Your success depends on this project.**

O seu sucesso depende desse projeto.

O sucesso de vocês depende desse projeto.

**Peter's opinions are really important. His comments are always spot-on.**

As opiniões do Peter são muito importantes. Os comentários dele são sempre precisos.

**The company is famous for its results.**

A empresa é famosa pelos resultados dela.

**Peter and Lucy work together. Their office is Downtown.**

Peter e Lucy trabalham juntos. O escritório deles fica no Centro da cidade.

Now you know two ways of expressing possession.

Another way of avoiding repetition in the speech is by using **pronouns**. **Pronouns replace nouns**.

In chapter 2, you saw the **subject pronouns**, which are the ones that **replace the nouns when they function as the subject of the verb** in the sentence.

In this chapter, you will see the **object pronouns**, which are the ones that **replace the nouns when they function as the object of the verb** in the sentence. Let's see how to tell the **subject** and the **object** apart by analyzing some examples. Have a look:

## SUBJECT AND OBJECT

Tom writes emails every day.

subject

object

Tom escreve e-mails todos os dias.

Tom calls Valery once a week.

subject

object

Tom liga para Valery uma vez por semana.

Note that when you ask **who does the action**, you will find the **subject**. When you ask **what or who receives the action**, you will find the **object**.

The next step is learning the **pronouns** that function as **objects**. To do that, you have to relate **subject to object**, like this:

### SUBJECT PRONOUN

**I**

eu

**you**

você

**she**

ela

**he**

ele

**it**

ele, ela

### OBJECT PRONOUN

**me**

me, mim

**you**

te, você

**her**

lhe, a, ela

**him**

lhe, o, ele

**it**

lhe, o, a, ele, ela

**we**  
nós

**you**  
vocês

**they**  
eles, elas

**us**  
nos, nós

**you**  
os, vocês

**them**  
lhes, os, as, eles, elas

With that in mind, we can now **rephrase the sentences using their corresponding pronouns**. Take a look:

### SUBJECT PRONOUNS AND OBJECT PRONOUNS

Tom writes emails every day.  
He writes them every day.  
Eles os escreve todos os dias.

Tom calls Valery once a week.  
He calls her once a week.  
Ele liga para ela uma vez por semana.

In these examples, the focus was to show you the logic behind the correspondence of pronouns to their function in the sentence. The advantage of using pronouns so as to avoid repetition is not as clear because the sentences are out of context. And repetitions can only be avoided if we have context. And this is true when talking about **pronouns** as well as **possessive adjectives**.

Let's look at a situation so you can analyze the sentences based on a context. Check it out:

**Karen is very competent; she stands out in the company.**  
**Her training is really challenging, and people just love it!**  
Karen é muito competente; ela se destaca na empresa.  
O treinamento dela é bem desafiador, e as pessoas simplesmente o adoram!

Note the **subject pronoun she** referring to **Karen**. Right after that, there is the **possessive adjective her**, which also refers to **Karen**, avoiding repetition. That is, you do not need to say **Karen's** here. And finally, there is the **object pronoun it**, referring to **her training course**.

Context makes a difference when you are trying to understand what **subject pronouns**, **possessive adjectives**, and **object pronouns** refer to.

Pay attention to an important detail: in the previous situation, there are some words being used to **emphasize quality**. Check:

## INTENSIFIERS

The training is really challenging.

O treinamento é bem desafiador.

Karen is very competent.

Karen é muito competente.

**Really** and **very** intensify the adjectives challenging and competent, respectively.

It is **correct** to assume that if Karen is **very competent**, she has **a lot of competence**. However, it is **incorrect** to conclude that **to have a lot of money** is the same as **to have very money**.

**Very** is an **intensifier**, whereas **a lot of** is used to express quantity, so it is a **quantifier**: they are **not interchangeable**. Compare:

## QUANTIFIERS VS. INTENSIFIERS

I need a lot of time to do my job.

~~I need very time to do my job.~~

Eu preciso de muito tempo para fazer meu trabalho.

I need many hours to do my job.

~~I need very hours to do my job.~~

Eu preciso de muitas horas para fazer o meu trabalho.

You did a very/really good job.

~~You did a many good job.~~

Você fez um trabalho muito bom.

You have reached the end of this module. In this chapter, you learned how to use the **possessive case** and the **possessive adjectives** to talk about possession and to avoid repetition in your speech. You have also learned how to differentiate the **subject and objective pronouns**. If you want to learn more about these topics, you can refer to the Grammar Guide section at the end of your book.

# Grammar Activities

**A. Complete the table with the missing pronouns.**

## SUBJECT PRONOUN

**I**

*eu*

**you**

*você*

**c) \_\_\_\_\_**

*ela*

**he**

*ele*

**e) \_\_\_\_\_**

*ele, ela*

**f) \_\_\_\_\_**

*nós*

**you**

*vocês*

**they**

*eles, elas*

## OBJECT PRONOUN

**a) \_\_\_\_\_**

*me, mim*

**b) \_\_\_\_\_**

*te, você*

**her**

*lhe, a, ela*

**d) \_\_\_\_\_**

*lhe, o, ele*

**it**

*lhe, o, a, ele, ela*

**us**

*nos, nós*

**g) \_\_\_\_\_**

*os, vocês*

**h) \_\_\_\_\_**

*lhes, os, as, eles, elas*

**B. Fill in the blanks with the correct possessive adjective.**

a) \_\_\_\_\_ job is great.

*Meu trabalho é ótimo.*

b) Peter and Lucy work together. \_\_\_\_\_ office is Downtown.

*Peter e Lucy trabalham juntos. O escritório **deles** fica no Centro da cidade.*

c) \_\_\_\_\_ success depends on this project, Mary.

*O **seu** sucesso depende desse projeto, Mary.*

d) Peter's opinions are really important. \_\_\_\_\_ comments are always spot-on.

*As opiniões de Peter são muito importantes. Os comentários **dele** são sempre precisos.*

e) \_\_\_\_\_ main purpose here is to learn together.

*Nosso principal objetivo aqui é aprendermos juntos.*

f) The company is famous for \_\_\_\_\_ results.

*A empresa é famosa pelos resultados **dela**.*

**Activity A – Answers**

|        |         |
|--------|---------|
| a. me  | e. it   |
| b. you | f. we   |
| c. she | g. you  |
| d. him | h. them |

**Activity B – Answers**

|          |        |
|----------|--------|
| a. My    | d. His |
| b. Their | e. Our |
| c. Your  | f. its |

# Grammar

**Grammar Guide.**

# Guide

# Grammar Guide

## Adjectives

**Adjectives** are used to **describe things**. We can use adjectives to **describe objects, people, places, the weather, and food**, for example.

Adjectives **don't have singular or plural** forms or **feminine and masculine**, and they always **refer** to **nouns** or **pronouns**.

Adjectives are used mainly in **two positions**. In the **first one**, a noun or a pronoun is the **subject** of the sentence, followed by the **verb** and the **adjective**.

### ADJECTIVES

#### Subject + Verb + Adjective

**Mary is smart.**

Mary é esperta.

(subject: **Mary** + verb: **is** + adjective: **smart**)

**John is smart.**

John é esperto.

(subject: **John** + verb: **is** + adjective: **smart**)

**Mary and John are smart.**

Mary e John são espertos.

(subject: **Mary and John** + verb: **are** + adjective: **smart**)

The other **position** for adjectives is right **before** the **noun** to which they refer. In this case, we'll have a **determiner** (if necessary), the **adjective** and the noun.

Take a look:

### ADJECTIVES

#### (Determiner) + Adjective + Noun

**Mary has a great job.**

Mary tem um ótimo emprego.

(determiner: **a** + adjective: **great** + noun: **job**)

**John has a great job.**

John tem um ótimo emprego.

(determiner: **a** + adjective: **great** + noun: **job**)

**Mary and John have great jobs.**

Mary e John têm ótimos empregos.

(no **determiner** + adjective: **great** + noun: **job**)

In this **second** structure, it's possible to use a determiner or not. But what is a **determiner**?

A **determiner** can be an **article**, such as **the**, **a**, or **an**; a **demonstrative**, such as **this**, **that**, **these**, or **those**; or a **possessive adjective**, such as **my**, **your**, **his**, **her**, **its**, **our**, or **their**.

## DETERMINERS

### Article: the/a/an

Artigo: o(a) / um(a)

### Demonstratives: this; these / that; those

Pronomes demonstrativos: este(a), esse(a); estes(as) esses(as) / aquele(a); aqueles(as)

### Possessive adjectives: my / your / his / her / its / our / their

Pronomes possessivos: meu(s); minha(s) / teu(s); tua(s); seu(s); sua(s) / seu; sua; dele; dela / nosso(s); nossa(s) / seus; suas; deles; delas

Let's see some **examples** with **determiners before the adjective** and the noun.

## ADJECTIVES

(Determiner) + Adjective + Noun

Chris is the best student in the class.

Chris é o melhor aluno da sala.

(determiner: **the** + adjective: **best** + noun: **student**)

Look at those cute dogs!

Olha aqueles cachorros fofos!

(determiner: **those** + adjective: **cute** + noun: **dogs**)

Chocolate is my favorite dessert.

Chocolate é minha sobremesa favorita.

(determiner: **my** + adjective: **favorite** + noun: **dessert**)

It's **possible** to **use two or more** adjectives in a sentence. Look at the example:

## ADJECTIVES

Carnival is a beautiful big old festival.

O Carnaval é uma grande e bonita festa antiga.

(determiner: **a** + adjectives: **beautiful, big, and old** + noun: **festival**)

When you use **more than one** adjective in a **sentence**, there is an **order** to be followed. Check it out:

## ADJECTIVE ORDER

### 1<sup>st</sup> – Opinion

Example: **Amazing, beautiful, nice.**

Exemplo: Incrível, bonito(a), legal.

### 2<sup>nd</sup> – Size

Example: **Big, small, tall, short.**

Exemplo: Grande, pequeno(a), alto(a), baixo(a).

### 3<sup>rd</sup> – Physical characteristics

Example: **Thin, tall, short.**

Exemplo: Magro(a), alto(a), baixo(a).

### 4<sup>th</sup> – Shape

Example: **Round, square, rectangular.**

Exemplo: Redondo(a), quadrado(a), retangular.

### 5<sup>th</sup> – Age

Example: **Old and young.**

Exemplo: Velho(a) e novo(a).

### 6<sup>th</sup> – Color

Example: **Blue, red, yellow.**

Exemplo: Azul, vermelho(a), amarelo(a).

### 3<sup>rd</sup> – Physical characteristics

Example: **Japanese, Italian, American.**

Exemplo: Japonês(esa), Italiano(a), Americano(a).

### 8<sup>th</sup> – Material

Example: **Wooden, plastic, glass.**

Exemplo: De madeira, de plástico, de vidro.

### 9<sup>th</sup> – Type

Example: **General, specific.**

Exemplo: Geral, específico(a).

### 10<sup>th</sup> – Purpose

Example: **Cooking, cleaning, teaching.**

Exemplo: Para cozinhar, limpar, ensinar.

It's **not common** to use **many adjectives** for the **same noun**, but **it's possible**.

This is how **adjectives** are used in English.

# Grammar Guide

## Connectors

**Connectors** are words used to join other words, phrases, sentences, or paragraphs. They can be used to convey ideas of **addition**, **contrast**, **conclusion**, **logical consequence**, or **cause**, among others. Connectors help the flow of the speech both in written and spoken language.

In spoken language, it is natural to use fewer connectors, since the sentences tend to be shorter. But in written language, it is advisable to connect paragraphs and ideas in different ways.

It is important to be able to recognize the connectors when you see them in a text to understand the ideas they convey.

Let's see a few of them grouped according to their main ideas.

### CONNECTORS

#### Addition

**I need to study and write a paper for tomorrow.**

Eu preciso estudar e escrever um artigo para amanhã.

**The new quarterback played badly. In addition to that, he was rude during the press conference.**

O novo quarterback jogou mal. Além disso, ele foi grosseiro na coletiva de imprensa.

**The price is reasonable. Moreover, the location is perfect.  
The price is reasonable. Besides that, the location is perfect.**

O preço é justo. Além disso, a localização é perfeita.

Connectors are also used to **contrast ideas and information**.

## CONNECTORS

### Contrast

**The player had an injury during the game, but he played amazingly.**

O jogador sofreu uma lesão durante o jogo, mas jogou de maneira surpreendente.

**The player had an injury during the game; however, he played amazingly.**

O jogador sofreu uma lesão durante o jogo; no entanto, jogou de maneira surpreendente.

**Although she studied hard, she didn't pass the exam.**

**Though she studied hard, she didn't pass the exam.**

Embora ela tenha estudado muito, ela não passou na prova.

Some connectors sound **more formal** than others. Nonetheless, they convey the same idea.

## CONNECTORS

### Contrast

**Our vacations were great in spite of the bad weather.**

**Our vacations were great despite the bad weather.**

Nossas férias foram ótimas, apesar do mau tempo.

These are common connectors used to refer to **logical consequences** or **conclusions**.

## CONNECTORS

### Conclusion

**The product was damaged, so she asked for a refund.**

O produto estava danificado, então ela pediu um reembolso.

**Some clients reported bugs. Therefore, we'll have to release a new version to fix them.**

Alguns clientes relataram erros. Portanto, teremos que lançar uma nova versão para corrigi-los.

It's common to use connectors to explain **reasons** or a **cause**.

## CONNECTORS

### Reason

I read this book because my friend recommended it.

Eu li esse livro porque um amigo o recomendou.

The traffic is jammed due to the holiday.

O trânsito está engarrafado devido ao feriado.

As I had to arrive earlier at work, I didn't go to the gym.

Como eu tinha que chegar mais cedo ao trabalho, eu não fui à academia.

They decided not to go to the beach, since it was raining.

Eles decidiram não ir à praia, já que estava chovendo.

Now you know what **connectors** are and how to use them.

Remember that, in most cases, using one or the other is just a matter of choice.

However, one connector may be more appropriate than the other, and that depends on whether you are speaking or writing, or on how formal or informal the context is.

# Countable and Uncountable Nouns

**Nouns** can be either **countable** or **uncountable**.

**Countable nouns** are the ones that we can count and thus they have a plural form.

## COUNTABLE NOUNS

There's a cat in the garden.

Tem um gato no jardim.

(**a cat**: indefinite article + countable noun in the singular)

There are two cats at my front door.

Tem dois gatos na minha porta da frente.

(**two cats**: cardinal number + countable noun in the plural)

There were many cats at the adoption fair.

Havia muitos gatos na feira de adoção.

(**many cats**: quantifier + countable noun in the plural)

Before countable nouns we can use the **indefinite article** or **cardinal numbers** to specify the exact amount we are referring to.

However, if we don't know or don't want to mention an exact amount, we can also use **quantifiers** to express the idea of quantity. Some quantifiers can only be used with countable nouns, such as **few** to express **small quantities**, and **many** to express **large quantities**.

# Countable and Uncountable Nouns

Let's see an example in which we refer to people, which is a countable noun with irregular plural.

## COUNTABLE NOUNS

### Quantifiers

#### Small amount

There are few people at the beach.

Há poucas pessoas na praia.

#### Large amount

There are many people at the beach.

Há muitas pessoas na praia.

**Uncountable nouns** are the ones you cannot count, and for this reason they do not have a plural form.

Uncountable nouns are usually **abstract ideas, liquids, grains, gases,** or **natural phenomena**. As we usually treat uncountable nouns as singular nouns, we do not use the **indefinite article** with them, since the indefinite article means **one**.

It is important to notice that the concept of **countable and uncountable nouns** is present in several languages, but the words that are considered countable or uncountable may vary widely from one language to the other.

In English, the nouns **“travel,” “advice,” “information,” “baggage,”** and **“work”** are **uncountable**. However, if you need to count them, there are **some strategies** you can use.

# Countable and Uncountable Nouns

The first one is to use **countable nouns with a similar meaning**.

## UNCOUNTABLE AND COUNTABLE NOUNS

### Similar meanings

#### Uncountable

**travel**  
viagem

**baggage/luggage**  
bagagem

**work**  
trabalho

**advice**  
conselho

**money**  
dinheiro

#### Countable

**a journey/trip**  
uma jornada/viagem

**a bag/suitcase/backpack**  
uma bolsa/maleta/mochila

**a job/project/task**  
um trabalho/projeto / uma tarefa

**a recommendation**  
uma recomendação

**dollars/euros/reaais/yens**  
dólares/euros/reaais/ienes

This strategy may not work every time, though. You may not want to use a similar word, or maybe there isn't a similar word that fits the context.

In such cases, you can use a **quantifier**. The most frequent way to quantify uncountable nouns is to use either "**some**" or "**(a) piece of**" before these nouns.

The expression **piece of** can be **used with** not only the **indefinite article** (a piece of) meaning one, but also with **cardinal numbers** (two pieces of).

## UNCOUNTABLE NOUNS

### some and (a) piece of

#### Some + Uncountable Noun

Can you give me some advice?

Você pode me dar alguns conselhos?

# Countable and Uncountable Nouns

## Indefinite Article + Piece of + Uncountable Noun

Can you give me a piece of advice?

Você pode me dar um conselho?

## Cardinal Number + Piece of + Uncountable Noun

Can you give me two/three/four pieces of advice?

Você pode me dar dois/três/quatro conselhos?

Check some other examples with **some** and **a piece of** used with uncountable nouns.

## UNCOUNTABLE NOUNS

**some and (a) piece of**

**Equipment – some equipment; a piece of equipment; two pieces of equipment**

Equipamento – alguns equipamentos; um equipamento; dois equipamentos

**Furniture – some furniture; a piece of furniture; two pieces of furniture**

Móvel – alguns móveis; um móvel; dois móveis

**Information – some information; a piece of information; two pieces of information**

Informação – algumas informações; uma informação; duas informações

**News – some news; a piece of news; two pieces of news**

Notícia – algumas notícias; uma notícia; duas notícias

# Countable and Uncountable Nouns

Regarding **moods and feelings**, it's **not** possible to use **a piece of**, but it's possible to use **quantifiers**, such as **much**, **some**, or **little**.

## UNCOUNTABLE NOUNS

### Quantifiers

**I've been under too much pressure lately.**

Tenho estado sob muita pressão ultimamente.

**I feel a bit frustrated, but I see some hope for the future.**

Eu me sinto um pouco frustrado, mas vejo alguma esperança no futuro.

**I'd gladly accept a little help from my friends.**

Eu aceitaria de bom grado um pouco de ajuda dos meus amigos.

When referring to **gases**, **grains**, and **liquids**, we can **count** them by using a unit of **measurement**, such as **kilos**, **liters**, or **ounces**. We can also count the **containers** in which they have been packed.

## UNCOUNTABLE NOUNS

### Units of measurement or containers

**Water – liters/bottles/gallons of water**

Água – litros/garrafas/galões de água

**Rice – kilos/pounds/packs of rice**

Arroz – quilos/libras/sacos de arroz

**Sugar – cubes/spoons/cups of sugar**

Açúcar – torrões/colheres/xícaras de açúcar

Now you know the most frequent **countable and uncountable nouns** and how they can be quantified.

# Grammar Guide

## Imperative

The **imperative form** is used to tell people what to do and for this reason it **does not** have an interrogative form. The Imperative is only used in the **affirmative** and **negative** forms.

### IMPERATIVE FORM

#### Structure

#### Affirmative Form

**Main Verb in the Base Form + Complement**

Go there.

Vá lá.

#### Negative Form

**Auxiliary Verb Do + Not (Don't) + Main Verb in the Base Form + Complement**

Don't come here.

Não venha aqui.

In English, the imperative performs many functions. It can be used to **give orders** or to **demand something**, to **instruct**, to **give advice** or **recommendation**, or to **encourage** someone.

### IMPERATIVE FORM

#### Functions

#### 1. Order; demand

Open your book.

Abra o seu livro.

Don't get in.

Não entre.

#### 2. Instructions

Mix the ingredients and add salt.

Misture os ingredientes e adicione sal.

Don't put too much salt.

Não coloque muito sal.

## 3. Advice, suggestions

**Have a cup of tea and rest.**  
Tome uma xícara de chá e descanse.

**Don't forget to take your coat.**  
Não se esqueça de levar seu casaco.

## 4. Requests; favors

**Bring it to me, please.**  
Traga isso para mim, por favor.

**Don't tell John, please.**  
Não conte para o John, por favor.

## 5. Encouragement

**Try again! You can do it.**  
Tente novamente! Você consegue.

**Don't give up. You can do it.**  
Não desista. Você consegue.

Imperative sentences are always addressed to the listener or listeners. So, the **subject** is always in the **second person**, which is “**you**,” in the singular or plural forms. For that reason, in most imperative sentences, the subject is **omitted**.

However, the subject can be included in imperative sentences to **add emphasis** to the action. In such cases, it will be placed **before the main verb**, in both affirmative and negative sentences.

## IMPERATIVE FORM

### Using the Subject to Add Emphasis

#### Affirmative Form

**Subject (second person) + Main Verb in the Base Form + Complement**

**You sit down now.**  
Sente-se agora.

#### Negative Form

**Auxiliary Verb Do + Not (Don't) + Subject (second person) + Main Verb in the Base Form + Complement**

**Don't you lie to me.**  
Não minta para mim.

In English, we can only use the **imperative form** to address the person or people to whom we are talking. But if we want to make suggestions or requests in the **first person**, we can use the verb **let** in the imperative.

We'll use the **verb let** in the **imperative form**, the **object pronoun** for the **first person**, which is either "me" or "us," a **verb** in the **infinitive form** (without to), and the **complement**.

## INDEFINITE ARTICLE

### Making Suggestions or Requests in the First Person

**Let (Imperative Form) + Object Pronoun in the First Person (me/us) + Verb in the Infinitive Form (without "to")**

**Let me see.**

Deixe-me ver.

**Let me help you.**

Deixe-me ajudá-lo.

**Let's meet tomorrow. (Let's → Let us)**

Vamos nos encontrar amanhã.

**Let's watch a movie tonight. (Let's → Let us)**

Vamos assistir a um filme hoje à noite.

We can use the **same structure** to **make suggestions or requests** for a **third person**. To do that, we just have to use the **object pronouns** in the **third person**.

## IMPERATIVE FORM

### Making Suggestions or Requests for a Third Person

**Let (Imperative Form) + Object Pronoun in the Third Person (him/her/it/them) + Verb in the Infinitive Form (without "to")**

**Let it go.**

Deixe isso para lá.

**Let him stay.**

Deixe-o ficar.

**Let them talk.**

Deixe-os falar.

And this is how we use the **imperative** in English.

# Grammar Guide

## Infinitive Form

The infinitive form of the verb is the verb in its base form. In English, the infinitive form is preceded by the particle “to.”

Have a look at some examples of verbs in the infinitive form:

### INFINITIVE FORM

**To eat**  
Comer

**To go**  
Ir

**To study**  
Estudar

**To speak**  
Falar

**To travel**  
Viajar

**To work**  
Trabalhar

Just like it happens in most languages, the infinitive form is used in several instances in English. One of the most common uses of the **infinitive** in English is to **follow other verbs**.

### VERB + INFINITIVE

**We want to travel next month.**

Nós queremos viajar mês que vem.

(verb: **want** in the simple present + infinitive: **to travel**)

**She needs to study for the exam.**

Ela tem que estudar para a prova.

(verb: **need** in the simple present + infinitive: **to study**)

**Did you have to work last week?**

Você teve que trabalhar semana passada?

(verb: **have** in the simple past interrogative + infinitive: **to work**)

And the **infinitive form** is also frequently used **after some adjectives**.

## ADJECTIVE + INFINITIVE

I'm happy **to see** you!

Eu estou feliz em ver você!  
(adjective: **happy** + infinitive: **to see**)

You are not allowed **to stay** here.

Você não tem permissão para ficar aqui.  
(adjective: **allowed** + infinitive: **to stay**)

I'm ready **to start**.

Estou pronto para começar.  
(adjective: **ready** + infinitive: **to start**)

All of these sentences have examples of verbs in the infinitive form, which is also called to-infinitive, because it is composed of two words in English: **the particle to + the verb**.

But in English we also use the **bare infinitive**, which is the verb in the infinitive form, but not preceded by the particle "to." This is how verbs appear in the dictionary, and it's also used after some verbs.

## VERB + BARE INFINITIVE

They watched me **do** the job before they tried it.

Eles me viram fazer o trabalho antes de tentarem.  
(verb: **watch** in the simple past + object: **me** + bare infinitive **do**)

We can't **travel** with you this weekend.

Nós não podemos viajar com vocês neste fim de semana.  
(modal verb **can** in the negative + bare infinitive **travel**)

They will **finish** this job tomorrow.

Eles vão terminar esse trabalho amanhã.  
(modal verb **will** + bare infinitive **finish**)

And this is how we use the **infinitive form** in English.

# Grammar Guide

## Intensifiers

**Intensifiers** are words, adverbs, or adverbial phrases used to **intensify** the meaning of other words and expressions—such as verbs, adjectives, and other adverbs—and to show **emphasis**.

### INTENSIFIERS

It's a really interesting topic.

É um tema realmente interessante.

(The adverb “really” emphasizes the fact that I find it interesting.)

(O advérbio “realmente” enfatiza o fato de eu achar interessante.)

In English, **very** is the **most common intensifier**, and it can be combined with a great variety of adjectives. It is important to highlight, though, that when we use strong adjectives such as **huge**, **gorgeous**, and **awful**, for example, we **do not** use **very** before them.

These adjectives are called **strong or extreme adjectives**, and they **already contain the idea of “very” in their definitions**.

### INTENSIFIERS

#### Very + Standard Adjectives

#### very + adjective

**very big**  
muito grande

**very beautiful**  
muito bonito(a)

**very bad**  
muito ruim

#### strong adjective/adverb

**huge**  
enorme

**gorgeous**  
lindo(a)

**awful**  
horível

#### very + adjective

**very good**  
muito bom

**very nice**  
muito legal

**very clear**  
muito claro

#### strong adjective/adverb

**excellent**  
excelente

**amazing**  
incrível

**obvious**  
óbvio

But it is possible to **emphasize strong adjectives**. You cannot use **very** before strong adjectives, but it's possible to combine them with some other intensifiers, such as **absolutely**, **completely**, **quite**, or **really**.

## INTENSIFIERS

### Strong adjectives

This boat is really huge.

Esse barco é realmente enorme.

(The intensifier “really” was used to emphasize the strong adjective “huge”)

Mary is absolutely gorgeous.

Mary é absolutamente linda.

(The intensifier “absolutely” was used to emphasize the strong adjective “gorgeous”)

It's quite awful.

Isso é bem horrível.

(The intensifier “quite” was used to emphasize the strong adjective “awful”)

To **intensify comparatives**, we can use **a lot** or **much**, for example.

## INTENSIFIERS

### Comparatives

Paris is a lot prettier than I thought.

Paris é muito mais bonita do que eu pensava.

This hotel is much more expensive.

Este hotel é muito mais caro.

If we want to **intensify superlatives**, we can use **by far**, for example.

## INTENSIFIERS

### Superlatives

This experience was by far the most interesting.  
Esta experiência foi de longe a mais interessante.

There are other intensifiers. In **negative** sentences, **at all** is a common intensifier. And, with **WH questions** (questions containing question words), the expression **on earth** can be used as an intensifier. When that happens, it usually **suggests disapproval**.

## OTHER INTENSIFIERS

I'm not worried at all.  
Não estou nem um pouco preocupado.

What on earth is happening here?  
Que diabos está acontecendo aqui?

And now you know some ways to express emphasis  
using different **intensifiers** in English.

# Grammar Guide

## Modal Verb Can

**Modal verbs** function as **auxiliary verbs**, adding meaning to the main verb. Modal verbs express **possibility, probability, ability, permission, assumption, obligation**, or **prohibition**.

Modal verbs have the same sentence structure. In the **affirmative**, the structure is the **subject**, the **modal verb** followed by the **main verb** in the base form, and it **can** be followed by a **complement** or **not**.

### MODAL VERBS

#### Affirmative Form

I can drive.

Eu posso dirigir.

(subject: I + modal verb: **can** + main verb: **drive**)

I can play the piano.

Eu posso tocar piano.

(subject: I + modal verb: **can** + main verb: **play** + complement: **the piano**)

In **negative sentences**, we keep the same pattern, but include **NOT** after the modal verb. We generally use the contracted form **can't**.

### MODAL VERBS

#### Negative Form

I can't drive.

Eu não posso dirigir.

(subject: I + modal verb: **can** + **not (can't)** + main verb: **drive**)

I can't play the piano.

Eu não posso tocar piano.

(subject: I + modal verb: **can** + **not (can't)** + main verb: **play** + complement: **the piano**)

In interrogative sentences, we invert the position of the **modal verb** and the **subject**. The structure is the **modal verb**, the **subject**, the **main verb** in the base form, and a **complement**, when necessary.

## MODAL VERBS Interrogative Form

Can you drive?

Você pode dirigir?

(modal verb: **can** + subject: **you** + main verb: **drive**)

Can you play the piano?

Você pode tocar piano?

(modal verb: **can** + subject: **you** + main verb: **play** + complement: **the piano**)

The **modal verb** can in its affirmative form **typically expresses possibility, present ability, and permission**. In the negative form, it expresses **lack of possibility, lack of ability, and lack of permission**.

## MODAL VERBS Uses

### Affirmative

#### Possibility

**I can meet you later.**

Eu posso te encontrar mais tarde.

#### Present Ability

**I can dance very well.**

Eu posso/sei dançar muito bem.

#### Permission

**You can come in.**

Você pode entrar.

### Negative

#### Lack of Possibility

**I can't meet you later.**

Eu não posso te encontrar mais tarde.

#### Lack of Ability

**I can't dance very well.**

Eu não posso/sei dançar muito bem.

#### Lack of Permission

**You can't come in.**

Você não pode entrar.

As for the **interrogative form**, the modal verb **can** is typically used to **make requests**. It's used to **ask for favors** and for **permission**, or to ask about the **possibility** of **something** happening.

## MODAL VERB CAN

### Uses

#### Interrogative

##### Asking a Favor

Can you help me?

Eu não posso te encontrar mais tarde.

##### Asking for Permission

Can I come in?

Eu não posso/sei dançar muito bem.

##### Asking about Possibility

Can we meet after work?

Você não pode entrar.

It's **important** to acknowledge that these **uses** are usually easily **noticed** within the **context**, since the **same sentence** in **different contexts** may have **different meanings**.

## MODAL VERB CAN

### Contexts

**You can speak English.**

Você pode/sabe falar inglês.

**You have the ability to speak English.**

Você tem habilidade para falar inglês.

**It's possible for you to speak English in a certain situation.**

É possível que você fale inglês em determinada situação.

**You have permission to speak English in a certain situation.**

Você tem permissão para falar inglês em determinada situação.

And this is how you use the modal verb **can**.

# Grammar Guide

## Nouns

**Nouns** are **used** to **refer to people or things**. They **vary in number**, which means they have **singular and plural** forms.

### NOUNS

#### Singular and Plural

My cat is lazy.

Meu gato é preguiçoso.

My cats are lazy.

Meus gatos são preguiçosos

There are **countable** and **uncountable** nouns. The noun “**cat**” is **countable**, since you can count cats and **quantify** them, such as in “one cat,” “two cats,” “three cats,” and so on.

And there are **uncountable nouns**, which means that we **cannot** use numbers to **quantify** them. Let’s take the noun “**water**” as an example. We **don’t** say “one water,” “two waters,” “three waters,” etc.

However, we can express an **amount** by using **quantifiers** such as a lot of.

Check it out:

### NOUNS

#### Countable and Uncountable

I have three cats.

Eu tenho três gatos.

(countable noun = there are singular and plural forms)

It’s important to drink a lot of water.

É importante beber muita água.

(uncountable noun = there is no plural form)

Although it's **not** common in English, **nouns may vary** in **gender**, which means that they will have a different form when referring to **male** or **female** people or animals.

Most nouns in English do not vary in gender, as it happens to the noun “**student**.” But others do, such as the nouns “**actor**” and “**actress**.” Yet, it is worth noting that nowadays neutral forms are usually preferred.

## NOUNS Gender variation

John is a good student.

John é um bom aluno.

Mary is a great student.

Mary é uma boa aluna.

(The noun “student” doesn’t vary in gender: whether referring to male or female, it remains the same).

John is a good actor.

John é um bom ator.

Mary is a great actress.

Mary é uma boa atriz.

(The noun “actor” varies in gender: We use “actor” to refer to men and “actress” for women).

**Nouns** can be **classified** as **proper** or **common**.

**Proper nouns** are the **names** of **people**, **pets**, or **places**, for example.

They are **capitalized**, and in **most cases**, **not** preceded by **articles**.

## NOUNS Proper Nouns

### People's Names

George  
John  
Mary  
Kate

### Pets' Names

Max  
Bella  
Archie  
Luna

### Names of Places

Brazil  
New York  
London  
Hollywood

**Common nouns** are used to designate generic people, animals, things, or ideas.

## NOUNS Common Nouns

### People

**child**  
criança

**man**  
homem

**student**  
estudante

### Animals

**dog**  
cachorro

**cat**  
gato

**bird**  
pássaro

### Things/Places

**house**  
casa

**city**  
cidade

**country**  
país

### Ideas/Feelings

**love**  
amor

**security**  
segurança

**opinion**  
opinião

It is also possible to classify nouns as **concrete** or **abstract**.

**Concrete nouns** refer to things we can touch or see, material objects, whereas **abstract nouns** refer to things that are **not** material, such as feelings, emotions, situations, and ideas.

## NOUNS Concrete and Abstract

### Concrete Nouns

**phone**  
telefone

**table**  
mesa

**food**  
comida

### Abstract Nouns

**freedom**  
liberdade

**dream**  
sonho

**passion**  
paixão

Now you know what a **noun** is, its characteristics, and some categories.

# Grammar Guide

## Object Pronouns

There are two types of **personal pronouns** in English: personal pronouns used in the subject position, which, for that reason, are called **subject pronouns**, and personal pronouns used in the object position, which are called **object pronouns**.

Check the following table to see the subject and object pronouns.

| PERSONAL PRONOUNS      |                                                 |                                               |
|------------------------|-------------------------------------------------|-----------------------------------------------|
|                        | Subject Pronouns<br>(Replace nouns as subjects) | Object Pronouns<br>(Replace nouns as objects) |
| First person singular  | I<br>eu                                         | me<br>me/mim                                  |
| Second person singular | you<br>tu/você                                  | you<br>te/ti/você/lhe                         |
| Third person singular  | he<br>ele                                       | him<br>ele/o/lhe                              |
|                        | she<br>ela                                      | her<br>ela/a/lhe                              |
|                        | it<br>ele/ela                                   | it<br>ele/ela/o/a/lhe                         |
| First person plural    | we<br>nós                                       | us<br>nos/nós                                 |
| Second person plural   | you<br>vós/vocês                                | you<br>vos/vocês/lhes                         |
| Third person plural    | they<br>eles/elas                               | them<br>eles/elas/os/as/lhes                  |

# Object Pronouns

**Object pronouns** are usually placed **after the main verb** of the sentence, since they function as the object of these verbs. They might not be placed immediately after the main verb, but they will always come after it. The only exception to this rule is when they are used in certain expressions such as **both of us**, **all of them**, **none of you**, etc. In such situations, they can be part of the subject of a sentence.

Let's now take a closer look at each object pronoun.

Some languages present variations of the object pronouns used depending on the verb they are complementing. But that won't happen in English.

The **first-person** pronouns used in the position of the object of the sentence will always be **me** for the singular and **us** for the plural.

## OBJECT PRONOUN

### First Person Singular

Tell me. What is your problem?

Conte-**me**. Qual é o seu problema?

Read this story to me, please!

Leia esta história para **mim**, por favor!

Do you want to talk to me?

Você quer falar **comigo**?

## OBJECT PRONOUN

### First Person Plural

Tell us about your day.

Conte-**nos** sobre o seu dia.

Are they talking about us?

Eles estão falando sobre **nós** / **a gente**?

Do you want to go to the movies with us?

Você quer ir ao cinema **conosco** / com **a gente**?

# Object Pronouns

For the **second person**, the personal pronoun used as the object pronoun is the same used as the subject pronoun: **you**. And it is used for both **singular** and **plural**. Therefore, the context tells us if **you** will be referring to singular or plural.

## OBJECT PRONOUN Second Person Singular/Plural

**I'll help you.**

Eu vou te ajudar. / Eu vou ajudar você. / Eu vou lhe ajudar. /  
Eu vou ajudar vocês/ Eu vou lhes ajudar.

**I don't understand you.**

Eu não te entendo. / Eu não entendo você. /  
Eu não entendo vocês.

When we read these sentences, it's not clear if we are using you to refer to one or to more people, that is, singular or plural. Especially because they are isolated sentences.

In spoken language, chances are the context will make it clear, since you is used to refer to the person or to the people you are talking to. Either way, you can make it clearer that you are using the plural form by combining **you** with other words, for example: **you people**, **you all**, or **you both**.

## OBJECT PRONOUN Second Person Plural

**I'll help you people / you all / you both.**

Eu vou ajudar vocês / vocês todos / vocês dois.

The **third person singular object pronouns** used for people are: **him** for masculine and **her** for feminine. Both are used mostly for people.

## OBJECT PRONOUN Third Person Singular (Him/Her)

**Mike's son looks just like him.**

O filho do Mike se parece muito com ele.

(The object pronoun him refers to "Mike," a male noun,  
and it's the object of the sentence.)

**My sister is an amazing person. I love to talk to her.**

Minha irmã é uma pessoa incrível. Eu adoro conversar com ela.

(We used the object pronoun her to replace the female noun "my sister.")

# Object Pronouns

There's still another **third person singular object pronoun** that is used for the other cases: the **pronoun it**. This personal pronoun will also have the same form when used as the subject or as the object pronoun.

## OBJECT PRONOUN Third Person Singular (It)

I don't understand this topic. → I don't understand it.

Eu não entendo este tópico. → Eu não entendo (isto).

I love chocolate cake. → I love it.

Eu adoro bolo de chocolate. → Eu adoro (isso).

I'm watching this show. → I'm watching it.

Estou assistindo a este programa. → Estou assistindo (a isto).

In the **third person plural**, we'll use **they** as the **subject pronoun**, and **them** as the **object pronoun**. In the plural, we will use the same pronoun to refer to people, places, objects, animals, or any other third person plural reference.

## OBJECT PRONOUN Third Person Plural (Them)

I'm going to the beach with my friends. → I'm going to the beach with them.

Estou indo à praia com meus amigos. → Estou indo à praia com eles.

(The object is "my friends," and it's in the plural, so we could replace it with the object pronoun **them**.)

I don't know those people. → I don't know them.

Eu não conheço aquelas pessoas. → Eu não as conheço. / Eu não conheço elas.

(To avoid repetition, we can replace the object "those people" for the object pronoun **them**.)

I like these shoes. → I like them.

Eu gosto destes sapatos. → Eu gosto deles.

(The object of the sentence is "these shoes." To avoid repetition, we can use the object pronoun **them**.)

And now you know more about **object pronouns**.

# Grammar Guide

## Plural Nouns

**Plural nouns** are words that show there is **more than one** person, animal, thing, place, or idea, and, because of that, they require verbs in the plural.

### PLURAL NOUNS

#### Singular

Her daughter is beautiful.  
A filha dela é bonita.

#### Plural

Her daughters are beautiful.  
As filhas dela são bonitas.

In English, as a general rule to **form the plural** of nouns, in **most cases** you simply **add -S** at the end of the noun.

### PLURAL NOUNS

General Rule: Add -S

#### Singular

**cat**  
gato

**bike**  
bicicleta

**car**  
carro

#### Plural

**cats**  
gatos

**bikes**  
bicicletas

**cars**  
carros

For **nouns ending in -S, -X, -Z, -SH, and -CH**, add **-ES** at the end.

## PLURAL NOUNS

Nouns ending in **-S, -X, -Z, -SH, -CH**: add **-ES**

### Singular

**bus**  
ônibus

**tax**  
imposto

**watch**  
relógio

### Plural

**buses**  
ônibus

**taxes**  
impostos

**watches**  
relógios

The **nouns ending in -O** can either **have** their **plural form ending in -S or -ES**, and some can be spelled either way. As a **general rule**, we **add -S** to make the plural of most nouns ending in -O.

## PLURAL NOUNS

Nouns ending in **-O**

### Add -S

**piano**  
piano      **pianos**  
pianos

**studio**  
estúdio      **studios**  
estúdios

### Add -ES

**tomato**  
tomate      **tomatoes**  
tomates

**potato**  
batata      **potatoes**  
batatas

**hero**  
herói      **heroes**  
heróis

### Add -S or -ES

**mango**  
manga      **mangos/mangoes**  
mangas

**volcano**  
vulcão      **volcanos/volcanoes**  
vulcões

**tornado**  
tornado      **tornados/tornadoes**  
tornados

Nouns ending in **-F** or **-FE** will present **variations** in the **plural form** as well. In **most cases**, we **replace the end with -VES**. However, some cases follow the **general rule** for plural, and **-S** is **added at the end**.

## PLURAL NOUNS

Nouns ending in **-S, -X, -Z, -SH, -CH**: add **-ES**

### Replace **-F** or **-FE** with **-VES**

wife                      wives  
esposa                      esposas

wolf                      wolves  
lobo                      lobos

### Add **-S**

sheriff                      sheriffs  
xerife                      xerifes

giraffe                      giraffes  
girafa                      girafas

For nouns ending in **-Y**, check if the **-Y** is preceded by a **consonant** or a **vowel**, because this is what will define the plural form.

For the **nouns** ending in **consonant + Y**, drop the **-Y** and add **-IES**. As for the ones ending in **vowel + Y**, just add **-S**.

## PLURAL NOUNS

Nouns ending in **-Y**

### Consonant + Y Replace **-Y** with **-IES**

city – cities  
cidade – cidades

lady – ladies  
senhora – senhoras

### Vowel + Y Add **-S**

boy – boys  
menino – meninos

day – days  
dia – dias

There are **some nouns** that have an **irregular plural form**. In these cases, the nouns may have their basic form **completely changed**. The ones most used are in the following table.

## PLURAL NOUNS

### Irregular Plural Forms

#### Singular

**child**  
criança

**person**  
pessoa

**woman**  
mulher

**man**  
homem

#### Plural

**children**  
crianças

**people**  
pessoas

**women**  
mulheres

**men**  
homens

#### Singular

**tooth**  
dente

**foot**  
pé

**mouse**  
camundongo

**goose**  
ganso

#### Plural

**teeth**  
dentes

**feet**  
pés

**mice**  
camundongos

**geese**  
gansos

There are also **some nouns** that have the **same form** for the **singular and plural**. In these cases, we'll understand if it's singular or plural by the context.

## PLURAL NOUNS

### Nouns that keep the same form

I'd like fish and chips, please.  
Quero peixe e fritas, por favor.

We saw some beautiful fish when we were scuba diving.  
Vimos alguns peixes bonitos quando estávamos mergulhando.

Now you know some rules and how to use the **plural**.  
But remember: When in doubt, research!

## Possessive Adjectives

**Possessive adjectives** are always used before a noun, and they determine who possesses the noun to which they refer.

### POSSESSIVE ADJECTIVES

#### my dog

meu cachorro

(It's not your dog or his dog, it is my dog)

#### our house

nossa casa

(It's not a house or a beautiful house, it is our house)

#### their books

os livros deles

(It's not just any book, it is their books)

Take a look at the following table to see all the **possessive adjectives** in English.

### POSSESSIVE ADJECTIVES

|                      | Singular                                      | Plural                                   |
|----------------------|-----------------------------------------------|------------------------------------------|
| <b>First person</b>  | <b>My</b><br>meu(s), minha(s)                 | <b>Our</b><br>nosso(s), nossa(s)         |
| <b>Second person</b> | <b>Your</b><br>teu(s), tua(s), seu(s), sua(s) | <b>Your</b><br>seus, suas, de vocês      |
| <b>Third person</b>  | <b>His</b><br>seu(s), sua(s), dele            | <b>Their</b><br>seus, suas, deles, delas |
|                      | <b>Her</b><br>seu(s), sua(s), dela            |                                          |
|                      | <b>Its</b><br>seu(s), sua(s), dele, dela      |                                          |

# Possessive Adjectives

It is important to notice that **possessive adjectives** in English **do not** suffer **number or gender variations** according to the nouns to which they are referring, as opposed to what happens in several other languages.

That means that the possessive adjectives will keep the same form whether they are referring to a **singular noun** or to a **plural noun**, as well as to a **masculine**, **neutral**, or **female** noun.

Let's take a closer look at each one of them.

For the **first person**, we'll use the possessive adjective **my** in the singular or **our** in the plural.

## POSSESSIVE ADJECTIVES First Person (singular and plural)

This is my dog.  
Este é o **meu** cachorro.

These are my daughters.  
Estas são **minhas** filhas.

That is our house.  
Aquele é **nossa** casa.

Those are our sons.  
Aqueles são **nossos** filhos.

For the **second person**, we'll use **your**. This possessive adjective will be **the same** for both the **singular** and **plural forms**, and only the **context** will make it clear if we are referring to one or more owners.

## POSSESSIVE ADJECTIVES Second Person

Is this cute boy your son?  
Este menino fofo é seu/teu filho?  
Este menino fofo é filho de vocês?

# Possessive Adjectives

When we express possession referring to the **third person, singular** or **plural**, we can use the **possessive case** or the **possessive adjectives his, her, its** in the singular, or **their** in the plural.

The possessive case might be preferred if it is not clear in the context to whom we are referring.

## POSSESSIVE CASE

**I'm going to Jeff's birthday party.**

Eu estou indo à festa de aniversário do Jeff.

(Jeff's name wasn't mentioned before, so the possessive case is used because it makes it clear whose birthday party it is.)  
(O nome do Jeff não havia sido mencionado anteriormente, então usa-se o possessive case porque ele deixa claro de quem é a festa de aniversário.)

If the context makes it clear to whose party we are referring, we can replace the **possessive case** with a third person **possessive adjective**.

## POSSESSIVE ADJECTIVE

**Jeff is my best friend. I'm going to his birthday party.**

Jeff é o meu melhor amigo. Eu estou indo à sua festa de aniversário.

For the **third person singular**, we'll use the possessive adjectives **his** for a **masculine** owner, **her** for **feminine**, and, for **other cases**, we will use **its**.

## POSSESSIVE ADJECTIVES

### Third Person Singular

**George is traveling with his wife.**

George está viajando com a sua esposa / a esposa dele.

(We used "his" because we are talking about George's wife, and George is a man.)  
(Usamos his porque estamos nos referindo à esposa do George, e George é um homem.)

# Possessive Adjectives

**Paula is traveling with her husband.**

Paula está viajando com o seu marido / o marido dela.

(We used “her” because we are talking about Paula’s husband, and Paula is a woman.)

(Usamos her porque estamos nos referindo ao marido da Paula, e Paula é uma mulher.)

**Don’t use this computer. Its keyboard is not working.**

Não use este computador. Seu teclado / O teclado dele não está funcionando.

(We used “its” because we are talking about the computer keyboard, which is an object.)

(Usamos its porque estamos nos referindo ao teclado do computador, que é um objeto.)

In the third person **plural**, we will use **their** regardless of the gender.

## POSSESSIVE ADJECTIVES

### Third Person Plural

**George and Paula are traveling with their son.**

George e Paula estão viajando com o seu filho / o filho deles.

**The kids are playing with their toys.**

As crianças estão brincando com os seus brinquedos / os brinquedos delas.

And this is how we use the **possessive adjectives** in English.

# Grammar Guide

## Possessive Case

The **possessive case** is used in English to **express possession**, as well as interpersonal relationships, such as **family, friendship**, or **hierarchic relationships**.

The structure of the possessive case is the following:

### POSSESSIVE CASE ('S)

- ( 1 ) Noun identifying who owns something
- ( 2 ) Particle that identifies the possession or relationship ('s)
- ( 3 ) Noun identifying the element that is possessed

(1) (2) (3)  
**These are Mary's shoes.**  
Estes são os **sapatos da Mary**.

(1) (2) (3)  
**That is Julia's cat.**  
Aquele é o **gato da Julia**.

(1) (2) (3)  
**This is Martin's son.**  
Este é o **filho do Martin**.

(1) (2) (3)  
**Mr. Johnson is Karen's boss.**  
Sr. Johnson é o **chefe da Karen**.

There are situations in which **more than one person** will be identified as the **owner** of an object or animal, or even some sort of relationship. In such cases, we may identify each of these people, but there are two different ways to build this structure.

In the **first situation** we're going to explore, there is only one object that is shared by two or more people, so we don't repeat the apostrophe + S indicating possession; that means we'll use it only once, after the last noun.

## POSSESSIVE CASE

**One element → two or more owners**  
**One apostrophe + s ('s) after the last noun**

**This is Peter and John's bedroom.**

Este é o **quarto do Peter e do John.**

(There is only one bedroom owned by Peter and John)

(Há apenas um quarto que pertence a Peter e John)

**Molly is Carol and Tom's daughter.**

A Molly é **filha da Carol e do Tom.**

(Both Carol and Tom are Molly's parents)

(Tanto Carol quanto Tom são pais da Molly)

In the other situation, there is **more than one object** that belongs to **different people**. In this case, we'll **repeat** the apostrophe + S indicating possession after each person.

## POSSESSIVE CASE

**Two or more elements → two or more owners**  
**One apostrophe + s ('s) after each person**

**These are Peter's and John's beds.**

Estas são as **camas do Peter e do John.**

(There are two beds: one belongs to Peter and the other, to John)

(Há duas camas: uma pertence a Peter, e a outra, a John)

**These are Peter's and John's bikes.**

Estas são as **bicicletas do Peter e do John.**

(There are two bikes: one belongs to Peter and the other, to John)

(Há duas bicicletas: uma pertence a Peter, e a outra, a John)

When the noun identifying who owns the element is in the **plural** and **ends in -S**, we will **add** just an **apostrophe**.

## POSSESSIVE CASE

**Owner in the plural ending in -S**  
**Add just the apostrophe (')**

**These are the girls' shoes.**  
Estes são os sapatos das meninas.

**Those are the boys' bikes.**  
Aqueles são as bicicletas dos meninos.

**This is the kids' bedroom.**  
Este é o quarto das crianças.

For **singular nouns ending in -S** or for nouns with **irregular plural**, we will use the **apostrophe + S**.

## POSSESSIVE CASE

**Nouns ending in -S**

**That is my boss's wife.**  
Aquele é a esposa do meu chefe.

**This is Jonas's bedroom.**  
Este é o quarto do Jonas.

**These are the children's games.**  
Estes são os jogos das crianças.

There are still **cases** in which we **omit the noun** that identifies the element we are talking about. That happens when it's clear in the context what we are talking about.

## POSSESSIVE CASE

**Is this Mark's bedroom?**

Esse é o quarto do Mark?

**No, this is Peter's.**

Não, esse é do Peter.

(We can omit the noun "bedroom" in the answer since it's clear that we are talking about it.)  
(Podemos omitir o substantivo "bedroom" na resposta, pois fica claro que estamos falando sobre isso.)

**Are you going home?**

Você está indo para casa?

**Yes, but I'll stop by Julia's first.**

Sim, mas eu vou passar na Julia primeiro.

(It's clear in this context that we are referring to Julia's house, so we can omit the noun "house.")  
(É claro pelo contexto que estamos nos referindo à casa da Julia, por isso podemos omitir o substantivo "house".)

That's it. Now you know the structure and the use of the **possessive case**.

## Present Continuous

The **present continuous** is mainly used to talk about actions and events in **progress at the moment** or about **temporary states or situations** that are true at the moment of speaking.

The basic structure of the present continuous is the **verb to be, which** works as an auxiliary, and a **main verb in the -ING form**. The **verb to be** will be conjugated according to the subject. Take a look at its structure:

### PRESENT CONTINUOUS

#### Structure

#### Affirmative

**Subject + To Be + Verb in the -ING Form + Complement**

**I am watching a movie.**

Eu estou assistindo a um filme.

#### Negative

**Subject + To Be + Not + Verb in the -ING Form + Complement**

**I am not hearing you.**

Eu não estou te ouvindo.

#### Interrogative

**To Be + Subject + Verb in the -ING Form + Complement**

**Are you taking your pills?**

Você está tomando os seus remédios?

# Present Continuous

The present continuous can also be used to describe actions that are **repeated** or **frequent**, but that we believe to be a **temporary situation**, different from our routine.

## PRESENT CONTINUOUS

### Repeated Temporary Actions and Events

**I am working a lot this week.**

Estou trabalhando muito nesta semana.

We can use the present continuous to talk about **changes that take time**.

## PRESENT CONTINUOUS

### Gradual Change

**It's getting easier every day.**

Está ficando mais fácil a cada dia.

The present continuous is also used to talk about **future events** that have been previously **arranged or planned**.

## PRESENT CONTINUOUS

### Future

**I am getting married next week.**

Vou me casar na próxima semana.

Some verbs are not used in the continuous form, even if they refer to temporary situations or things that are happening now. They are called **non-progressive verbs**, and they express **feelings**, like the verbs **to love** and **to hate**; **mental states and opinions**, like the verbs **to believe**, **to guess**, and **to agree**; and **senses**, like the verbs **to see** and **to hear**.

## PRESENT CONTINUOUS

### Non-progressive Verbs

**I like this book.**

**NOT:** ~~I am liking this book.~~

Eu gosto desse livro.

# Present Continuous

Some of these non-progressive verbs can be used with continuous forms, but they will have **different meanings**.

## PRESENT CONTINUOUS

### Non-progressive Verbs in Continuous Forms: Different Meaning

I see someone at the door.

Eu estou vendo alguém na porta.

I am seeing someone.

Eu estou saindo com alguém.

I have two pieces of luggage.

Eu tenho duas malas.

I am having breakfast at the hotel restaurant.

Eu estou tomando café da manhã no restaurante do hotel.

Now you know what the **present continuous** is all about: you've seen its structure, some examples, and how to properly use it.

# Grammar Guide

## Quantifiers

**Quantifiers** are words used to specify **quantity**, **amounts**, and **degrees**. They are also determiners because they modify a noun.

In order to study the quantifiers, we'll divide them into three groups. In the first group, we'll place the quantifiers that can be used with countable and uncountable nouns. In the second, the ones that can only be used with countable nouns, and, in the third, the ones that are only used with uncountable nouns.

Let's begin with the first group, which is composed of **quantifiers** that can be used with **both countable and uncountable** nouns.

One of the most frequent quantifiers is **any** because it can be used for a variety of things. Check out some of its uses in the following box.

### QUANTIFIERS

#### Countable and Uncountable Nouns

##### ANY

**I don't have any doubt.**

Eu não tenho nenhuma dúvida.

(**Any** emphasizes the negative. There is no doubt, not even one.)

**I could eat any of these. They all look delicious.**

Eu poderia comer qualquer um desses. Todos parecem deliciosos.

(**Any** means "whichever;" it conveys the idea that it doesn't matter which.)

**Is there any student in the library?**

Tem algum aluno na biblioteca?

(**Any** is used to ask if there is none, one, or more kids at the library.)

Still looking at quantifiers that can be used with countable and uncountable things, **some**, **enough**, and **all** are also very common.

Let's see two examples with each of them: One with a countable noun and another with an uncountable noun.

The quantifier **some** is used to express an **unknown** or **unspecified** amount.

## QUANTIFIERS

### Countable and Uncountable Nouns

#### SOME

**There are some kids waiting for Halloween treats.**

Há algumas crianças esperando doces de Dia das Bruxas.

(We don't know the exact number of kids, but it's possible to count them.)

**I need to drink some water.**

Eu preciso beber um pouco de água.

(It's not possible to count water, unless it's in a container.)

**Would you like some coffee?**

Você gostaria de um pouco de café?

(It's commonly used to offer things.)

**Enough** is used to say that it is the **exact quantity** or amount that is required. It's similar to **sufficient**.

## QUANTIFIERS

### Countable and Uncountable Nouns

#### ENOUGH

**We have enough Halloween treats for the kids.**

Temos doces de Dia das Bruxas o suficiente para as crianças.

(The Halloween treats we have are sufficient.)

**You haven't drunk enough water.**

Você não bebeu água o suficiente.

(As it's a negative statement, the water you've drunk wasn't enough.)

**All** is used to express the **total amount** of something.

## QUANTIFIERS

### Countable and Uncountable Nouns

#### ALL

**All the kids will have Halloween treats.**

Todas as crianças receberão doces de Dia das Bruxas.

(100% of the kids will have the treats.)

**It'd be nice if all the water on the planet were drinkable.**

Seria bom se toda a água do planeta fosse potável.

(All means the whole or 100% of something.)

The quantifiers **more**, **a lot of**, **most**, **lots of**, and **less** can be used with both countable and uncountable nouns.

**More** is used to state a greater or an additional amount. **A lot of** or **lots of** means a large number or amount, and both expressions are interchangeable. **Lots of** is more informal, though. **Most** is used to express the greatest amount or degree, whereas **less** means the smallest amount possible.

## QUANTIFIERS

### Countable and Uncountable Nouns

#### MORE

**I need to sleep more.**

Eu preciso dormir mais.

#### LESS

**I couldn't care less.**

Eu não poderia me importar menos.

(The smallest degree)

#### MOST

**Most people are good.**

A maioria das pessoas é boa.

(Most people = The majority of people)

#### A LOT OF / LOTS OF

**I wish I had a lot of money. / I wish I had lots of money.**

Eu gostaria de ter muito dinheiro.

We are now going to the second group, which is composed of the quantifiers that can only be used with **nouns we can count**.

**Many** is a common quantifier to specify a large amount.

## QUANTIFIERS Countable Nouns

### MANY

There are many apples in the fruit basket.

Tem muitas maçãs na fruteira.

(We don't know the exact number, but we know that there is a big quantity.)

How many apples do I need to make the pie?

De quantas maçãs eu preciso para fazer a torta?

(I want to know the exact quantity.)

The opposite of many is **few**, or **a few**. Both indicate a **small quantity** or number of things. However, there's a slight difference in meaning: we use **few** when the small quantity carries **a negative meaning**, that is, the small quantity isn't desired or isn't considered enough. On the other hand, **a few** carries **a positive meaning**, so, it's used when the small quantity is considered good or enough.

## QUANTIFIERS Countable Nouns

### FEW / A FEW

Few students knew the answer.

Poucos alunos sabiam a resposta.

(In this case, a small quantity isn't good or desired. It'd be better if all or the majority knew the answer.)

We are a few miles from the airport.

Estamos a poucos quilômetros do aeroporto.

(In this case, being near the airport carries a positive idea. It's something good or desired.)

There are other quantifiers used with countable nouns, such as **several**, **both**, and **each**.

**Several** is used to express **more than two** countable things or people. **Both** is used to **identify two people or things** together, and **each** refers to **every single** individual or thing in a universe of two or more people or things.

## QUANTIFIERS

### Countable Nouns

#### SEVERAL

It took me several days to figure it out.

Levei vários dias para entender.

(More than two days; it could be replaced by many days.)

#### BOTH

I like both dresses.

Eu gosto de ambos vestidos.

(Both = two)

#### EACH

I know each student's needs.

Eu sei as necessidades de cada aluno.

(Each = every single student)

It's time to look at the third group: quantifiers that can only be used with **uncountable nouns**.

We use **much** to refer to a large amount, usually in negative sentences, or to ask questions about amounts.

## QUANTIFIERS

### Uncountable Nouns

#### MUCH

We don't have much time.

Não temos muito tempo.

How much time do you have?

Quanto tempo você tem?

The quantifiers **a little** and **little** are used with **uncountable** nouns to express a small amount of something. The difference is that **a little** implies that this **small amount is good** and enough, and **little** implies that it **isn't good**.

## QUANTIFIERS

### Uncountable Nouns

#### A LITTLE / LITTLE

I have a little money.

Eu tenho um pouco de dinheiro.  
(It's a positive thing because I have it.)

I have little money.

Eu tenho pouco dinheiro.  
(It's negative because I don't have enough. I wish I had more.)

Now you know what a **quantifier** is, and how and when to use the most common ones.

## Question Word - How

Common question words include **what**, **when**, **where**, **which**, **why**, **who**, and **how**. On this grammar guide, we'll focus on the **question word how**.

The **question word how** means "in what way" or "to what extent" and, as all the other question words, it can be used in direct and indirect questions.

### QUESTION WORD - HOW

#### Direct and Indirect Questions

How are you feeling?

Como você está se sentindo?

(Direct Question: How + Structure of the Interrogative Form)

Can you tell me how you are feeling?

Você pode me dizer como está se sentindo?

(Indirect Question: How + Structure of the Affirmative Form)

The structure for direct questions is the **question word** followed by the **interrogative form**, and it can be used with different verb forms.

In the **simple present**, we can use **how** with the **verb to be** or with **other verbs**.

The difference is that when the verb to be is the main verb, we do not use an auxiliary verb. For all the other verbs, an auxiliary must be used to create the questions.

Check out some examples:

### QUESTION WORD - HOW

#### Simple Present

**Structure: How + Verb To Be + Subject + Complement (if necessary)**

How are the kids?

Como estão as crianças?

(main verb is the verb to be = do **not** use an auxiliary verb)

# Question Word - How

**Structure: How + Auxiliary Verb + Subject + Main Verb in the Base Form + Complement (if necessary)**

How do you go to work?

Como você vai para o trabalho?

(main verb is **not** the verb to be = the auxiliary verb do must be used)

**How** can also be used in the **simple past**, and the structure will follow the same pattern of the simple present. The difference is that the **verb to be** or the **auxiliary verb** will be **conjugated in the past**.

## QUESTION WORD - HOW

### Simple Past

**Structure: How + Verb to Be + Subject + Complement (if necessary)**

How was the game?

Como foi o jogo?

(main verb is the verb to be = do **not** use an auxiliary verb)

**Structure: How + Auxiliary Verb + Subject + Main Verb in the Base Form + Complement (if necessary)**

How did you go to the game?

Como você foi para o jogo?

(main verb is **not** the verb to be = the auxiliary verb did must be used)

The **question word how** can also be used with **continuous forms** such as the **present** and the **past continuous**. In this case, we'll use **how** followed by the **interrogative form** of these structures.

For the **interrogative form** of the present and past continuous, the **verb to be** works as an auxiliary verb, followed by the subject, the main verb in the -ING form, and a complement, if necessary.

## QUESTION WORD – HOW

### Present and Past Continuous

**Structure: How + Verb to Be + Subject + Main Verb in the -ING Form + Complement (if necessary)**

**How are you organizing your tasks?**

Como você está organizando as suas tarefas?

(I am asking about an action that is in progress now)

**How were you feeling when you started therapy?**

Como você estava se sentindo quando iniciou a terapia?

(I asked about a feeling that was going on before the person decided to start therapy)

It is also possible to use **how** with **perfect forms** such as the **present perfect** and the **present perfect continuous**.

## QUESTION WORD – HOW

### Present Perfect and Present Perfect Continuous

**Structure: How + Verb To Have + Subject + Main Verb in the Past Participle + Complement (if necessary)**

**How have you been?**

Como você tem estado?

(I want to know how this person has been lately or since I last saw him or her)

**Structure: How + Verb To Have + Subject + Been + Main Verb in the -ING Form + Complement (if necessary)**

**How have you been dealing with this situation?**

Como você tem lidado com essa situação?

(It's an ongoing situation that started in the past and is still going on)

# Question Word - How

We also use **how** with **modal verbs**. In this case, they come **right after** the **question word**.

## QUESTION WORD – HOW

### Modal Verbs

**Structure: How + Modal Verb + Subject + Main Verb in the Base Form + Complement (if necessary)**

**How should we help her?**

Como devemos ajudá-la?

(Should works as an auxiliary, and it was used to ask for guidance or recommendation)

**How can we go to the party?**

Como podemos ir para a festa?

(Can works as an auxiliary, and it shows the idea of possibility)

If you want to ask more specific questions using **how**, you can use an **adjective** or an **adverb** after it. Check out the examples.

## QUESTION WORD – HOW

### Other Possibilities

**How old is your brother?**

Quantos anos seu irmão tem?

(How + Old = Age)

**How often do you go to the gym?**

Com que frequência você vai à academia?

(How + Often = Frequency)

**How much is this T-shirt?**

Quanto custa esta camiseta?

(How + Much = Amount or Price)

**How many people were there at the concert?**

Quantas pessoas havia no show?

(How + Many = Quantity)

**How far is San Diego from Los Angeles?**

Quão distante é San Diego de Los Angeles? / Qual é a distância de San Diego a Los Angeles?

(How + Far = Distance)

**How long does it take to get there?**

Qual tempo demora para chegar lá?

(How + Long = Duration)

**How tall is your brother?**

Qual é a altura do seu irmão?

(How + Tall = Height for People)

**How high is Mount Everest?**

Quão alto é o Monte Everest? / Qual é a altura do Monte Everest?

(How + High = Height for Places)

**How** can also be **used with prepositions** such as “**about**.” There are two ways we can use it—to offer something or to make a suggestion.

## HOW ABOUT

### Offers and Suggestions

How about a cup of coffee?

Que tal uma xícara de café?

(How + About + Noun = Offer)

How about going to the movies?

Que tal irmos ao cinema?

(How + About + Verb in the -ING Form = Suggestion)

In **spoken English**, there is a very **common expression** with how—**how come**. It is used to ask about **the reason** why something has happened. We could say that **how come** is an **informal way to ask “why.”**

**How come** can also be used to **show surprise**. There is an important detail in the structure of the question, though: **how come is always followed by the affirmative form**, regardless of the verb form.

## HOW ABOUT

### Reason and Surprise (Informal)

How come she went to the party alone?

Como assim ela foi à festa sozinha?

(How Come + Structure of the Affirmative Form in the Simple Past)

How come she is not here?

Como é que ela não está aqui?

Como pode ela não estar aqui?

(How Come + Affirmative Form of the Simple Present)

# Question Word - How

We can also use **how** in **exclamations**. It can either be followed by a **complete sentence** or by an **adjective**. It's important to notice, though, that **what** can also be used in exclamations.

The difference is that when there is either a **complete sentence** or only an **adjective**, you'll use **how**. However, in the case of the structure **adjective + noun** or just a noun, you'll have to use **what**.

Compare the difference:

## HOW AND WHAT

### Exclamation

#### How + Complete Sentence

How I love this city!

Como eu amo essa cidade!

(How + Subject "I" + Main Verb "love" + Complement "this city")

#### How + Adjective

How beautiful!

Que bonito!

(How + Adjective "beautiful")

#### What + (Article) + Adjective + Noun

What a beautiful city!

Que cidade bonita!

(What + Article "a" + Adjective "beautiful" + Noun "city")

And now you know different ways to use the **question word how**, it's meaning, structures in different verb forms, as well as how to use it in exclamations.

# Grammar

## Guide

## Question Word - What

**Question words** are used to ask direct and indirect questions. On this grammar guide, we'll focus on the question word **what**, which is used to **ask general questions**.

In most cases, the structure of direct and indirect questions follows this pattern:

### QUESTION WORD – WHAT

#### Direct and Indirect Questions

What is your favorite color?

Qual é a sua cor favorita?

(**Direct Question:** Question Word + Interrogative Form)

Tell me what your favorite color is.

Diga-me qual é a sua cor favorita.

(**Indirect Question:** Question Word + Affirmative Form)

But when we ask **direct questions** with the question word **what**, there are three **possible structures**.

### QUESTION WORD – WHAT

#### Structure – Direct Questions

1. What + Interrogative Form
2. What + Verb in the Third Person Singular + Complement
3. What + Noun + Interrogative Form

# Question Word - What

Let's analyze each structure, starting with the first one, which is the **question word what** followed by an **interrogative form**. This structure can be used with any verb form.

Let's see some examples:

## QUESTION WORD - WHAT

### What + Interrogative Form

What does she want for breakfast?

O que ela quer de café da manhã?

(**Simple Present:** Question Word + Auxiliary Verb + Subject + Main Verb in its Base Form + Complement)

What did you do yesterday?

O que você fez ontem?

(**Simple Past:** Question Word + Auxiliary Verb + Subject + Main Verb in its Base Form + Complement)

What were you doing last week?

O que você estava fazendo semana passada?

(**Past Continuous:** Question Word + Auxiliary Verb + Subject + Main Verb in the -ING Form + Complement)

What have you been doing lately?

O que você tem feito ultimamente?

(**Present Perfect:** Question Word + 1st Auxiliary + Subject + 2nd Auxiliary + Main verb in the -ING Form + Complement)

What would you do with a million dollars?

O que você faria com um milhão de dólares?

(**Simple Present:** Question Word + Modal Verb + Subject + Main Verb in its Base Form + Complement)

# Question Word - What

It is important to notice that the structure **what + interrogative form** will **never** be used for **questions about the subject** of the sentence. When we follow this structure, it means that the **subject is included** in the given question.

Let's take a closer look:

## QUESTION WORD - WHAT

### What + Interrogative Form

What does she want for breakfast?

O que ela quer de café da manhã?

She wants **eggs and toast**.

Ela quer ovos e torradas.

(The question is not about who performs the action, but about what the person wants. The subject "she" is part of the question. The core answer is "eggs and toast.")

(Não tem relação com o sujeito, mas com o que o sujeito quer fazer.

O sujeito "ela" é parte da pergunta. A resposta central é "ovos e torradas".)

What were you doing last week?

O que você estava fazendo semana passada?

I **was traveling**.

Eu estava viajando.

(It's not about who was performing the action, but what the person was doing.

The subject "you," which is part of the question, becomes "I" in the answer.

And the core answer is "traveling.")

(Não tem relação com quem estava fazendo a ação, mas com o que a pessoa estava fazendo. O sujeito "você", que é parte da pergunta, vira "eu" na resposta.

A resposta central é "viajando".)

# Question Word - What

But it is possible to ask questions with the **question word what** to learn about the subject of a sentence. In such cases, we will use the structure: **What + Verb in The Third Person Singular + Complement**.

Check the following examples:

## QUESTION WORD - WHAT

### What + Verb in Third Person Singular + (Complement)

**What makes you happy?**

O que deixa você feliz?

**Spending time with my family** makes me happy.

Passar tempo com a minha família me deixa feliz.

(The core answer is “spending time with my family,” which is the subject of the answer and is not part of the question. That is why the verb in question is in the third person singular “makes.”)

(A resposta central é “passar tempo com a minha família”, que é o sujeito da resposta e não faz parte da pergunta. Por isso o verbo da pergunta está na terceira pessoa do singular “makes”, deixa.)

**There are so many people here. What's happening?**

Tem tanta gente aqui. O que está acontecendo?

**A music festival** (is happening here).

Um festival de música (está acontecendo aqui).

(The core answer is “a music festival,” which is the subject of the answer and is not part of the question. That is why the verb in question is in the third person singular “is.”)

(A resposta central é “um festival de música”, que é o sujeito da resposta e não faz parte da pergunta. Por isso o verbo da pergunta está na terceira pessoa do singular “is”, está.)

**What's bothering them?**

O que está incomodando eles?

**Not having money to pay their bills** (is bothering them).

Não ter dinheiro para pagar as suas contas (está incomodando eles).

(The core answer is “not having money to pay their bills,” which is the subject of the answer and is not part of the question. That is why the verb in question is in the third person singular “is.”)

(A resposta central é “não ter dinheiro para pagar suas contas”, que é o sujeito da resposta e não faz parte da pergunta. Por isso o verbo da pergunta está na terceira pessoa do singular “is”, está.)

# Question Word - What

Let's take a closer look and analyze the structure of the examples we have previously seen.

## QUESTION WORD - WHAT

(1) (2) (3)  
**What + Verb in the Third Person Singular + Complement (if necessary)**

(1) (2) (3)  
What makes you happy?

(1) (2)  
What's happening?

(1) (2) (3)  
What's bothering them?

If you want to ask a more **specific question** using what, place a noun right **after** the **question word**.

## QUESTION WORD - WHAT

**What + Noun + Interrogative Form**

What time do you usually wake up?

A que horas você geralmente acorda?

(What + time = used to ask about the hour)

What kind of music do you like?

De que tipo de música você gosta?

(What + kind = used to ask about the specific type of a thing)

What size do you need?

De que tamanho você precisa?

(What + size = used to ask about size)

# Question Word - What

There are still some special cases, such as **what + about**. It is used to make an offer or to ask about your opinion or how you feel about something.

## QUESTION WORD - WHAT

### Special Cases - What About

What about going to the movies?

Que tal irmos ao cinema?

Great idea.

Ótima ideia.

How are you?

Como vai você?

I'm fine, thanks. What about you?

Eu estou bem. E você?

In **informal conversations**, there are some common **expressions** with the **question word what**.

## QUESTION WORD - WHAT

### Expressions

What's up?

E aí?

What now?

O que agora?

# Question Word - What

The **question word what** can also be used in **exclamations** to express **surprise**, **shock**, or **emotions**. In this case, we use: what + an article + (an adjective) + a noun. We may or may not include the adjective, but the noun must always be there in exclamations with what.

## QUESTION WORD – WHAT

### Exclamations

#### Structure: What + Article + (Adjective) + Noun

##### What a (beautiful) place!

Que lugar (bonito)!

(What + Article “a” + (Adjective “beautiful”) + Noun “place”)

##### What a great song!

Que música ótima!

(What + Article “a” + Adjective “great” + Noun “song”)

##### What a (nice) gesture!

Que gesto (legal)!

(What + Article “a” + (Adjective “nice”) + Noun “gesture”)

##### What a song!

Que música!

(What + Article “a” + Noun “song”)

Now you know different ways in which you can use the **question word what**, the structure used with different verb forms, as well as how to use it in exclamations and expressions.

# Grammar

## Guide

## Question Word – Why

**Question words** are used to **ask direct and indirect questions**. Common question words include what, when, where, which, why, who, and how.

The **question word why** is used to ask or to talk about the **reason for something**.

### QUESTION WORD – WHY

**Why**

Por que / Por quê

Just like the other question words, **why** can be used in direct and indirect questions.

### QUESTION WORD – WHY

**Direct and Indirect Questions**

**Why are you so sad?**

Por que você está tão triste?

(Why + interrogative form = direct question)

**Please, tell me why you are so sad.**

Por favor, me diga por que você está tão triste.

(A question inside a sentence = indirect question)

Most **direct questions** will follow this pattern: **question word why + interrogative form**, no matter which verb form you choose to use.

## QUESTION WORD – WHY

### Why + Interrogative Form

**Why did you say that?**

Por que você disse isso?

(Why + Interrogative Form – Simple Past)

**Why are you doing this?**

Por que você está fazendo isso?

(Why + Interrogative Form – Present Continuous)

**Why have you been going there?**

Por que você tem ido lá?

(Why + Interrogative Form – Present Perfect Continuous)

**Why would I do that?**

Por que eu faria isso?

(Why + Interrogative Form – Modal Verb)

Questions with why can also be followed by a **verb in the infinitive without to**. This structure is typically used to suggest that **an action is pointless or unnecessary**.

## QUESTION WORD – WHY

### Why + Infinitive Form (without To)

**I've already told you this movie is terrible. Why waste your time with it?**

Eu já te disse que esse filme é horrível. Por que perder seu tempo com isso?

(Why + verb "to waste" in the infinitive without to)

**Why argue with Gabriel? He'll never change his mind.**

Por que discutir com o Gabriel? Ele nunca vai mudar de ideia.

(Why + verb "to argue" in the infinitive without to).

# Question Word – Why

When we reply to a **negative statement** and we want to ask the reason, **why not** sounds more natural than why. **Why not** can also be used as a reply when we want to **accept a suggestion**.

## QUESTION WORD – WHY

### Why + Not—Replies

#### Replying to a Negative Statement

Respondendo a uma declaração negativa

**I don't want to go out tonight.**

Eu não quero sair hoje à noite.

**Why not?**

Por que não?

#### Replying to a Suggestion or Invitation

Respondendo a uma sugestão ou convite

**Let's order some food and watch a movie at home.**

Vamos pedir comida e assistir a um filme em casa.

**Sure, why not?**

It is also possible to use **why not** when we want to **give a suggestion**. In this case, we can use **why not + infinitive without to** or we can use **why + interrogative-negative form of the simple present**.

Check the examples:

## QUESTION WORD – WHY

### Why + Negative Form—Suggestions

**Why not stay home and watch a movie?**

Por que não ficar em casa e assistir a um filme?

(In this sentence, “why not” is followed by the verb “to stay” in the infinitive without to and the complement.)

**Why don't we stay home and watch a movie?**

Por que a gente não fica em casa e assiste a um filme?

(In this sentence, “why” is followed by the interrogative-negative form of the simple present.)

# Question Word – Why

It is important to notice that we use **why** to **ask about the reason**, and we use **because** or **because of** when we are **giving the reason** for something in affirmative sentences.

The difference is that **because** will be used **before a complete sentence**, whereas **because of** will be **followed by a noun** or **noun phrase**.

## BECAUSE VS. BECAUSE OF

Why are you leaving earlier?

Por que você está saindo mais cedo?

Because I have a doctor's appointment.

Porque eu tenho uma consulta médica.

(Complete sentence = Because + Subject + Verb + Complement)

Because of my doctor's appointment.

Por causa da minha consulta médica.

(Because of + Noun Phrase)

Now you know what a question word is, how to use **why** as a question word using different verb forms, and how to use **because** to state reasons.

# Simple Present - Other Verbs

The **simple present** was divided into **two grammar guides**, and we did that because there is an **important difference in structure**.

In this grammar guide, we'll talk about the **simple present** with verbs that are **not the verb to be**, that is, **all the other verbs**.

When we use the **verb to be**, we do not use an auxiliary verb to make interrogative and negative sentences. But when we **use other verbs**, we **need to use the auxiliary verb**. The auxiliary verb for the simple present is **do or does**, according to the subject.

Check out the difference in the box.

| SIMPLE PRESENT |                                                      |                                                                            |
|----------------|------------------------------------------------------|----------------------------------------------------------------------------|
|                | Verb To Be                                           | Other Verbs                                                                |
| Interrogative  | <u>Is she</u> a teacher?<br>Ela é professora?        | <u>Does she work</u> as a teacher?<br>Ela trabalha como professora?        |
| Negative       | She <u>isn't</u> a teacher.<br>Ela não é professora. | She <u>doesn't work</u> as a teacher.<br>Ela não trabalha como professora. |

The basic structure for the affirmative form is the SVC structure, that is, **subject**, main **verb**, and **complement**. And the verb conjugation works like this: we'll use the **base form** of the verb for all persons, **except for the third person singular**. In this case, we'll **add -S, -ES, or -IES** to the end of the verb, depending on how it's spelled.

# Simple Present - Other Verbs

If you want to learn more about the **third person spelling rules**, you can check the grammar guide on this topic. However, **most verbs** will only take a **final S in the third person singular**, as you can see in the following table.

| SIMPLE PRESENT<br>Affirmative Form |                                                         |                                                     |
|------------------------------------|---------------------------------------------------------|-----------------------------------------------------|
|                                    | Singular                                                | Plural                                              |
| First person                       | <b>I work here.</b><br>Eu trabalho aqui.                | <b>We work here.</b><br>Nós trabalhamos aqui.       |
| Second person                      | <b>You work here.</b><br>Você trabalha aqui.            | <b>You work here.</b><br>Vocês trabalham aqui.      |
| Third person                       | <b>He works here.</b><br>Ele trabalha aqui.             | <b>They work here.</b><br>Eles/Elas trabalham aqui. |
|                                    | <b>She works here.</b><br>Ela trabalha aqui.            |                                                     |
|                                    | <b>It works for now.</b><br>Isso funciona por enquanto. |                                                     |

Notice that we do **not** use the **auxiliary verb** in the **affirmative form**. But it's possible to use it to **add emphasis** to a statement. In that case, **the auxiliary verb** is placed **before the main verb**.

| SIMPLE PRESENT<br>Affirmative Form: Adding Emphasis                                                                                                                                |  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <b>Usage of the Auxiliary Do</b>                                                                                                                                                   |  |
| <b>I <u>do</u> have the right to speak my mind.</b><br>Eu tenho (sim) o direito de dar minha opinião.                                                                              |  |
| (The verb "do" is used as an auxiliary. So it does not have a meaning, but a function).<br>(O verbo "do" é usado como auxiliar. Portanto, não tem um significado, mas uma função). |  |

# Simple Present - Other Verbs

Thus, it is possible to use the auxiliary with the simple present in the affirmative form, but it's also important to notice that it adds **emphasis** to the sentence, which means that it is only going to happen in very specific contexts.

As for the **negative** and **interrogative** forms, the **auxiliary do** is not optional, it's **necessary**.

The basic structure for the negative form is the **subject**, the **auxiliary verb do** conjugated according to the subject, the negative particle **not**, the **main verb** in its base form, and the **complement**, if necessary.

You should pay close attention to the third person singular. In both negative and interrogative forms, the conjugation goes in the auxiliary verb, that is, we will use **does**, and, because of that, the **main verb goes back to its base form**.

## SIMPLE PRESENT

### Negative Form

|               | Singular                                                                                                                                                                     | Plural                                                 |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|
| First person  | I don't work here.<br>Eu não trabalho aqui.                                                                                                                                  | We don't work here.<br>Nós não trabalhamos aqui.       |
| Second person | You don't work here.<br>Você não trabalha aqui.                                                                                                                              | You don't work here.<br>Vocês não trabalham aqui.      |
| Third person  | He doesn't work here.<br>Ele não trabalha aqui.<br><br>She doesn't work here.<br>Ela não trabalha aqui.<br><br>It doesn't work for now.<br>(Isso) não funciona por enquanto. | They don't work here.<br>Eles/Elas não trabalham aqui. |

In **informal language**, the contracted forms **don't** (do + not) or **doesn't** (does + not) are used in most cases. In **formal written language**, we avoid using contractions.

On the other hand, in **spoken language**, if we use the full form, it probably means we want to **add emphasis** to a negative statement.

## SIMPLE PRESENT

### Negative Form: Adding Emphasis

#### Do Not Use the Contracted Form

You do not have the right to shout at people.  
Você não tem o direito de gritar com as pessoas.

# Simple Present - Other Verbs

The basic **interrogative form** structure in the simple present is the **auxiliary verb do** conjugated according to the **subject**, the subject, the **main verb** in its base form, and the **complement**, if necessary.

So the position of the auxiliary verb and the subject is inverted, and, once again, in the **third person singular**, the **main verb** goes back to its **base form**, and the **auxiliary verb** is **conjugated**.

Check out the following table:

| SIMPLE PRESENT<br>Interrogative Form |                                                      |                                                 |
|--------------------------------------|------------------------------------------------------|-------------------------------------------------|
|                                      | Singular                                             | Plural                                          |
| First person                         | Do I work here?<br>Eu trabalho aqui?                 | Do we work here?<br>Nós trabalhamos aqui?       |
| Second person                        | Do you work here?<br>Você trabalha aqui?             | Do you work here?<br>Vocês trabalham aqui?      |
| Third person                         | Does he work here?<br>Ele trabalha aqui?             | Do they work here?<br>Eles/Elas trabalham aqui? |
|                                      | Does she work here?<br>Ela trabalha aqui?            |                                                 |
|                                      | Does it work for now?<br>Isso funciona por enquanto? |                                                 |

The **simple present** is used to talk about **facts** and to show **repetitions**, **habits**, or **generalizations**.

## SIMPLE PRESENT Other Verbs – Uses

I work at a law firm.

Eu trabalho em um escritório de advocacia.

She works a lot.

Ela trabalha muito.

# Simple Present - Other Verbs

It can also be used to present a **series of events** when we narrate something or give **instructions and directions**.

## SIMPLE PRESENT

### Other Verbs – Uses

First you read the questions, then you have to mark the correct statement.

Primeiro você lê as perguntas, depois você tem que marcar a afirmação correta.

You go straight and turn right on the traffic light.

Você segue em frente e vira à direita no semáforo.

The **simple present** can convey the idea of immediacy and drama, and that's why it's commonly used in **stories** or **novels**, in **sports broadcasting**, and in **newspaper headlines**, even when **reporting past events**.

## SIMPLE PRESENT

### Other Verbs – Uses

She crosses the street toward him, looks back, and decides to let it go.

Ela atravessa a rua em direção a ele, olha para trás e decide deixar para lá.

He gets the ball, passes through the defense and shoots, but the goalkeeper saves it.

Ele pega a bola, passa pela defesa e chuta, mas o goleiro agarra.

Firefighters save many lives in Brooklyn.

Os bombeiros salvam muitas vidas no Brooklyn.

# Simple Present - Other Verbs

In English, some verbs **cannot** be used in continuous forms. These verbs are called **non-progressive verbs**, and we use them in the **simple present**. This group is divided into different subgroups of verbs.

## SIMPLE PRESENT

### Non-progressive Verbs

#### Mental process verbs

know, suppose, think, understand

saber, supor, achar, entender

#### Verbs that express feelings

admire, adore, hate, like, respect

admirar, adorar, detestar, gostar, respeitar

#### Verbs that describe senses

smell, taste, hear

sentir cheiro, sentir sabor, ouvir

#### Speech act verbs

promise, swear, agree, deny

prometer, jurar, concordar, negar

And now you know the structure and the most common uses of the **simple present**.

# Simple Present - Verb To Be

The **simple present** is used to talk about **factual information** or things that **happen regularly**.

## SIMPLE PRESENT

**This wall is white.**

Esta parede é branca.

(It's a factual piece of information.)

**I sleep for 8 or 9 hours a day.**

Eu durmo de 8 a 9 horas por dia.

(It's part of a routine, something I do every day.)

The **simple present** will be tackled in two different grammar guides. In this one, we'll focus on the simple present sentences in which the **main verb** is the **verb to be**.

Check the following table to see the **conjugation** of the **verb to be** in the **simple present**.

## SIMPLE PRESENT

### Verb To Be

|               | Singular     | Plural   |
|---------------|--------------|----------|
| First person  | I am         | We are   |
| Second person | You are      | You are  |
| Third person  | He/She/It is | They are |

# Simple Present - Verb To Be

There is a different sentence structure for the **interrogative**, **negative**, and **affirmative** forms. In **affirmative sentences**, we'll frequently use the **SVC structure**, that is, **Subject**, **Verb**, and **Complement**. To make a **negative** statement, you'll place the negative particle **not** after the verb. And to ask a **question**, we invert the order and place **the verb before the subject**.

## SIMPLE PRESENT

### Verb To Be

#### Affirmative

**Subject + Verb To Be + Complement**

I'm a writer.

Eu sou escritor.

#### Negative

**Subject + Verb To Be + NOT + Complement**

I am not a writer.

Eu não sou escritor.

#### Interrogative

**Verb To Be + Subject + Complement**

Are you a writer?

Você é escritor?

The **simple present** of the **verb to be** is commonly used in its **contracted form**, also known as **short form**. Contractions are considered **informal**, and they are very common in everyday situations. However, if you want to sound more formal or more emphatic, use the full form.

The short or contracted forms can be used in **affirmative** or **negative sentences**.

## SIMPLE PRESENT

### Verb To Be – Contracted Form

#### Affirmative

I'm

You're

He's/She's/It's

We're

They're

#### Negative

I'm not

You aren't

He/She/It isn't

We aren't

They aren't

# Simple Present - Verb To Be

Now that you know the conjugation in the plural and singular forms, its structure for affirmative, negative, and interrogative sentences, as well as its full and contracted forms, check out the possible **uses** of the **verb to be** in the **simple present**.

It can be used to refer to personal information such as **name**, **age**, **profession**, **marital status**, and **nationality**.

## SIMPLE PRESENT

### Verb To Be – Uses

#### Name

I am Sophie.  
Eu sou Sophie.

My name is Sophie.  
O meu nome é Sophie.

#### Profession

I am an architect.  
Eu sou arquiteta.

#### Age

I am 36 years old.  
Eu tenho 36 anos.

#### Nationality

I am French.  
Eu sou francesa.

#### Marital Status

I am single.  
Eu sou solteira.

We can also use the **verb to be followed** by an **adjective** to talk about **permanent or temporary physical characteristics** and **feelings**.

## SIMPLE PRESENT

### Verb To Be – Uses

I am thirsty.

Eu estou com sede.

(It's a state. Something I am experiencing now.)

I am skinny.

Eu sou magro(a).

(It refers to a physical characteristic.)

# Simple Present - Verb To Be

The **verb to be** in the simple present is also used to talk about **permanent or temporary qualities or states, personal characteristics, or mood**.

## SIMPLE PRESENT

### Verb To Be – Uses

I am stressed.

Eu estou estressado(a).  
(It's a current mood or a temporary state.)

I am a stressed person.

Eu sou uma pessoa estressada.  
(It's part of my personality.)

The **verb to be** in the simple present is also used to talk about **time** and **dates**.

## SIMPLE PRESENT

### Verb To Be – Uses

It's is eleven o'clock.

São onze horas.

Our meeting is on December 3rd.

A nossa reunião é no dia 3 de dezembro.

We can use the **verb to be** in the **simple present** to refer to **places** and **locations** as well.

## SIMPLE PRESENT

### Verb To Be – Uses

I am at the mall.

Eu estou no shopping.

The 9/11 Memorial is in Manhattan.

O memorial do 11 de Setembro é em Manhattan.

And now you know when and why we use the **verb to be** in the **simple present**.

# Spelling Rules - Third Person

When we use the verbs in the **third person singular** in the **simple present**, there are some specific **spelling rules**, which refer to how these verbs are written.

The **third person** is always about someone or something else. In the singular, it will be used with nouns or pronouns that refer to a **masculine noun or the pronoun he**, to a **feminine noun or the pronoun she**, and to a **thing, idea, or object or the pronoun it**.

Remember that in the negative and interrogative forms of the simple present the main verb remains in its base form for all persons. Thus, the **third person conjugation in the simple present** will only be used in the **main verb** when it is in the **affirmative form**.

The general rule is that you **add -S** to the verb.

## SPELLING RULES – THIRD PERSON

### General Rule – Add -S

**work**  
trabalhar

**works**  
trabalha

**like**  
gostar

**likes**  
gosta

For the verbs ending in **O, S, X, CH, SH, or Z**, we **ADD -ES**.

## SPELLING RULES – THIRD PERSON

### Verbs Ending in O, S, X, CH, SH, Z – Add -ES

**go**  
ir

**goes**  
vai

**kiss**  
beijar

**kisses**  
beija

# Spelling Rules - Third Person

**fix**  
consertar

**watch**  
assistir

**crash**  
bater

**buzz**  
vibrar

**fixes**  
conserta

**watches**  
assiste

**crashes**  
bate

**buzzes**  
vibra

When the verb ends in **Y** and it is preceded by a consonant, **drop the Y and add -IES**.

## SPELLING RULES – THIRD PERSON Verbs Ending in Consonant + Y - Drop the Y, Add -IES

### Ending in E: Add -ST

Terminação em E: Adicionar -ST

**carry**  
carregar

**study**  
estudar

**try**  
tentar

**carries**  
carrega

**studies**  
estuda

**tries**  
tenta

The verb **to have** is an **exception**: in the third person singular, we'll **drop VE** and **add -S**.

## SPELLING RULES – THIRD PERSON Exception: To Have – Drop VE, add -S

**have**  
ter

**has**  
tem

And now you know the **spelling rules for the verbs inflected in the third person singular** in affirmative sentences in the simple present.

# Grammar Guide

## Subject Pronouns

**Subject pronouns** are personal pronouns that replace nouns that work as the subject of the sentence. Let's take a look at them:

**First person** pronouns are the ones used to refer to the person speaking; **second person** pronouns refer to the person we are talking to; and **third person** pronouns, to the people or objects we are talking about.

| SUBJECT PRONOUNS |                                |                   |
|------------------|--------------------------------|-------------------|
|                  | Singular                       | Plural            |
| First person     | I<br>eu                        | we<br>nós         |
| Second person    | you<br>tu/você                 | you<br>vós/vocês  |
| Third person     | he<br>ele (pessoa)             | they<br>eles/elas |
|                  | she<br>ela (pessoa)            |                   |
|                  | it<br>ele/ela (exceto pessoas) |                   |

Let's start analyzing the first person pronouns, the ones that refer to the person who is talking.

The **first person singular pronoun (I)** is always written with a capital letter, regardless of its position in the sentence. Capitalization **does not happen** with any other pronoun in English, **not even** with the **first person plural (we)**.

## SUBJECT PRONOUNS

### First Person

**I am her friend.**

Eu sou amigo(a) dela.  
(first person singular pronoun **I**)

**We are friends.**

Nós somos amigos.  
(first person plural pronoun **we**)

**Karen and I work at the same company.**

Karen e eu trabalhamos na mesma empresa.  
(first person singular pronoun **I**)

**That was the moment we decided to quit the job.**

Foi nesse momento que nós decidimos deixar o emprego.  
(first person plural pronoun **we**)

For the **second person**, the subject pronoun **you** will be used both **in the singular and in the plural**. **You** always refers to the person or the people you are talking to. Therefore, **the context** will tell you whether it is singular or plural.

## SUBJECT PRONOUNS

### Second Person

**You are a teacher.**

Você é professor.  
(second person singular pronoun **you**)

**You are teachers.**

Vocês são professores.  
(second person plural pronoun **you**)

# Subject Pronouns

The **third person** is used to refer to the people or objects we are talking about. In the third person singular, there are two pronouns used to refer to people, and, in some cases, to pets: **he** and **she**. “He” is used for the masculine; and “she,” for the feminine.

## SUBJECT PRONOUNS

### Third Person Singular (He/She)

**John is a teacher. He is very good.**

O John é professor. Ele é muito bom.

(third person singular masculine pronoun **he**)

**Sarah is an actress. She is great.**

A Sarah é atriz. Ela é ótima.

(third person singular feminine pronoun **she**)

For all the other cases, we will use the other **third person singular pronoun, it**; that is, to talk about any other thing in the singular.

## SUBJECT PRONOUN

### Third Person Singular (It)

**Turn off the computer. It's too hot.**

Desligue o computador. Ele está muito quente.

(third person singular neutral pronoun **it**)

**Turn the TV down. It's loud.**

Abaixe a televisão. Ela está alta.

(third person singular neutral pronoun **it**)

Notice that, in the examples we have just seen, the reference of the pronoun **it** is clear in the sentence. It refers to the computer in the first example, and to the TV in the second one.

But the **pronoun it** will also be used as a subject in sentences that have an **impersonal subject**. This impersonal use of it introduces new information, and it is used particularly to talk about **time, dates, the weather, and opinion**.

When **it** has an impersonal function, it does **not** refer to a previously mentioned noun. In this case, the pronoun **it** simply works as the subject of the sentence.

# Subject Pronouns

Take a look at the following examples:

## SUBJECT PRONOUN Third Person Singular (It)

It's a pleasure to be here.

É um prazer estar aqui.

(third person singular neutral pronoun **it** → impersonal subject)

It's hot today.

Está quente hoje.

(third person singular neutral pronoun **it** → impersonal subject)

It's late.

Está tarde.

(third person singular neutral pronoun **it** → impersonal subject)

For the **third person plural**, there is only one pronoun: **they**. This is the plural form of the pronouns he, she, and it—meaning this pronoun can be used to refer both to people and objects.

## SUBJECT PRONOUN Third Person Plural (They)

They are good teachers.

Elas são boas professoras.

(third person plural pronoun **they**)

They are great students.

Eles são ótimos alunos.

(third person plural pronoun **they**)

They are good books.

São bons livros.

(third person plural pronoun **they**)

And now you know how to use **subject pronouns** in English.

# Grammar Guide

## There + To Be

The structure **there + To Be** expresses existence, and it can be used in the affirmative, interrogative, and negative forms.

### THERE + TO BE

#### Structures

#### Affirmative

##### There + To Be

There's a restaurant near the hotel.

Há um restaurante perto do hotel.

#### Interrogative

##### To Be + There

Is there a restaurant near the hotel?

Há um restaurante perto do hotel?

#### Negative

##### There + To Be + Not

There isn't (is not) a restaurant near the hotel.

Não há um restaurante perto do hotel.

You can use the structure in the **singular** or **plural** according to the **noun** that follows it.

## THERE + TO BE

### Singular and Plural

**Are there good schools in your neighborhood?**

Há/Tem boas escolas no seu bairro?

(The noun "schools" is in the plural, so the verb to be is in the plural)

**There is a good school in my neighborhood.**

Há/Tem uma escola boa no meu bairro.

(The noun "school" is in the singular, so the verb to be is in the singular)

When we talk about singular or plural forms, there are some things to which we should pay attention. If you are talking about a **list of things**, use **there** is when the noun that follows is also in the singular.

If there are one or more nouns in the plural, use **there are** and place the nouns in the plural before the ones in the singular, if there are any.

## THERE + TO BE

### Singular and Plural

**There is an apple, a banana, and a pineapple in the fruit basket.**

Tem uma maçã, uma banana e um abacaxi na fruteira.

(There is → All nouns in the singular)

**There are some apples, two bananas, and a pineapple in the fruit basket.**

Tem algumas maçãs, duas bananas e um abacaxi na fruteira.

(There are → One or more nouns in the plural)

In **informal spoken language** you might as well hear **there** is followed by **plural nouns**. This is perfectly acceptable in such case, but you should not use it in written formal language.

## THERE + TO BE

### Informal Spoken Language

There's two teachers in each classroom.

Tem dois professores em cada sala de aula.

(**Informal:** There is → One or more nouns in the plural)

We have seen some uses of **there + To Be** in the **present**. However, it is important to highlight that this structure can also be used in the **past** and in the **future**.

So we will conjugate the verb to be accordingly. If we are referring to the **past**, we use **there was** for the singular and **there were** for the plural.

## THERE + TO BE

### Past: There Was / There Were

There was only one employee assisting the customers.

Só havia um funcionário auxiliando os clientes.

("Employee" is a singular noun, so we used the verb to be in the singular: "There was")

There were many people waiting in line.

Tinha muita gente esperando na fila.

("People" is a plural noun, so we used the verb to be in the plural: "There were")

To use **there + To Be** in the future, we'll use **there will be** with singular or plural

## THERE + TO BE

### Future: There Will Be

There will be a mall near my house.

Haverá um shopping perto da minha casa.

There will be flying cars in the future.

Haverá carros voadores no futuro.

**There + To Be** can also be used with modal verbs. In this case, we'll join the idea of existence with the meaning that each modal verb expresses.

## THERE + TO BE

### Modal Verbs

#### Structure: There + Modal Verb + To Be

There must be a gas station around.

Tem que ter / Deve haver um posto de gasolina por perto.

There should be no wait.

Não deve haver demora.

There might be a cocktail after the meeting.

Deve ter / É possível que tenha / Pode ser que haja um coquetel após a reunião.

We can also use **there** with verbs such as **seem** and **tend** before **to be**. In these cases, we'll use the infinitive form **to be**.

## SUPERLATIVES

### Two-syllable Adjectives – Exceptions

#### Structure: There + Verb + To Be

There seems to be a lot of vacant rooms in this hotel.

Parece haver muitos quartos vazios neste hotel.

(It's the speaker's perspective of an impression).

There tends to be tension between the parts

Tende a haver tensão entre as partes.

(It's something that is expected).

And now you know what **there + To Be** means, its structures, and how to use it.

## Verbs + Infinitive or -ING

Sometimes, the complement of a verb may be another verb. In these cases, the second verb will either appear in the **infinitive** or in the **-ING form**, depending on the situation.

It's important to know that because some verbs will only take the infinitive form, others will only take the -ING form, and some others will take both the infinitive and -ING forms.

Check some verbs that are commonly followed by the to-infinitive form.

### VERBS + TO-INFINITIVE

**Agree**  
concordar

**Have**  
ter

**Plan**  
planejar

**Decide**  
decidir

**Need**  
precisar

**Want**  
querer

Now, check some sentences in which the first verb is commonly followed by the second verb in the infinitive.

### VERBS + TO-INFINITIVE

**I'm planning to visit my parents on the holiday season.**  
Eu estou planejando visitar meus pais na época dos feriados.  
(Verb **to plan** in the present continuous + verb **to visit** in the infinitive)

**Mary wants to buy a new car.**  
Mary quer comprar um carro novo.  
(Verb **to want** in the simple present + verb **to buy** in the infinitive)

**I had to leave earlier yesterday.**  
Eu tive que sair mais cedo ontem.  
(Verb **to have** in the simple past + verb **to leave** in the infinitive)

# Verbs + Infinitive or -ING

On the other hand, some verbs can only be followed by the **-ING form**.

## VERBS + -ING

### Admit

admitir

### Avoid

evitar

### Consider

considerar

### Enjoy

curtir/aproveitar

### Mind

importar-se / tomar cuidado / prestar atenção

### Risk

arriscar

Check some examples.

## VERBS + -ING

**Emily enjoys watching cult movies on the weekends.**

Emily gosta de assistir filmes cult nos finais de semana.

(Verb **to enjoy** in the simple present + verb **to watch** in the -ING form)

**People should avoid smoking near children.**

As pessoas deveriam evitar fumar perto de crianças.

(Verb **to avoid** in the bare infinitive (after a modal verb) + verb **to smoke** in the -ING form)

**Anna should consider coming to her mother's house at Christmas.**

Anna deveria considerar vir para a casa da sua mãe no Natal.

(Verb **to consider** in the bare infinitive (after a modal verb) + verb **to come** in the -ING form)

Most verbs formed with prepositions, such as **keep on** and **give up**, will also be followed by the -ING form.

## VERB + -ING

**Activists keep on asking the authorities to protect the environment.**

Ativistas continuam pedindo às autoridades que protejam o meio ambiente.

**Nancy gave up trying to convince Bob to come along.**

A Nancy desistiu de tentar convencer o Bob a vir junto.

# Verbs + Infinitive or -ING

And there's another group of verbs that can be followed either by the infinitive or the -ING form. But we should divide them into two subgroups.

Verbs such as **hate**, **love**, **like**, and **prefer** may be followed either by the **infinitive** or the **-ING form**, with no difference in meaning.

## VERBS + INFINITIVE OR -ING

### Hate

odiar

### Like

gostar

### Love

amar/adorar

### Prefer

preferir

Check some examples.

## VERB + INFINITIVE OR -ING

Joyce hates driving when it's raining.

Joyce hates to drive when it's raining.

Joyce detesta dirigir quando está chovendo.

Henry loves cooking breakfast for his kids.

Henry loves to cook breakfast for his kids.

Henry ama preparar o café da manhã para seus filhos.

Notice that if this same group of verbs is accompanied by the modal verbs **would** or **should**, then only the infinitive form is acceptable.

## WOULD/SHOULD + VERB + INFINITIVE

Sharon would like to travel on the holiday.

~~Sharon would like traveling on the holiday.~~

Sharon gostaria de viajar no feriado.

# Verbs + Infinitive or -ING

Now, other verbs such as: **forget**, **remember**, **stop**, and **try** can be followed either by the infinitive or the -ING form, but with a **significant change in meaning**.

## VERBS + INFINITIVE OR -ING

**Forget**  
esquecer

**Remember**  
lembrar

**Stop**  
parar

**Try**  
tentar

Check some examples.

## VERB + INFINITIVE / -ING

**Karen stopped smoking.**

Karen parou de fumar.

(Stop + -ING form → She quit smoking; Karen doesn't smoke anymore.)

**Karen stopped to smoke.**

Karen parou para fumar.

(Stop + infinitive → She interrupted something in order to smoke.)

**I asked John, and he remembers turning off the lights before he left.**

Eu perguntei ao John, e ele se lembra de ter apagado as luzes antes de sair.

(Remember + -ING form → He remembers something he did in the past.)

**John, remember to turn off the lights before you leave.**

John, lembre-se de apagar as luzes antes de sair.

(Remember + infinitive → It's a warning so that he does not forget to do something)

# Verbs + Infinitive or -ING

There are still some special cases that should be pointed out.

Verbs such as **let** and **make** are followed by the **bare infinitive**, that is, the infinitive form without the particle to. And there will always be an object before the infinitive.

## VERB + INFINITIVE WITHOUT TO

**Let George do that for you.**

**Let him do that for you.**

Deixe o George fazer isso por você.

Deixe-o fazer isso por você.

**Paul made me wait for two hours.**

Paul me fez esperar por duas horas.

The verb **help** can also follow this structure. But notice that, sometimes, you will see this verb followed by the bare infinitive, and some others, by the to-infinitive.

## HELP + INFINITIVE

**Your classmate is going to help you prepare the task.**

**Your classmate is going to help you to prepare the task.**

Seu colega de turma vai te ajudar a preparar a tarefa.

So now you know how to use the **infinitive** or the **-ING form** after verbs.
